Biermann, Louise S. Grinstein, Rose K. Rose, 1997-07-16 Biology textbooks and books on the history of science generally give a limited picture of the roles women have played in the growth and development of the biological sciences mentioning primarily the Nobel laureates This book provides a definitive archival collection of essays on a larger group of women profiling both their work and their lives The volume includes 65 representative women from different countries and eras and from as many branches of biological investigation as possible In addition to biographical information and an evaluation of the woman's career and significance each entry provides a full bibliographic listing of works by and about the subject The volume includes entries on women who have gained recognition through attainment of advanced degrees despite familial and societal pressures innovative research results influence exerted in teaching and guidance of students active participation and leadership in professional societies extensive scholarly publication participation on journal editorial boards extensive field experience and influence on public and political scientific policymaking A woman was considered eligible for inclusion if she met several of these criteria Providing a historical perspective the book is limited to women who were born before 1930 or are deceased **Humanities** ,2006 School Arts Magazine ,1911 *Interpreting Landscapes* Christopher Tilley, 2016-06-03 This book takes a new approach to writing about the past Instead of studying the prehistory of Britain from Mesolithic to Iron Age times in terms of periods or artifact classifications Tilley examines it through the lens of their geology and landscapes asserting the fundamental significance of the bones of the land in the process of human occupation over the long dur e Granite uplands rolling chalk downlands sandstone moorlands and pebbled hilltops each create their own potentialities and symbolic resources for human settlement and require forms of social engagement Taking his findings from years of phenomenological fieldwork experiencing different landscapes with all senses and from many angles Tilley creates a saturated and historically imaginative account of the landscapes of southern England and the people who inhabited them This work is also a key theoretical statement about the importance of landscapes for human settlement *Annual Report of the Department of the Interior* United States.
