Sound Design and Science Fiction William Whittington, 2021 Sound is half the picture and since the 1960s film sound not only has rivaled the innovative imagery of contemporary Hollywood cinema but in some ways has surpassed it in status and privilege because of the emergence of sound design This in depth study by William Whittington considers the evolution of sound design not only through cultural and technological developments during the last four decades but also through the attitudes and expectations of filmgoers Fans of recent blockbuster films in particular science fiction films have come to expect a more advanced and refined degree of film sound use which has changed the way they experience and understand spectacle and storytelling in contemporary cinema The book covers recent science fiction cinema in rich and compelling detail providing a new sounding of familiar films while offering insights into the constructed nature of cinematic sound design This is accomplished by examining the formal elements and historical context of sound production in movies to better appreciate how a film sound track is conceived and presented Whittington focuses on seminal science fiction films that have made specific advances in film sound including 2001 A Space Odyssey THX 1138 Star Wars Alien Blade Runner original version and director's cut Terminator 2 Judgment Day and The Matrix trilogy and games milestones of the entertainment industry's technological and aesthetic

advancements with sound Setting itself apart from other works the book illustrates through accessible detail and compelling examples how swiftly such advancements in film sound aesthetics and technology have influenced recent science fiction cinema and examines how these changes correlate to the history theory and practice of contemporary Hollywood filmmaking

**Energy Efficiency** Great Britain: Parliament: House of Lords: Science and Technology Committee,2005-07-15 The Committee s report examines the contribution that energy efficiency can make towards achieving the Government s objective to reduce carbon dioxide emissions by 20 per cent by 2010 as set out in the Energy White Paper Our energy future creating a low carbon economy Cm 5761 ISBN 0101576129 published in February 2003 The report examines in detail the practical measures designed to achieve this objective as outlined in the Government s Energy Efficiency Action Plan Cm 6168 ISBN 0101616821 published in April 2004 It focuses on the contribution of business and industry which represents almost a third of total emissions and of households which represents almost one quarter it does not examine the contribution of the transport sector or consider renewable energy issues in detail as these have been covered in other Select Committee reports Amongst its findings the Committee argues that the main objective of energy efficiency should be the reduction of the UK s absolute energy consumption leading to lower emissions and proposes a methodology to measure progress towards this objective Other issues highlighted include the enormous wastefulness of the electricity generating industry the need for greater Government clarity and leadership in promoting energy efficiency and better public education about energy use and its economic and environmental costs
