Radical Functionalism Luis E. Carranza, 2021-12-27 *Radical Functionalism A Social Architecture for Mexico* provides a complex and nuanced understanding of the functionalist architecture developed in Mexico during the 1930s It carefully re reads the central texts and projects of its main advocates to show how their theories responded to the socially and culturally charged Mexican context These such as architects Juan Legarreta Juan O Gorman the Union of Socialist Architects and Manuel Am bilis were part of broader explorations to develop a modern national architecture intended to address the needs of the Mexican working classes Through their refunctioning of functionalism these radical thinkers showed how architecture could stand at the precipice of Mexico s impending modernization and respond to its impending changes The book examines their engagement and negotiation with foreign influences issues of gender and class and the separation between art and architecture Functionalist practices are presented as contradictory and experimental as challenging the role of architecture in the transformation of society and as intimately linked to art and local culture in the development of new forms of architecture for Mexico including the vernacularization of functionalism itself Uniquely including translations of two manifesto like texts by O Gorman expressing the polemical nature of their investigations *Radical Functionalism A Social Architecture for Mexico* will be a useful reference for scholars researchers and students interested in the history of architectural movements

The Routledge Handbook of Dehumanization Maria Kronfeldner, 2021-02-25 A striking feature of atrocities as seen in genocides civil wars or violence against certain racial and ethnic groups is the attempt to dehumanize to deny and strip human beings of their humanity Yet the very nature of dehumanization remains relatively poorly understood *The Routledge Handbook of Dehumanization* is the first comprehensive and multidisciplinary reference source on the subject and an outstanding survey of the key concepts issues and debates within dehumanization studies Organized into four parts the Handbook covers the following topics The history of dehumanization from Greek Antiquity to the 20th century contextualizing the oscillating boundaries dimensions and hierarchies of humanity in the history of the West How dehumanization is contemporarily studied with respect to special contexts as part of social psychology as part of legal studies or literary studies and how it connects to the idea of human rights disability and eugenics the question of animals and the issue of moral standing How to tackle its complex facets with respect to the perpetrator s and the target s perspective metadehumanization and selfdehumanization rehumanization social death status and interdependence as well as the fear we show toward robots that become too human for us Conceptual and epistemological questions on how to distinguish different forms of dehumanization and neighboring phenomena on why dehumanization appears so paradoxical and on its connection to hatred essentialism and perception Essential reading for students and researchers in philosophy history psychology and anthropology this Handbook will also be of interest to those in related disciplines such as politics international relations criminology legal studies literary studies gender studies disability

studies or race and ethnic studies as well as readers from social work political activism and public policy *Latin American Indigenous Warfare and Ritual Violence* Richard J. Chacon, Rubén G. Mendoza, 2019-04-02 This groundbreaking multidisciplinary book presents significant essays on historical indigenous violence in Latin America from Tierra del Fuego to central Mexico The collection explores those uniquely human motivations and environmental variables that have led to the native peoples of Latin America engaging in warfare and ritual violence since antiquity Based on an American Anthropological Association symposium this book collects twelve contributions from sixteen authors all of whom are scholars at the forefront of their fields of study All of the chapters advance our knowledge of the causes extent and consequences of indigenous violence including ritualized violence in Latin America Each major historical cultural group in Latin America is addressed by at least one contributor Incorporating the results of dozens of years of research this volume documents evidence of warfare violent conflict and human sacrifice from the fifteenth century to the twentieth including incidents that occurred before European contact Together the chapters present a convincing argument that warfare and ritual violence have been woven into the fabric of life in Latin America since remote antiquity For the first time expert subject area work on indigenous violence archaeological osteological ethnographic historical and forensic has been assembled in one volume Much of this work has heretofore been dispersed across various countries and languages With its collection into one English language volume all future writers regardless of their discipline or point of view will have a source to consult for further research

the time they were also dealt with in the field of canon law Both ecclesiology which studied the internal structure of the Church and heresiology which identified theological errors played an important role in shaping ideas debates and decisions concerning the major political and religious problems of the late medieval and early modern periods In contrast to the conventional monolithic view of Spanish Catholic thought on ecclesiastical matters the chapters in this book demonstrate that there was a wide spectrum of ideas in the field of theology and canon law The topics analyzed include Church and Crown relations diplomatic controversies doctrinal debates on slavery ecclesiological disputes in dialogue with the Council of Trent and theories for distinguishing heresies and repressing them This book will be essential reading for those interested in disciplines such as Church history political history and the history of political and legal thought **The Ubiquitin Code**

Wolfe,2017-06-22 In *Watering the Revolution* Mikael D Wolfe transforms our understanding of Mexican agrarian reform through an environmental and technological history of water management in the emblematic Laguna region Drawing on extensive archival research in Mexico and the United States Wolfe shows how during the long Mexican Revolution 1910 1940 engineers distribution of water paradoxically undermined land distribution In so doing he highlights the intrinsic tension engineers faced between the urgent need for water conservation and the imperative for development during the contentious modernization of the Laguna s existing flood irrigation method into one regulated by high dams concrete lined canals and motorized groundwater pumps This tension generally resolved in favor of development which unintentionally diminished and contaminated the water supply while deepening existing rural social inequalities by dividing people into water haves and have nots regardless of their access to land By uncovering the varied motivations behind the Mexican government s decision to use invasive and damaging technologies despite knowing they were ecologically unsustainable Wolfe tells a cautionary tale of the long term consequences of short sighted development policies *Diet,*

Nutrition, and Foodways on the North Coast of Peru Bethany L. Turner, Haagen D. Klaus, 2020-06-17 This book synthesizes in depth bioarchaeological research into diet subsistence regimes and nutrition and corresponding insights into adaptation suffering and resilience among indigenous north coastal Peruvian communities from early agricultural through European colonial periods The Spanish invasion and colonization of Andean South America left millions dead landscapes transformed and traditional ways of life annihilated However the nature and magnitude of these changes were far from uniform By the time the Spanish arrived over four millennia of complex societies had emerged and fallen and in the 16th century the region was home to the largest and most expansive indigenous empire in the western hemisphere Decades of Andean archaeological and ethnohistorical research have explored the incredible sophistication of regional agropastoral traditions the importance of food and feasting as mechanisms of control and the significance of maritime economies in the consolidation of complex polities Bioarchaeology is particularly useful in studying these processes Beyond identifying what resources were available and how they were prepared bioarchaeological methods provide unique opportunities and humanized perspectives to reconstruct what individuals actually ate and whether their diets changed within their own lifespans *California Compensation Cases*, 1969 **Forgotten Peace** Robert A. Karl, 2017 *Forgotten Peace* examines Colombian society's attempt to move beyond the Western Hemisphere's worst mid century conflict and how that effort molded notions of belonging and understandings of the past In this book Robert A Karl reconstructs encounters between government officials rural peoples provincial elites and urban intellectuals during a crucial conjuncture that saw reformist optimism transform into alienation In addition to offering a sweeping reinterpretation of Colombian history including the most detailed account of the origins of the FARC insurgency in any language Karl provides a Colombian vantage on global processes of democratic transition development and memory formation in the 1950s and 1960s Sweeping in scope *Forgotten Peace* challenges contemporary theories of violence in Latin America Provided by publisher **Dynamic Sedimentary Environments of Mangrove Coasts** Daniel Friess, Frida Sidik, 2020-12-05 *Dynamic Sedimentary Environments of Mangrove Coasts* provides knowledge on the importance of sedimentary dynamics in managing mangrove forests In the first part of the book the editors seamlessly offer a general introduction of mangrove sedimentary dynamics This leads into more in depth information on soil surface elevation change sea level rise and the importance of sedimentary dynamics in the loss or gain of blue carbon The book concludes the discussion of mangrove sedimentary dynamics by addressing the issues of climate change e.g sea level rise and blue carbon on mangrove restoration and sediment This book will assist coastal managers and academics in addressing the gaps in mangrove restoration and coastal management As such it will be a valuable reference for advanced undergraduate students graduate students researchers academics in the field of coastal restoration and coastal management practitioners Provides a state of the art summary of research into sedimentary dynamics in mangrove forests Includes updates on issues of climate change relevant to mangroves such as blue carbon and sea level rise Presents scientific

background and successful case studies for mangrove restoration that can solve problems relating to mangrove management
