Fully Alive Tyler Gage, 2017-08 In the spirit of Adam Braun's *The Promise of a Pencil* and Blake Mycoskie's *Start Something That Matters* *Fully Alive* tells the story of an astoundingly successful young entrepreneur's immersion in Amazonian indigenous spirituality and how he integrated the lessons he learned to build a successful socially responsible company live a purposeful life and make a difference in the world In *Fully Alive* Tyler Gage shares his spiritual adventures and the business savvy that helped him create RUNA a tea and energy drink company that collaborates with the indigenous people of Ecuador to harvest the master plant guayusa revealing a centuries old guiding philosophy for building a sacred way of living that he discovered through Amazonian shamanism Following these teachings what began as a humble start up has now grown into a thriving multi million dollar company selling products in more than 10 000 stores across the United States and Canada With the help of collaborators like Channing Tatum Leonardo

DiCaprio and Olivia Wilde RUNA has created a sustainable source of income for the 3 000 farming families in Ecuador who grow guayusa organically while also establishing a nonprofit organization dedicated to positively impacting the issues that affect these indigenous communities Packed with practical and inspiring lessons this book offers a comprehensive examination of how we too might become fully alive both in business and as individuals **Tomorrow's Table** Pamela C. Ronald, Raoul W. Adamchak, 2018-03-12 Tomorrow's Table argues that a judicious blend of two important strands of agriculture genetic engineering and organic farming is key to helping feed the world's growing population in an ecologically balanced manner Pamela Ronald a geneticist and her husband Raoul Adamchak an organic farmer take the reader inside their lives for roughly a year allowing us to look over their shoulders so that we can see what geneticists and organic farmers actually do Readers see the problems that farmers face trying to provide larger yields without resorting to expensive or environmentally hazardous chemicals a problem that will loom larger and larger as the century progresses and they learn how organic farmers and geneticists address these problems The book is for consumers farmers and policy decision makers who want to make food choices and policy that will support ecologically responsible farming practices and for anyone who wants accurate information about organic farming genetic engineering and their potential impacts on human health and the environment The first edition was published in hardcover in 2008 and in paperback in 2009 This second edition reflects the many and varied changes the fields of farming and genetic engineering have seen since 2009 It includes a new preface and three new chapters one on politics and food related protests such as the Marin county anti vaccine movement and the subsequent outbreak of whooping cough one on farming and food security and one containing various recipes Existing chapters on the tools of genetic engineering organic vs conventional foods the tools of organic agriculture and food labeling and legislature have all been updated Ancestral Diets and Nutrition Christopher Cumo, 2020-11-19 Ancestral Diets and Nutrition supplies dietary advice based on the study of prehuman and human populations worldwide over the last two million years This thorough accessible book uses prehistory and history as a laboratory for testing the health effects of various foods It examines all food groups by drawing evidence from skeletons and their teeth middens and coprolites along with written records where they exist to determine peoples health and diet Fully illustrated and grounded in extensive research this book enhances knowledge about diet nutrition and health It appeals to practitioners in medicine nutrition anthropology biology chemistry economics and history and those seeking a clear explanation of what humans have eaten across the ages and what we should eat now Features Sixteen chapters examine fat sweeteners grains roots and tubers fruits vegetables and animal and plant sources of protein Integrates information about diet nutrition and health from ancient medieval modern and current sources drawing from the natural sciences social sciences and humanities Provides comprehensive coverage based on the study of several hundred sources and the provision of over 2 000 footnotes Presents practical information to help shape readers next meal through recommendations of what to eat and what to avoid *Tea* Paul Chrystal, 2014-10-15 The

tale of Britain's greatest love affair begins with the arrival of tea here in the seventeenth century. Since then it has shaped our lives, our history, our work, and our culture. So put the kettle on and read the amazing story of tea. *Food Lit* Melissa Brackney Stoeger, 2013-01-08 An essential tool for assisting leisure readers interested in topics surrounding food, this unique book contains annotations and read-alikes for hundreds of nonfiction titles about the joys of comestibles and cooking. *Food Lit: A Reader's Guide to Epicurean Nonfiction* provides a much-needed resource for librarians assisting adult readers interested in the topic of food, a group that is continuing to grow rapidly. Containing annotations of hundreds of nonfiction titles about food that are arranged into genre and subject interest categories for easy reference, the book addresses a diversity of reading experiences by covering everything from foodie memoirs and histories of food to extreme cuisine and food exposés. Author Melissa Stoeger has organized and described hundreds of nonfiction titles centered on the themes of food and eating, including life stories, history, science, and investigative nonfiction. The work emphasizes titles published in the past decade without overlooking significant benchmark and classic titles. It also provides lists of suggested read-alikes for those titles and includes several helpful appendices of fiction titles featuring food, food magazines, and food blogs. *The Age of Low Tech* Philippe Bihouix, 2020-10-21 People often believe that we can overcome the profound environmental and climate crises we face by smart systems, green innovations, and more recycling. However, the quest for complex technological solutions which rely on increasingly exotic and scarce materials makes this unlikely. A best seller in France, this English language edition introduces readers to an alternative perspective on how we should be marshalling our resources to preserve the planet and secure our future. Bihouix skilfully goes against the grain to argue that high technology will not solve global problems and envisages a different approach to build a more resilient and sustainable society. *Ecological Sustainability for Non-timber Forest Products* Charlie M. Shackleton, Ashok K. Pandey, Tamara Ticktin, 2015-03-24 There is growing knowledge about and appreciation of the importance of Non-timber Forest Products (NTFPs) to rural livelihoods in developing countries and to a lesser extent developed countries. However, there is also an assumption on the part of policy makers that any harvesting of wild animal or plant products from the forests and other natural and modified ecosystems must be detrimental to the long-term viability of target populations and species. This book challenges this idea and shows that while examples of such negative impacts certainly exist, there are also many examples of sustainable harvesting systems for NTFPs. The chapters review and present coherent and scientifically sound information and case studies on the ecologically sustainable use of NTFPs. They also outline a general interdisciplinary approach for assessing the sustainability of NTFP harvesting systems at different scales. A wide range of case studies is included from Africa, Asia, and South America using plant and animal products for food, crafts, textiles, medicines, and cosmetics.
