Plants in the Ancient Americas Elizabeth Anne Bollwerk,Shannon Tushingham,2015-12-20 This volume presents the most recent archaeological historical and ethnographic research that challenges simplistic perceptions of Native smoking and explores a wide variety of questions regarding smoking plants and pipe forms from throughout North America and parts of South America By broadening research questions utilizing new analytical methods and applying interdisciplinary interpretative frameworks this volume offers new insights into a diverse array of perspectives on smoke plants and pipes

Archaeological Concepts, Techniques, and Terminology for American Prehistoric Lithic Technology Wm Jack Hranicky,2013-06-03 Archaeological Concepts Techniques and Terminology for American Prehistory Lithic Technology by Wm Jack Hranicky is a 600 page comprehensive publication that encompasses the study of American prehistoric stone tools and implements It is a look up volume for studying the material culture of prehistoric people and using its concepts and methods for researching this aspect of archaeology There are over 3000 entries which are defined and illustrated It also has an extensive set of references and an overview for the study of stone tools **Prehistoric Projectile Points Found Along the Atlantic Coastal Plain** Wm Jack Hranicky,2011 This publication was written to provide a source for archaeological projectile point typology for a region of the U S that over the years has been traditionally divided into Northeast culture area Middle Atlantic culture area Southeastern culture area These divisions are based primarily on lithic technology and settlement patterns While this focus tends to serve archaeological investigations most of the prehistoric Indian habitation occupation requires greater definition and appraisal from other sources within the archaeological community Even among artifact collectors there is a tendency to parcel these areas into the classic culture area concepts This publication makes no attempts to refocus archaeology but to show the vast overlaps of numerous point technologies This is especially true over time so that for lithic point technology in general there is a Panindian focus that can be applied to almost every tool type along the Atlantic Coast This publication provides most of the published types from along the Atlantic seaboard Each type has a basic description and the illustration is an ideal point for that type A set of point references is provided these make excellent and needed sources for the study of projectile point studies Journal of Northwest Anthropology Darby C. The Settlement of the American Continents C. Michael Barton, Geoffrey A. Clark, David R. Yesner, Georges A. Pearson, 2016-03-04 When many scholars are asked about early human settlement in the Americas they might point to a handful of archaeological sites as evidence Yet the process was not a simple one and today there is no consistent argument favoring a particular scenario for the peopling of the New World This book approaches the human settlement of the Americas from a biogeographical perspective in order to provide a better understanding of the mechanisms and consequences of this unique event It considers many of the questions that continue to surround the peopling of the Western Hemisphere focusing not on sites dates and artifacts but rather on theories and models that attempt to explain how the colonization occurred Unlike other studies this book draws on a wide range of disciplines archaeology human genetics and osteology linguistics ethnology and ecology to present the big picture of this migration Its wide ranging content considers who the Pleistocene settlers were and where they came from their likely routes of migration and the ecological role of these pioneers and the consequences of colonization Comprehensive in both geographic and topical coverage the contributions include an explanation of how the first inhabitants could have spread across North America within several centuries the most comprehensive review of new mitochondrial DNA and Y chromosome data relating to the colonization and a critique of recent linguistic theories Although the authors lean toward a conservative rather than an extreme chronology this volume goes beyond the simplistic emphasis on dating that has dominated the debate so far to a concern with late Pleistocene forager adaptations and how foragers may have coped with a wide range of environmental and ecological factors It offers researchers in this exciting field the most complete summary of current knowledge and provides non specialists and general readers with new answers to the questions surrounding the origins of the first Americans

The Heartland Kristin L. Hoganson, 2019-04-23 A history of a quintessentially American place the rural and small town heartland that uncovers deep yet hidden currents of connection with the world When Kristin L Hoganson arrived in Champaign Illinois after teaching at Harvard studying at Yale and living in the D C metro area with various stints overseas she expected to find her new home well isolated Even provincial After all she had landed in the American heartland a place where the nation s identity exists in its pristine form Or so we have been taught to believe Struck by the gap between reputation and reality she determined to get to the bottom of history and myth The deeper she dug into the making of the modern heartland the wider her story became as she realized that she d uncovered an unheralded crossroads of people commerce and ideas But the really interesting thing Hoganson found was that over the course of American history even as the region s connections with the rest of the planet became increasingly dense and intricate the idea of the rural Midwest as a steadfast heartland became a stronger and more stubbornly immovable myth In enshrining a symbolic heart the American people have repressed the kinds

of stories that Hoganson tells of sweeping breadth and depth and soul In *The Heartland* Kristin L Hoganson drills deep into the center of the country only to find a global story in the resulting core sample Deftly navigating the disconnect between history and myth she tracks both the backstory of this region and the evolution of the idea of an unalloyed heart at the center of the land A provocative and highly original work of historical scholarship *The Heartland* speaks volumes about pressing preoccupations among them identity and community immigration and trade and security and global power And food To read it is to be inoculated against using the word heartland unironically ever again *The Quality of the Archaeological Record* Charles Perreault, 2019-09-16 Paleobiology struggled for decades to influence our understanding of evolution and the history of life because it was stymied by a focus on microevolution and an incredibly patchy fossil record But in the 1970s the field took a radical turn as paleobiologists began to investigate processes that could only be recognized in the fossil record across larger scales of time and space That turn led to a new wave of macroevolutionary investigations novel insights into the evolution of species and a growing prominence for the field among the biological sciences In *The Quality of the Archaeological Record* Charles Perreault shows that archaeology not only faces a parallel problem but may also find a model in the rise of paleobiology for a shift in the science and theory of the field To get there he proposes a more macroscale approach to making sense of the archaeological record an approach that reveals patterns and processes not visible within the span of a human lifetime but rather across an observation window thousands of years long and thousands of kilometers wide Just as with the fossil record the archaeological record has the scope necessary to detect macroscale cultural phenomena because it can provide samples that are large enough to cancel out the noise generated by micro scale events By recalibrating their research to the quality of the archaeological record and developing a true macroarchaeology program Perreault argues archaeologists can finally unleash the full contributive value of their discipline *Space, Time, and Archaeological Landscapes* Jaqueline Rossignol, LuAnn Wandsnider, 2013-11-11 The last 20 years have witnessed a proliferation of new approaches in archaeological data recovery analysis and theory building that incorporate both new forms of information and new methods for investigating them The growing importance of survey has meant an expansion of the spatial realm of traditional archaeological data recovery and analysis from its traditional focus on specific locations on the landscape archaeological sites to the incorporation of data both on site and off site from across extensive regions Evolving survey methods have led to experiments with nonsite and distributional data recovery as well as the critical evaluation of the definition and role of archaeological sites in data recovery and analysis In both survey and excavation the geomorphological analysis of landscapes has become increasingly important in the analysis of archaeological materials Ethnoarchaeology the use of ethnography to sharpen archaeological understanding of cultural and natural formation processes has concentrated study on the formation processes underlying the content and structure of archaeological deposits These actualistic studies consider patterns of deposition at the site level and the material results of human

organization at the regional scale Ethnoarchaeological approaches have also affected research in theoretical ways by expanding investigation into the nature and organization of systems of land use per se thus providing direction for further study of the material results of those systems **Archaeology in Latin America** Benjamin Alberti, Gustavo G. Politis, 2005-08-16 The first overview of current themes in Latin American archaeology written solely by archaeologists native to the region making their collected expertise available to an English speaking audience for the first time *Dry Creek* W. Roger Powers, R. Dale Guthrie, John F. Hoffecker, 2017-04-14 With cultural remains dated unequivocally to 13 000 calendar years ago Dry Creek assumed major importance upon its excavation and study by W Roger Powers The site was the first to conclusively demonstrate a human presence that could be dated to the same time as the Bering Land Bridge As Powers and his team studied the site their work verified initial expectations Unfortunately the research was never fully published Dry Creek The Archaeology and Paleoecology of a Late Pleistocene Alaskan Hunting Camp is ready to take its rightful place in the ongoing research into the peopling of the Americas Containing the original research this book also updates and reconsiders Dry Creek in light of more recent discoveries and analysis **American Indian Quarterly** , 2006 United States Penitentiary, Martin County, Kentucky , 1997 **A Delta-man in Yebu** A. K. Eyma, C. J. Bennett, 2003 A collection of papers from the Egyptologists Electronic Forum http welcome to EEF on a variety of Egyptological topics of interest to both professionals and laypersons Five broad themes may be discerned royalty in ancient Egypt scarabs and funerary items archaeology and early Egypt Egyptology past present and future and ancient Egyptian language science and religion **Plains Anthropologist** , 2003 Fantastic Archaeology Stephen Williams, 1991 A cheerful and delightful excursion into the realms of fraud hucksterism wretched excess and wishful thinking From Indiana Jones to Lost Atlantis from mysticism to Mu Williams reviews the colorful characters and misguided theories which have excited the public and exasperated mainstream archaeologists Michael Crichton Interpretation of Ceramic Artifacts Barbara J. Mills, Christine E. Goetze, María Nieves Zedeño, 1993
