Secure from Rash Assault James Winter, 2002-02-25 This book is both learned and readable at once an environmental economic and technological history Actually about the whole length and breadth of Britain it is never so technical that a lay reader gets lost and never so accommodating that it flattens the complexities of his subjects Michael Dintenfass author of *The Decline of Industrial Britain 1870 1980* How Green Were the Nazis? Franz-Josef Brüggemeier, Mark Cioc, Thomas Zeller, 2005 Annotation The first book to examine the Third Reich's environmental policies and to offer an in depth exploration of the intersections between brown ideologies and green practices Victorian Environments Grace Moore, Michelle J. Smith, 2018-03-07 This collection will draw attention to new ideas in both Victorian studies and in the emerging area of literature and the environment Adopting a broad interpretation of the term environment the work aims to draw together new approaches to Victorian texts and cultures that conceptualise and are influenced by environments ranging from rural to urban British to Antipodean and from the terrestrial to the aquatic With the pressures of industrialism and the clustering of workers in urban centres the Victorians were acutely aware that their environment was changing Torn between nostalgia for a countryside that was in jeopardy and exhilaration at the rapidity with which their surroundings altered the literature and culture produced by the Victorians reflects a world undergoing radical change Colonization and assisted emigration schemes expanded the scope of the environment still further pushing the boundaries of the home on an unprecedented scale and introducing strange new worlds These untamed physical environments enabled new freedoms but also posed challenges that invited attempts to control taxonomize and harness the natural world *Victorian Environments* draws together leading and emerging international scholars for an examination of how various kinds of environments were constructed redefined and transformed in British and colonial texts and cultures with particular attention to the relationship between Australia and Britain **Romantic Naturalists, Early Environmentalists** Dewey W. Hall, 2016-04-08 In his study of Romantic naturalists and early environmentalists Dewey W Hall asserts that William Wordsworth and Ralph Waldo Emerson were transatlantic literary figures who were both influenced by the English naturalist Gilbert White In Part 1 Hall examines evidence that as Romantic naturalists interested in meteorology Wordsworth and Emerson engaged in proto environmental activity that drew attention to the potential consequences of the locomotive's incursion into Windermere and Concord In Part 2 Hall suggests that Wordsworth and Emerson shaped the early environmental movement through their work as poets turned naturalists arguing that Wordsworth influenced Octavia Hill's contribution to the founding of the United Kingdom's National Trust in 1895 while Emerson inspired John Muir to spearhead the United States National Parks movement in 1890 Hall's book traces the connection from White as a naturalist turned poet to Muir as the quintessential early environmental activist who camped in Yosemite with President Theodore Roosevelt Throughout Hall raises concerns about the growth of industrialization to make a persuasive case for literature's importance to the rise of environmentalism

Doctor Who and History Carey Fleiner, Dene October, 2017-07-25 When Sydney Newman conceived the idea for Doctor Who in 1963 he envisioned a show in which the Doctor and his companions would visit and observe but not interfere with events in history That plan was dropped early on and the Doctor has happily meddled with historical events for decades This collection of new essays examines how the Doctor's engagement with history relates to Britain's colonial past nostalgia for village life Norse myths alternate history and the impact of historical decisions on the present

relationship with it **Consuming Landscapes** Thomas Zeller, 2022-10-04 What we see through our windshields reflects ideas about our national identity consumerism and infrastructure For better or worse windshields have become a major frame for viewing the nonhuman world The view from the road is one of the main ways in which we experience our environments These vistas are the result of deliberate historical forces and humans have shaped them as they simultaneously sought to be transformed by them In *Consuming Landscapes* Thomas Zeller explores how what we see while driving reflects how we view our societies and ourselves the role that consumerism plays in our infrastructure and ideas about reshaping the environment in the twentieth century Zeller breaks new ground by comparing the driving experience and the history of landscaped roads in the United States and Germany two major automotive countries He focuses specifically on the Blue Ridge Parkway in the United States and the German Alpine Road as case studies When the automobile was still young an early twentieth century group of designers landscape architects civil engineers and planners sought to build scenic infrastructures or roads that would immerse drivers in the landscapes that they were traversing As more Americans and Europeans owned cars and drove them however they became less interested in enchanted views safety became more important than beauty Clashes between designers and drivers resulted in different visions of landscapes made for automobiles As strange as it may seem to twenty first century readers many professionals in the early twentieth century envisioned cars and roads if properly managed as saviors of the environment *Consuming Landscapes* illustrates how the meaning of infrastructures changed as a result of use and consumption Such changes indicate a deep ambivalence toward the automobile and roads prompting the question can cars and roads bring us closer to nature while deeply altering it at the same time **Paradise Lost** Jeremy Burchardt, 2002-07-26 The enduring Town versus Country debate lies at the root of modern British society How far did the idealization of the countryside by artists and writers since the Industrial Revolution foster anti urban anti industrial values How have such values affected government policy social structure and economic dynamism Did post war developments in particular rural urban commuting and environmentalist criticism of modern industrial farming undermine the traditional distinction between town and country or are they themselves symptoms of the continuing allure of the rural idyll This book will demonstrate the remarkable influence that attitudes to the countryside have had on the evolution of modern British life
