Many current and aspiring entrepreneurs are looking for a solid business education that also deeply aligns with their progressive values. Based on a course field tested with over 500 students this book fills that gap. It covers traditional topics such as business strategy and structure finance marketing recruiting and branding from a socially just and environmentally regenerative perspective. And it also touches on topics such as strategies to reverse climate change nonviolent communication self managing organizations locally self reliant economies racial justice and more. Traditional MBA programs are based on outdated principles that were developed during the Industrial Revolution and they can be hugely expensive. Sustainable MBA programs while laudable are too incremental to make a sufficient impact. The Next Economy MBA is for entrepreneurs seeking to make business an active force for good. It draws on the authors experience of working with over 300 social enterprises from small organizations like Winona's Hemp

and Heritage Farm to household names like Ben Jerry's and Patagonia. Our current economy, what the authors call the Business as Usual Economy, has created a massive wealth gap, a climate crisis, racial division, and needless housing, food, and healthcare shortages. This book shows how businesses can pave the way to a Next Economy that meets the basic needs of all people and restores and protects the planetary ecosystem.

**The Power of Employee Resource Groups** Farzana Nayani, 2022-06-07. This is the first authoritative book on building employee resource groups (ERGs) to empower underrepresented employees and positively impact diversity, equity, and inclusion (DEI) efforts within organizations and in society at large. In existence for decades, ERGs originated out of affirmative action policies and have evolved into powerful sources of employee activity and engagement. Organizations can leverage ERGs to support business goals, but ERGs can also play a critical role in creating a more inclusive work environment for marginalized individuals. ERGs represent a balance of serving company interests and empowering employees, offering the opportunity for innovative leadership within organizations. This book is a practical guide on how to manage ERGs effectively and how they inspire a deeper connection between employees and companies while helping us progress toward the DEI goals that we aim to accomplish. Participating in an ERG can help professionals of color and other historically excluded groups advance their careers, thereby increasing diverse representation in leadership. Farzana Nayani provides foundational tools for starting ERGs and outlines the five Ps: purpose, people, processes, planning, and priorities needed to successfully operate them. Unlike other ERG handbooks, this book is people-centric and socially conscious and thoughtfully takes into account the experiences of employees and leaders during current times. It also serves as a deeper call to action around how ERGs can foster authentic change within organizations, creating transformative impact in the surrounding world.

Tindall,2016-03-10 While public relations practitioners have long focused on the relationship between organizations and their stakeholders there has never been a time when that relationship was so dominated by public participation The new model of multiple messages originating from multiple publics at varying levels of engagement is widely acknowledged but not widely explored in scholarly texts The established model of one way communication and message control no longer exists Social media and an increasingly participatory culture means that fans are taking a more active role in the production and co creation of messages communication and meaning These fans have significant power in the relationship dynamic between the message the communicator and the larger audience yet they have not been defined using current theory and discourse Our existing conceptions fail to identify these active and engaged publics let alone understand virtual communities who are highly motivated to communicate with organizations and brands This innovative and original research collection attempts to address this deficit by exploring these interactive engaged

publics and open up the complexities of establishing and maintaining relationships in fan created communities
