amongst US officers that troops normally considered behind the lines personnel might have to fight elite German troops and would therefore require a more effective weapon than their standard pistols The resulting M1 Carbine was a not a shortened version of the standard service rifle but instead a brand new design chambering a new cartridge Eventually numerous manufacturers would combine to produce over six million M1 Carbines before the end of the war This book charts the complete story of the weapon from its design to its operational history and its impact upon warfare Daily Life of U.S. Soldiers Christopher R.
