Access to Power Joan M. Nelson, 2017-03-14 Joan Nelson elucidates the implications of this rapid growth and concomitant poverty for politics Unlike many scholars who have sought an all encompassing theory to explain the political behavior of the urban poor Professor Nelson emphasizes the complex variety in the economic social and political circumstances that influence this behavior Originally published in 1979 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Cuba borders on fantasy This diminutive country boldly and repeatedly exercises the foreign policy of a major power Although closely tied to the United States through most of its modern history Cuba successfully defied the U S government after 1959 consolidated its own power and defeated an invasion of U S backed exiles at the Bay of Pigs in 1961 Fidel Castro then brought the world alarmingly close to nuclear war in 1962 Jorge Dom nguez presents a comprehensive survey of Cuban international relations since Castro came to power Dom nguez unravels Cuba s response to the 1962 missile crisis and the U S Soviet understandings that emerged from that He explores the ties that link Cuba to the U S S R and other Communist countries analyzes Cuban support for revolutionary movements throughout the world especially in Latin America and Africa and assesses the significance of Cuban political and economic relations with Western Europe Canada and Japan Some have charged that Cuba does not have a foreign policy that Fidel Castro merely takes orders from his Soviet bosses Dom nguez argues that there is indeed a specifically Cuban foreign policy poised not only between hegemony and autonomy between compliance and self assertion but also between militancy and pragmatism He believes that within the context of Soviet hegemony Cuba s foreign policy is very much its own and he marshals impressive evidence to support this belief His book is based on extensive documentation from Cuba the United States and other countries as well as from many in depth interviews carried out during trips to Cuba

Latin American University Students Arthur Liebman, Kenneth N. Energy and Structure Richard Newbold Adams, 2014-02-19 All social structures are essentially power structures dependent on energy The concept of power and the role of energy in social organization are crucial and timely concerns especially in light of the current apprehension about future energy resources In Energy and Structure Richard N Adams argues that social power affects humanity s approach to ecological economic and political problems directing people to seek solutions that are often deceptively shortsighted Adams an anthropologist proposes that social power is directly derived from control over energy processes He identifies how power and mentalistic structures constitute fundamental determinants that shape the lives of people at all stages of cultural development forcing them to accept alternatives often far removed from their desires His central thesis is that the amount of power in any system varies with the amount of control exercised over the environment and that increasing power and control lead to increasing centralization of decision making social marginalization and

environmental despoliation Thus the more highly developed societies by virtue of their greater controls are responsible for the greater ultimate subordination and destruction of human potential as humanity combines technological advances with a growing inability to exercise good judgment with respect to our own survival Energy and Structure begins with an examination of the basic theory of social power what it is and how it works Adams defines and differentiates between the concepts of power and control authority and legitimacy power domains and levels He then examines the underlying metatheory of energetic and mentalistic structures and provides an analytic model of the evolution of power from the primitive band to modern nations He predicts the emergence of supranational blocs and discusses other future possibilities Throughout his theoretical points are solidly supported by examples drawn from a wide range of cultures *Harvard Studies in International Affairs* ,1980 *Feeding the Crisis* Rachel Garst,Tom Barry,1990-01-01 Examines United States food aid to Central America and makes detailed recommendations for changes in its administration *The International Role of the Communist Parties of Italy and France* Donald L. M. Blackmer,Annie Kriegel,1975 **The Choice of Technology in Developing Countries** C. Peter Timmer,1975 Monograph comprising four case studies undertaken in Indonesia Bangladesh and Colombia relating to factors affecting the choice of technology in developing countries advocates a labour intensive intermediate technology as the solution to problems of unemployment References and statistical tables *Oil and the Middle East War--Europe in the Energy Crisis* Robert J.
