Securities Environmental Cases And Mateirals:

Securities Elizabeth Glass Geltman, 1994 *Cases and Materials on the Law of the Sea, Second Edition* Louis B. Sohn, John Noyes, Erik Franckx, Kristen Juras, 2014-05-08 A special course adoption price is available for an order of six or more copies from a university bookstore Contact sales us brill com or sales nl brill com to learn more This second edition of *Cases and Materials on the Law of the Sea* has been updated to address significant developments that have occurred in the law of the sea since the publication of the first edition in 2004 The text compiles cases treaties U N documents commentaries and other teaching materials that systematically present law of the sea topics while placing those issues in the broader context of international law and international legal process The book incorporates relevant historical materials alongside materials addressing more recent topics such as port security the depletion of fish stocks and the operation of new international institutions Extensive notes and discussion questions engage readers and enhance their understanding of the materials California Cases on Security Transactions in Land Richard Callender Maxwell, 1984 **Security and Environmental Sustainability of Multimodal Transport** Michael Bell, Solmaz Haji Hosseinloo, Urszula Kanturska, 2010-06-07 Not until the recent attacks on transport systems has transport security become a focus of public concern and academic research Various aspects of transport security have already been analysed under different agendas Some research was focused on the potential risk to the environment resulting from transport in particular from the transport of hazardous or dangerous goods while other research considered critical elements of transport networks or supply chains as vital lifelines in the case of natural disasters Recently new threats stimulated interest in transport security as a stand alone issue placing it at the forefront of political and academic agendas A NATO Advanced Research Workshop held at Imperial College London in January 2009 brought together those with expertise in the above mentioned fields in order to verify the current state of knowledge in the field and identify promising areas for future work The workshop concentrated on maritime and intermodal transport risk management and long term strategic planning rather than on the details of monitoring or detection techniques This collection of papers emanates largely from that workshop While transport systems are widely recognized as terrorist targets complete protection of these systems is economically and practically infeasible The workshop looked at analytical methods to identify critical points in the transport infrastructure and the prioritization of defensive and mitigating measures given the limited resources available Deficiencies in methods for conducting such an assessment were identified and the need for cost effective mitigation measures was emphasized *Environment and Security* M. Lowi, B. Shaw, 2000-05-16 This book is based on a conference addressing the relationship between the environment and security in the post Cold War world It brings together scholars and practitioners from a variety of different disciplines and perspectives in an effort to both explore the complexities of the relationship between environmental variables and security conditions and re focus the debate within the environmental community The book combines analytical frameworks and case study material

with proposals for addressing environmental challenges and enhancing the security and welfare of peoples states and regions

Energy and Environmental Challenges to Security Stephen Tec, Besnik Baraj, 2009-01-25 On 21 November 2007 the grand and elegant Delegates Hall of the Hungarian Parliament was the scene of the opening of a conference to discuss some of the most pressing issues of the day those related to our unending thirst for energy its environmental consequences and the challenges that these bear on security Over the next 3 days scientists parliamentarians and their guests confronted challenged teased and cajoled each other in a NATO Advanced Research Workshop ARW entitled Energy and Environmental Challenges to Security affirming that knowledge and public service hold the keys to solving our greatest challenges The magnitude of the security challenge was confirmed while this volume was being prepared In mid 2008 the International Energy Agency issued a report concluding that US 45 trillion would be needed over the next half century to prevent energy shortages and greenhouse gas emissions from undermining global economic growth But lest such large numbers cause us all to shrug this volume brings attention to some of the more manageable aspects of the environment and energy security challenge from addressing conflict resources such as illegal timber that contribute to corruption and regional instability to means and mechanisms to enable the diversification of energy supplies to environmental risk reduction strategies for particular installations The participants in the Hungarian Parliament building were atypical for a NATO Advanced Research Workshop
