Making in Behavioral Strategy T. K. Das,2016-11-01 Behavioral strategy continues to attract increasing research interest within the broader field of strategic management Research in behavioral strategy has clear scope for development in tandem with such traditional streams of strategy research that involve economics markets resources and technology The key roles of psychology organizational behavior and behavioral decision making in the theory and practice of strategy have yet to be comprehensively grasped Given that strategic thinking and strategic decision making are importantly concerned with human cognition human decisions and human behavior it makes eminent sense to bring some balance in the strategy field by complementing the extant emphasis on the objective economics based view with substantive attention to the subjective individual oriented perspective This calls for more focused inquiries into the role and nature of the individual strategy actors and their cognitions and behaviors in the strategy research enterprise For the purposes of this book series behavioral strategy would be broadly construed as covering all aspects of the role of the strategy maker in the entire strategy field The scholarship relating to behavioral strategy is widely believed to be dispersed in diverse literatures These existing contributions that relate to behavioral strategy within the overall field of strategy has been known and perhaps valued by most scholars all along but were not adequately appreciated or brought together as a coherent sub field or as a distinct perspective of strategy This book series on Research in Behavioral Strategy will cover the essential progress made thus far in this admittedly fragmented literature and elaborate upon fruitful streams of scholarship More importantly the book series will focus on providing a robust and comprehensive forum for the growing scholarship in behavioral strategy In particular the volumes in the series will cover new views of interdisciplinary theoretical frameworks and models dealing with all behavioral

aspects significant practical problems of strategy formulation implementation and evaluation and emerging areas of inquiry The series will also include comprehensive empirical studies of selected segments of business economic industrial government and non profit activities with potential for wider application of behavioral strategy Through the ongoing release of focused topical titles this book series will seek to disseminate theoretical insights and practical management information that will enable interested professionals to gain a rigorous and comprehensive understanding of the subject of behavioral strategy Decision Making in Behavioral Strategy contains contributions by leading scholars in the field of behavioral strategy research The 10 chapters in this volume cover a number of significant issues relating to the decision making processes practices and perspectives in the field of behavioral strategy covering diverse topics such as failures in acquisitions entrepreneurs under ambiguity metacognition neural correlates of emotion knowledge flows behavioral responses business modeling and alliance capability The chapters include empirical as well as conceptual treatments of the selected topics and collectively present a wide ranging review of the noteworthy research perspectives on decision making in behavioral strategy

Measurement, Judgment, and Decision Making Michael H. Birnbaum, 1997-11-27 Measurement Judgment and Decision Making provides an excellent introduction to measurement which is one of the most basic issues of the science of psychology and the key to science Written by leading researchers the book covers measurement psychophysical scaling multidimensional scaling stimulus categorization and behavioral decision making Each chapter provides a useful handbook summary and unlocks the door for a scholar who desires entry to that field Any psychologist who manipulates an independent variable that affects a psychological construct or who uses a numerical dependent variable to measure a psychological construct will want to study this book Written by leading researchers in fields of measurement psychophysical scaling multidimensional scaling stimulus categorization and behavioral decision making Provides basic definitions and summaries of theories Presents summaries and citations to relevant literature Contains new developments current controversies and open questions Explains relationships among fields and historical links
