 Northrop Frye and Others Robert D. Denham,2015-08-20 Eminent Northrop Frye scholar Robert D Denham explores the connection between Frye and twelve writers who influenced his thinking but about whom he didn t write anything expansive Denham draws especially on Frye s notebooks and other previously unpublished texts now available in the *Collected Works of Frye* Such varied thinkers as Aristotle Lewis Carroll S ren Kierkegaard and Paul Tillich emerge as

important figures in defining Frye's cross disciplinary interests. Eventually the twelve Others of the title come to represent a space occupied by writers whose interests paralleled Frye's and helped to establish his own critical universe. **Thomas Harriot** Robert Fox, 2017-07-05 This volume assembles ten studies of the life and work of Thomas Harriot 1560-1621. These are based on lectures that have been given annually at Oriel College Oxford since 1990 by such authorities as Hugh Trevor Roper, David Quinn and John D. North. An astronomer and mathematician whose activities embraced not only science but also philosophical debate and an engagement in the early exploration of America, Harriot occupied a prominent place in intellectual and public life. He was well read in the contemporary literature of science and his writings on algebra, his correspondence and his early observations with the telescope undertaken at the same time as Galileo's, brought him to the attention of leading men of science both in Britain and abroad. Recent scholarship has enhanced historians' appreciation of Harriot's achievements and of the scientific context and social milieu in which he worked, a milieu distinguished by his friendship with Walter Raleigh and the Ninth Earl of Northumberland, the Wizard Earl, whose association with the Gunpowder Plot led to many years of imprisonment in the Tower. The contributions to *Thomas Harriot: An Elizabethan man of science* shed new light on all the main aspects of Harriot's life and stand as an important contribution to the re-evaluation of one of the most gifted and intriguing figures in early modern British science. *Doctor Illuminatus* Ramón Llull, 2020-12-08 For this new anthology Anthony Bonner has chosen central texts from his acclaimed two-volume compilation *Selected Works of Ramon Llull* (Princeton, 1985). Available for the first time in an affordable format, these works serve as an introduction to the life and writings of the Catalan, properly Majorcan, philosopher, mystic and theologian who lived from 1232 to 1316. Founder of a school of Arabic and other languages, Llull was also a poet and novelist and one of the creators of literary Catalan. This volume contains three prefaces on Llull's life, thought and reputation. Of Llull's works it offers *Book of the Gentile* and the *Three Wise Men*, his seminal Christian apology; the *Ars brevis*, a summary of his philosophical system; *The Book of the Lover and the Beloved*, a celebration of mystical love in the courtly tradition; and his wittily scathing *Book of the Beasts*. **The Perfect Genre. Drama and Painting in Renaissance Italy** Kristin Phillips-Court, 2016-12-05 Proposing an original and important re-conceptualization of Italian Renaissance drama, Kristin Phillips-Court here explores how the intertextuality of major works of Italian dramatic literature is not only poetic but also figurative. She argues that not only did the painterly gaze so prevalent in fifteenth and sixteenth-century devotional art, portraiture and visual allegory inform humanistic theories, practices and themes, it also led prominent Italian intellectuals to write visually evocative works of dramatic literature whose topical plots and structures provide only a fraction of their cultural significance. Through a combination of interpretive literary criticism, art historical analysis and cultural and intellectual historiography, Phillips-Court offers detailed readings of individual plays juxtaposed with specific developments and achievements in the realm of painting. Revealing more than historical connections between artists and poets such as Tasso and Giorgione, Mantegna and Trissino, Michelangelo and Caro,

or Bruno and Caravaggio the author locates the history of Renaissance art and drama securely within the history of ideas She provides us with a story about the emergence and eventual disintegration of Italian Renaissance drama as a rigorously philosophical and empirical form Considering rhetorical philosophical ethical religious political ideological and aesthetic dimensions of each of the plays she treats Kristin Phillips Court draws our attention to the intermedial conversation between the theater and painting in a culture famously dominated by art Her integrated analysis of visual and dramatic works brings to light how the lines and verses of the text reveal an ongoing dialogue with visual art that was far richer and more intellectually engaged than we might reconstruct from stage diagrams and painted backdrops

Transformations of Time and Temporality in Medieval and

Renaissance Art Simona Cohen,2014-03-10 Although studies of specific time concepts expressed in Renaissance philosophy and literature have not been lacking few art historians have endeavored to meet the challenge in the visual arts This book presents a multifaceted picture of the dynamic concepts of time and temporality in medieval and Renaissance art adopted in speculative ecclesiastical socio political propagandist moralistic and poetic contexts It has been assumed that time was conceived in a different way by those living in the Renaissance as compared to their medieval predecessors Changing perceptions of time an increasingly secular approach the sense of self determination rooted in the practical use and control of time and the perception of time as a threat to human existence and achievements are demonstrated through artistic media Chapters dealing with time in classical and medieval philosophy and art are followed by studies that focus on innovative aspects of Renaissance iconography

Peacemaking and Religious Violence

Roger A Johnson,2011-05-26 From its very beginning Christian faith has been engaged with religious violence The first Christians were persecuted by their co religionists and then by imperial Rome Jesus taught them in such circumstances not to retaliate but to be peacemakers to love their enemies and to pray for their persecutors Jesus s response to religious violence of the first century was often ignored but it was never forgotten Even during those centuries when the church herself persecuted Christian heretics Jews

and Muslims some Christians still struggled to bear witness to the peace mandate of their Lord In the thirteenth century Thomas Aquinas wrote a theology to help his Dominican brothers persuade Cathar Christians to return to their Catholic faith peacefully Ramon Lull a Christian student of Arabic and the Qur'an sought to help his fellow Christians recognize the elements of belief they shared in common with the Muslims in their midst In the fifteenth century Nicholas of Cusa a Church Cardinal and theologian expanded Lull's project to include the newly discovered religions of Asia In the seventeenth century Lord Herbert an English diplomat and lay Christian began to identify the political union of church and government as a causal factor in the religious warfare of post Reformation Christendom One and a half centuries later Thomas Jefferson a lay theologian of considerable political stature won a political struggle in the American colonies to disestablish religion first in his home colony of Virginia and then in the new nation he helped to found All five of these theologians reclaimed the peace mandate of Jesus in their response to the religious violence of their own eras All of which points us to some intriguing

Christian responses to religious violence in our own century as recounted in the epilogue **Creational Theology and the**

History of Physical Science: The Creationist Tradition from Basil to Bohr Christopher B. Kaiser, 2021-12-06 This volume documents the role of creational theology in discussions of natural philosophy medicine and technology from the Hellenistic period to the early twentieth century Four principal themes are the comprehensibility of the world the unity of heaven and earth the relative autonomy of nature and the ministry of healing Successive chapters focus on Greco Roman science medieval Aristotelianism early modern science the heritage of Isaac Newton and post Newtonian mechanics The volume will interest historians of science and historians of the idea of creation It simultaneously details the persistence of tradition and the emergence of modernity and provides the historical background for later discussions of creation and evolution

William Stanley as Shakespeare John M. Rollett, 2015-04-07 Presenting striking new evidence this book shows that William Shakespeare was the pen name of William Stanley son of the Earl of Derby Born in 1561 he was educated at Oxford travelled for three years abroad and studied law in London mixing with poets and playwrights In 1592 Spenser recorded that Stanley had written several plays In 1594 he unexpectedly inherited the earldom hence the pen name He became a Knight of the Garter in 1601 eligible to help bear the canopy over King James at his coronation likely prompting Sonnet 125's 'Wer't ought to me I bore the canopy he is the only authorship candidate ever in a position to bear the canopy which was only ever borne over royalty Love's Labour's Lost parodies an obscure poem by Stanley's tutor which few others would have read Hamlet's situation closely mirrors Stanley's in 1602 His name is concealed in the list of actors' names in the First Folio His writing habits match Shakespeare's as deduced from the early printed plays He was a patron of players who performed several times at court and financed the troupe known as Paul's Boys No other member of the upper class was so thoroughly immersed in the theatrical world *Reading the World* Mary Franklin-Brown, 2024-05-31 The thirteenth century saw such a proliferation of new encyclopedic texts that more than one scholar has called it the century of the encyclopedias

Various referred to as a *speculum thesaurus* or *imago mundi* the term encyclopedia was not commonly applied to such books until the eighteenth century these texts were organized in such a way that a reader could easily locate a collection of authoritative statements on any given topic Because they reproduced rather than simply summarized parts of prior texts these compilations became libraries in miniature In this groundbreaking study Mary Franklin Brown examines writings in Latin Catalan and French that are connected to the encyclopedic movement Vincent of Beauvais's *Speculum maius* Ramon Llull's *Libre de meravelles* *Arbor scientiae* and *Arbre de filosofia d amor* and Jean de Meun's continuation of the *Roman de la Rose* Franklin Brown analyzes the order of knowledge in these challenging texts describing the wide ranging interests the textual practices including commentary compilation and organization and the diverse discourses that they absorb from preexisting classical patristic and medieval writing She also demonstrates how these encyclopedias like libraries became heterotopias of knowledge spaces where many possible ways of knowing are juxtaposed But Franklin Brown's study will not appeal only to historians she argues that a revised understanding of late medievalism makes it possible to discern a close connection between scholasticism and contemporary imaginative literature She shows how encyclopedists employed the same practices of figuration narrative and citation as poets and romancers while much of the difficulty of the imaginative writing of this period derives from a juxtaposition of heterogeneous discourses inspired by encyclopedias With rich and innovative readings of texts both familiar and neglected *Reading the World* reveals how the study of encyclopedism can illuminate both the intellectual work and the imaginative writing of the scholastic age
