By examining and mapping the politics of place and motion this book analyzes human beings embodied engagements with their built world and provides diverse perspectives on the ideological and political underpinnings of landscapes of mobility In order to describe landscapes of mobility as a historically socially and politically constructed condition the book is divided into three sections objects contacts and flows The first section looks at elements that constitute such landscapes including mobile bodies buildings and practices across multiple geographical scales As these variable landscapes are reconstituted under particular social economic ecological and political conditions the second section turns to the particular practices that catalyze embodied relations within and across such spaces Finally the last section explores how the flows of objects bodies interactions and ecologies are represented presenting a critical comparison of the means by which relations processes and exchanges are captured depicted reproduced and re embodied

Art Theory for a Global Pluralistic Age Steven Félix-Jäger,2019-12-02 This book extends a theory of art that addresses the present era's shift towards global pluralism By focusing on extrinsic rather than intrinsic qualities of art this book helps viewers evaluate art across cultural boundaries Art can be universally classified by an evaluation of its guiding narrative and can be understood and judged through hermeneutical methods Since artists engage culture through various local transnational and emerging global narratives it is difficult to decipher what standards are used for evaluation and which authoritative body evaluates the work This book implements a narrative hermeneutical approach to properly classify an artwork and establish its meaning and value

Body Architecture Andrew Patrizio,Bradley Quinn,Jade Dellinger,2003

It's Not Personal Susan Best,2021-06-17 How does something as potent and evocative as the body become a relatively neutral artistic material From the 1960s much body art and performance conformed to the anti expressive ethos of minimalism and conceptualism whilst still using the compelling human form But how is this strange mismatch of vigour and impersonality able to transform the body into an expressive medium for visual art Focusing on renowned artists such as Lygia Clark Marina Abramovic and Angelica Mesiti Susan Best examines how bodies are configured in late modern and contemporary art She identifies three main ways in which they are used as material and argues that these formulations allow for the exposure of pressing social and psychological issues In skilfully aligning this new typology for body art and performance with critical theory she raises questions pertaining to gender inter subjectivity relation and community that continue to dominate both our artistic and cultural conversation
