Analysis and Simulation of Semiconductor Devices S. Selberherr, 2012-12-06 The invention of semiconductor devices is a fairly recent one considering classical time scales in human life The bipolar transistor was announced in 1947 and the MOS transistor in a practically usable manner was demonstrated in 1960 From these beginnings the semiconductor device field has grown rapidly The first integrated circuits which contained just a few devices became commercially available in the early 1960s Immediately thereafter an evolution has taken place so that today less than 25 years later the manufacture of integrated circuits with over 400 000 devices per single chip is possible Coincident with the growth in semiconductor device development the literature concerning semiconductor device and technology issues has literally exploded In the last decade about 50 000 papers have been published on these subjects The advent of so called Very Large Scale Integration VLSI has certainly revealed the need for a better understanding of basic device behavior The miniaturization of the single transistor which is the major prerequisite for VLSI nearly led to a breakdown of the classical models of semiconductor devices

Advances in Cryptology - EUROCRYPT '89 Jean-Jacques Quisquater, Joos Vandewalle, 2003-06-30 The international Association for Cryptologic Research IACR organizes two international conferences every year one in Europe and one in the United States EUROCRYPT '89 was the seventh European conference and was held in Houthalen Belgium on April 10-13 1989 With close to 300 participants it was perhaps the largest open conference on cryptography ever held The field of cryptography is expanding not only because of the increased vulnerability of computer systems and networks to an increasing range of threats but also because of the rapid progress in cryptographic methods that the readers can witness by reading the book The present proceedings contain nearly all contributions which were presented including the talks at the rump session The chapters correspond to the sessions at the conference It was the first time that a rump session was organized on a Eurocrypt conference Sixteen impromptu talks were given and the authors were invited to submit short abstracts of their presentations Because of the special character of this session the editors have taken the liberty to shorten some of these
