## **Riding The Boom Extension:**

**Looking for a Story** Noel Rubinton, 2025-05-13 An annotated bibliography that documents the work of the longtime New Yorker writer journalist Pulitzer Prize winner and Princeton professor John McPhee *Table of Contents* John McPhee, 2011-04-01 First published in book form 1985 *Table of Contents* is a collection of eight pieces written by John McPhee between 1981 and 1984 Geographically and thematically they range from Alaska to New Jersey describing for example the arrival of telephones in a small village near the Arctic Circle and the arrival of wild bears in considerable numbers in New Jersey swarming in from the Poconos in search of a better life The essays in this collection which The New York Times called pretty close to flawless offer an excellent introduction to the work of one of our finest writers *Combat Crew*, 1957-07 *Excess Profits Tax Extension* United States. Congress. House. Committee on Ways and Means, 1953

**Alaska** Robert Hedin, Gary Holthaus, 1994-02-01 This aptly named book contains 22 selections by John Muir John McPhee Barry Lopez and others on Alaska and to some extent on the neighboring Yukon accompanied by a small but evocative collection of photographs of Eskimos The pieces most of which are top notch vividly describe the harsh climate the Arctic and sub Arctic habitats and the animals of Alaska and tell the stories of the Native Americans and others who have made their home or worked in the North This excellent sampler of some of the best writing on Alaska is recommended for academic and especially public libraries *Official Gazette of the United States Patent and Trademark Office* United States. Patent and Trademark Office, 1998 **Fine Books & Collections**, 2008 *Writing on the Edge*, 1991 *Riding with George* Philip G. Smucker, 2017-07-01 Long before George Washington was a president or general he was a sportsman Born in 1732 he had a physique and aspirations that were tailor made for his age one in which displays of physical prowess were essential to recognition in society At six feet two inches and with a penchant for rambunctious horse riding what he lacked in formal schooling he made up for in physical strength skill and ambition Virginia colonial society rewarded men who were socially adept strong graceful and fair at play Washington's memorable performances on the hunting field and on the battlefield helped crystallize his contribution to our modern ideas about athleticism and chivalry even as they also highlight the intimate ties between sports and war Washington's actions taken individually and seen by others as the core of his being helped a young nation bridge the old to the new and the aristocrat to the republican Author Philip G Smucker a fifth great grandnephew of George Washington uses his background as a war correspondent sports reporter and amateur equestrian to weave an insightful tale based upon his own travels in the footsteps and hoofprints of Washington as a surveyor sportsman and field commander As often as possible he saddles up and charges off to see what Washington's woods byways and battlefields look like from atop a saddle *Riding with George* is boots in stirrups storytelling that unspools Washington's rise to fame in a never before told yarn It shows how a young Virginian's athleticism and Old World chivalry propelled him to become a model of right action and good manners for a fledgling nation *The Art of Fact* Barbara Lounsberry, 1990-04-09

The artistry of nonfiction is the great unexplored territory of contemporary criticism. Although the American book clubs now emphasize nonfiction and The New York Times Book Review publishes almost three times as many reviews of nonfiction as fiction, critical appreciation of this work has lagged behind. *The Art of Fact* is the first comprehensive examination of five of today's most popular and important nonfiction artists: Gay Talese, Tom Wolfe, John McPhee, Joan Didion, and Norman Mailer. By discussing contemporary literary nonfiction in relation to the early prose narrative forms and to the news novels of the seventeenth and eighteenth centuries, the opening chapter defines the discourse known as literary or artistic nonfiction. Dr. Lounsberry then describes four characteristics of literary nonfiction and grounds these characteristics in contemporary works. The five chapters which follow this introduction thoroughly examine the works of five prominent contemporary nonfiction artists. While critics to date have tended to focus on only one or two of each writer's works, these chapters trace themes across each writer's entire body of work and even project likely future directions given current artistic trajectories. Also addressed is the role of literary nonfiction in the American literary tradition and how each of the five writers exemplifies a strand of nonfiction narrative. *The Art of Fact* draws from personal interviews with Gay Talese and John McPhee and includes new interpretations of the works of Tom Wolfe, Joan Didion, and Norman Mailer, as well as unpublished material from Gay Talese's current book in progress. *The Art of Fact* is a timely call for critical appreciation of the artistry of nonfiction and offers valuable insights to both students and fans of contemporary nonfiction.

The Space Shuttle has been the dominant machine in the U.S. space program for thirty years and has generated a great deal of interest among space enthusiasts and engineers. This book enables readers to understand its technical systems in greater depth than they have been able to do so before. The author describes the structures and systems of the Space Shuttle and then follows a typical mission, explaining how the structures and systems were used in the launch, orbital operations, and the return to Earth. Details of how anomalous events were dealt with on individual missions are also provided, as are the recollections of those who built and flew the Shuttle. Many photographs and technical drawings illustrate how the Space Shuttle functions, avoiding the use of complicated technical jargon. The book is divided into two sections. Part 1 describes each subsystem in a technical style supported by diagrams, technical drawings, and photographs to enable a better understanding of the concepts. Part 2 examines different flight phases from liftoff to landing. Technical material has been obtained from NASA as well as from other forums and specialists. Author Davide Sivoletta is an aerospace engineer with a life-long interest in space and is ideally qualified to interpret technical manuals for a wider audience. This book provides comprehensive coverage of the topic, including the evolution of given subsystems, reviewing the different configurations, and focusing on the solutions implemented.
