Education Reforms: Change Dynamics Martina Vukasović, Peter Maassen, Monika Nerland, Bjørn Stensaker, 2012-12-09

Higher education is in transition On the one hand over the last decades it has become politically and economically more important and thus also an object of reforms On the other hand higher education has become less special and is no longer able to justify its unique governance arrangements This volume presents a collection of contributions that go beyond reform agendas as such and focus on the effects of reforms at all relevant levels in higher education systems It is organised in four themes education research governance and academic profession with a variety of levels of analysis theoretical perspectives methodological approaches and geographical foci The topics in focus include the possible impact of latest national and European initiatives changes in the primary processes education and research on the levels of institutions professions and for individuals as well as higher education dynamics in contexts often overlooked in the literature e g Africa The aim is to take stock of the growing knowledge basis with respect to higher education with a special focus on the influence of reforms on the key aspects of higher education

University Dynamics and European Integration Peter Maassen, Johan P. Olsen, 2007-07-23 This book explores the visions underlying the attempts to reform the European University as well as two European integration processes It presents a framework for analyzing ongoing modernization reforms and reform debates that take place at various governance levels and a long term research agenda It convincingly argues why the knowledge basis under the current University reforms in Europe should be considerably strengthened

The European Higher Education Area, 2019-02-11 This volume presents the state of the art with respect to the most important elements of the Bologna process The reflections on the past are also used to fuel the debate on the next decade In 2008 the Flemish Ministry of Education and Training invited the editors to produce a volume with chapters discussing topics that are deemed to be most salient in the coming decade Based on a tentative list of themes to be covered initially suggested by the Ministry the editors have solicited contributions from appropriate scholars experts on the specific topics As a result this volume contains a rich set of chapters which address the promises and perils of the Bologna process and its preliminary outcomes A difficult task given that the process is a target on the move and even changing in nature during the process It is also a difficult task because evidence can be interpreted differently paving the way for new paradoxes and complex interactions between the actors in the field Consequently we are faced with new questions every time we believe answers to old questions have been found The contributors to the volume not necessarily agree in their analyses of the Bologna process but there is nevertheless a fair amount of consensus According to their analyses governance quality mobility and diversity are the topics that have been most important to the Bologna process in the past and will be at centre stage in future discussions The book is meant to be a reflective exercise for those involved in whatever way in the Bologna process researchers teachers managers political decision makers The material is also relevant to those outside of the countries currently subscribing to the Bologna process

Reforms, Organizational Change and Performance in Higher Education Rómulo Pinheiro, Lars Geschwind, Hanne Foss

Higher Education Management and Development. Compendium for Managers Jeroen Huisman, Attila Pausits, 2010 Today as never before it is imperative that university managers possess the knowledge and the competencies necessary for leading modern higher education institutions Professional management enables higher education institutions to cooperate more effectively with partners ranging from local businesses to international enterprises and other stakeholders As higher education institutions grow larger and extend their reach into new areas and the functions demanded of them multiply academic administration and management become increasingly complex thus the need for skilled management and administrative personnel becomes more acute This book emerged as the product of the European Higher Education Management and Development EHEMD project a European multilateral curriculum development project under the coordination of the Danube University Krems and funded by the European Union in the framework of the Erasmus Lifelong Learning Programme Focusing not only on theoretical points of view but also on their practical applications as demonstrated in the accompanying case studies the publication covers the key aspects of modern university management The booklet is structured so that each chapter presents a particular aspect and application of university management and the entire volume reflects the core contents of the EHEMD curriculum Can higher education management be taught While we confidently say yes the answer needs some qualification The yes applies because higher education management is no different from any other subject in the social sciences The qualification is that a sound pedagogical philosophy and structure need to underpin such a programme The fundamentals of the EHEMD programme are that it is interdisciplinary that it is practice oriented and that students learn from each other and also learn independently With a strong emphasis on Central Southern and Eastern Europe this book addresses management challenges in higher education today and in the near future

Higher Education and Regional Development Rómulo Pinheiro, Mitchell Young, Karel Šima, 2018-06-11 This book analyses the role of universities as critical actors in the socio economic development of peripheral regions in Norway and the Czech Republic Examining the ambiguities of the traditional mission of a university in comparison to contemporary demands the editors and contributors move past single case analyses to adopt an integrated conceptual and analytical framework The authors question whether universities can indeed fix the conditions of any region they operate in as is a common assumption by examining peripheral

regions many of which have been devastated by natural or man made disasters Simultaneously acknowledging the complexities at the heart of both higher education institutions and regions this book brings together a set of critical contributions that shed light on how universities can fulfil their role in peripheral regions rather than knowledge intensive cities and towns This uniquely researched book will be of interest to students and scholars of higher education universities and communities and education policy
