reagents resolving agents nmr shift reagents and reference standards buffers gc and ms derivatisation reagents amperometric reagents titrimetric and gravimetric reagents biological stains and dyes Compounds are comprehensively indexed by Name Molecular Formula CAS Registry Number and Type of Compound The unique Type of Compound Index is particularly valuable as compounds are indexed by use eg NMR shift reagent by analyte eg nickel and by compound group eg formazan crown ether making the data accessible by a variety of criteria Thus chemists can use the dictionary to find information on how to analyze for a particular substance how a particular compound may be used as an analytical reagent or what other reagents are available for a specific analytical use Having located all appropriate reagents via the index the user can then browse through the entries to obtain specific data all fully referenced in the selective bibliography Analytical chemists be they in the manufacturing or pharmaceutical industry working in hospital laboratories as clinical chemists or pollution analysts monitoring heavy metal residues in waste water constantly need to make decisions about which reagent to choose for a particular application This dictionary fulfils that need by being the most comprehensive reliable and up to date compilation of reagents available This book should be of interest to analytical chemists in academic and industrial establishments forensic scientists chromatographers biochemists standards institutions companies selling laboratory chemicals and water authorities

Supramolecular Chemistry Vincenzo Balzani, L. de Cola, 2012-12-06 The first NATO Science Forum was held in Biarritz in September 1990 This Taormina Conference is the second in a series that we wish to be a long one and I believe that it has equalled the success of its predecessor In setting up these meetings the NATO Science Committee wanted to gather leading experts to review fields of strong present interest It was intended that presentations and discussions should pay special attention to potential developments This forward look is indeed precious to us in mapping out the evolution of our Science Programme but more importantly it is an essential part of the progress of Science I believe that NATO being able to bring together eminent scientists from both sides of the Atlantic is in a privileged position to provide this service to our Scientific Community It was only proper that Chemistry should be one of the first areas to be targeted a central science with many rich borders touching on other disciplines it deserved the full attention of our Committee In its vast domain among many possible topics the present one was carefully selected and its choice resulted from an extensive consultation of many leading chemists The large fraction of replies which pointed to Supramolecular Chemistry left us with little doubt about the timeliness of a Forum in this area and the strong interest attached to it
