Prototyping which were held on July 21-25 2018 in Orlando Florida USA European Robotics Forum 2024 Cristian Secchi, Lorenzo Marconi, 2024-12-31 This book collects the scientific contributions presented at the European Robotics Forum ERF 2024 that is the reference event for the EuRobotics association In the months leading up to the forum a direct call was launched to the many industrial players who are members of EuRobotics and who were asked to specify particularly important areas of development according to their roadmap The outcome of this survey and the topics of the Workshops held during the forum have been used to calibrate an industry driven scientific program where research objectives meet industrial needs The contributions collected in the book cover a wide spectrum of robotics research encompassing mechatronics algorithms Artificial Intelligence Human Robot Collaboration and many robotic applications *Advances in Pattern Recognition - ICAPR 2001* Sameer Singh, Nabeel Murshed, Walter Kropatsch, 2003-06-29 The paper is organized as follows In section 2 we describe the no orientation discontinuity interfering model based on a Gaussian stochastic model in analyzing the properties of the interfering strokes In section 3 we describe the improved canny edge detector with an edge orientation constraint to detect the edges and recover the weak ones of the foreground words and characters In section 4 we illustrate discuss and evaluate the experimental results of the proposed method demonstrating that our algorithm significantly improves the segmentation quality Section 5 concludes this paper 2 The norm orientation discontinuity interfering stroke model Figure 2 shows three typical samples of original image segments from the original documents and their magnitude of the detected edges respectively The magnitude of the gradient is converted into the gray level value The darker the edge is the larger is the gradient magnitude It is obvious that the topmost strong edges correspond to foreground edges It should be noted that while usually the foreground writing appears darker than the background image as shown in sample image Figure 2 a there are cases where the foreground and background have similar intensities as shown in Figure 2 b or worst still the background is more prominent than the foreground as in Figure 2 c So using only the intensity value is not enough to differentiate the foreground from the background a b c d e f **Examining Optoelectronics in Machine Vision and Applications in Industry 4.0** Sergiyenko, Oleg, Rodriguez-Quinonez, Julio C., Flores-Fuentes, Wendy, 2021-02-12 The research and exploitation of optoelectronic properties in the industrial branch of electronics is becoming more popular each day due to the important role they play in the development of a large variety of sensors devices and systems for identifying measuring and constructing While optoelectronics study the applications of electronic devices that source detect and transform light machine vision generates and detects light in order to provide imaging based automatic inspections and analysis for such applications as automatic object and environmental inspection process control and robot mobile machine guidance in industry Machine vision is less efficient without optoelectronics and thus it is important to investigate the theoretical approaches to different optoelectronic devices available for machine vision as well as current scanning technologies Examining Optoelectronics in Machine Vision and Applications in Industry 4.0 focuses on the examination of

emerging technologies for the design fabrication and implementation of optoelectronic sensors devices and systems in a machine vision approach to support industrial commercial and scientific applications The book covers topics such as the design fabrication and implementation of sensors and devices as well as the development viewpoint of optoelectronic systems and artificial vision techniques using optoelectronic devices The interaction and informational communication between all these mentioned devices in the complex solution of the same task is the subject of modern challenges in Industry 4 0 Thus this book supports engineers technology developers academicians researchers and students who seek machine vision techniques for detection measurement and 3D reconstruction
