economic benefits to society whilst protecting their Outstanding Universal Value Drawing on empirical evidence gathered in conversation with stakeholders at WHS across Africa the book explores the challenges involved in implementing conservation and socio economic development as a stakeholder driven process Demonstrating that heritage can no longer be viewed as totally separate from its socio economic context Pascall argues that decisions about the management of heritage need to make sense at the local level if they are to be supported by stakeholders As the book shows heritage is still viewed and managed through systems approaches and strategies inherited from the colonial period despite the increasing availability of inclusive governance systems Stakeholders offer alternative creative and innovative approaches that capitalize on the potential of World Heritage to contribute to socio economic development whilst ensuring that its credibility and integrity are maintained Stakeholder Perspectives on World Heritage and Development in Africa offers unique insights into local perspectives on World Heritage and development in Africa The book will be essential reading for academics students development partners and practitioners around the world who are interested in museums and heritage conservation development and the African continent Also the book will be useful in the preparation of nomination dossiers management plans development plans and in disaster risk management at WHS *Management Planning for Cultural Heritage* Ken Taylor, Giulio Verdini, 2021-12-30 Management Planning for Cultural Heritage challenges traditional perceptions of and about the heritage planning process while also presenting a comprehensive analysis of the ever widening field of Cultural Heritage Conservation Drawing on the authors experience in teaching and involvement in international practice the book examines the changes that are taking place in modes of thinking about heritage as part of increasingly complex urban transformations and considers how these must engage with and inform professional practice The book also acknowledges that international best practice has developed a great deal over the last 40 years and needs to be adapted applied and refined through the recognition and application of regional values tangible and intangible based on cultural attitudes and practices Emphasising the critical role of heritage planning and management in guiding change Taylor and Verdini argue that this is especially critical if we are to safeguard values identity and significance In this sense heritage is understood not only as a technical process but also as a social construct The book therefore promotes a people centred approach to cultural heritage management Management Planning for Cultural Heritage will be of interest to students scholars and practitioners working in heritage studies and conservation While the text has professional application it also sets out to present a sound theoretical foundation relevant to the body of knowledge associated with management of cultural heritage places Archaeological Heritage Conservation and Management Brian J. A Future for Archaeology

Robert Layton, Stephen Shennan, Peter Stone, 2016-09-16 Over the last thirty years issues of culture identity and meaning have moved out of the academic sphere to become central to politics and society at all levels from the local to the global Archaeology has been at the forefront of these moves towards a greater engagement with the non academic world often in an extremely practical and direct way for example in the disputes about the repatriation of human burials Such disputes have been central to the recognition that previously marginalized groups have rights in their own past that are important for their future The essays in this book look back at some of the most important events where a role for an archaeology concerned with the past in the present first emerged and look forward to the practical and theoretical issues now central to a socially engaged discipline and shaping its future This book is published in honor of Professor Peter Ucko who has played an unparalleled role in promoting awareness of the core issues in this volume among archaeologists
