Macromolecular Structure and Specificity B. Venkataraghavan, R. J. Feldmann, 1985 **Macromolecular Structure and Specificity** Babu Venkataraghavan, 1985 Physical and Chemical Mechanisms in Molecular Radiation Biology William A. Glass, Matesh N. Varma, 2012-12-06 The fundamental understanding of the production of biological effects by ionizing radiation may well be one of the most important scientific objectives of mankind such understanding could lead to the effective and safe utilization of the nuclear energy option In addition this knowledge will be of immense value in such diverse fields as radiation therapy and diagnosis and in the space program To achieve the above stated objective the U S Department of Energy DOE and its predecessors embarked upon a fundamental interdisciplinary research program some 35 years ago A critical component of this program is the Radiological and Chemical Physics Program RCPP When the RCPP was established there was very little basic knowledge in the fields of physics chemistry and biology that could be directly applied to understanding the effects of radiation on biological systems Progress of the RCPP program in its first 15 years was documented in the proceedings of a conference held at Airlie Virginia in 1972 At this conference it was clear that considerable progress had been made in research on the physical and chemical processes in well characterized systems that could be used to understand biological effects During this period of time most physical knowledge was obtained for the gas phase because the technology and instrumentation had not progressed to the point that measurements could be made in liquids more characteristic of biological materials Molecular Biology of Neuroreceptors and Ion Channels Alfred Maelicke, 2013-06-29 This workshop was the second of this series held on the island of Santorini in the Cycladic Sea The first one Mechanism of Action of the Nicotinic Acetylcholine Receptor NATO ASI Series H vol 10 took place in May 1986 and focused on what was at the time the best studied of all neuroreceptors This second one held only two years later demonstrates the immense progress achieved since then in the field of neuroreceptors and ion channels Molecular cloning techniques have now made available the primary structures of a whole array of ion channel proteins and this in turn has shed light on some general principles of the structure function relationships of these central elements of intercellular communication The purpose of this workshop was to explore the common elements in gene and protein structure of already cloned ion channel proteins and to assess the status of other cloning projects in progress It explicitly focused on very recently published and unpublished results All participants kept to these goals thereby demonstrating the very value of such workshops for the progress of science *Cumulated Index Medicus*, 1985 *Handbook of Chemical and Biological Sensors* R.F Taylor, Jerome S. Schultz, 1996-01-01 The Handbook of Chemical and Biological Sensors focuses on the development of sensors to recognize substances rather than physical quantities This fully inclusive book examines devices that use a biological sensing element to detect and measure chemical and biological species as well as those that use a synthetic element to achieve a similar result A first port of call for anyone with a specific interest question or problem relating to this

area this comprehensive source of reference serves as a guide for practicing scientists and as a text for many graduate courses It presents relevant physics to chemists chemistry to materials scientists materials science to electronic engineers and fabrication technology to all of the above In addition the handbook is useful both to newcomers and to experienced researchers who wish to broaden their knowledge of the constituent disciplines of this wide ranging field Steric Aspects Of Biomolecular Interactions G.Naray- Naray-Szabo,2018-01-18 The present volume deals with the application of the following techniques computational chemistry X ray diffraction and two dimensional nuclear magnetic resonance The book will discuss how these methods can be used to study steric aspects of biomolecular interactions **The Melanotropic Peptides** M.E. Hadley,2018-01-18 The three volumes on The Melanotropic Peptides are the outcome of a conference of the same name that was held in Tucson Arizona from October 11 12 1986 Volume III discusses the known mechanisms of action of the two melanotropic peptides and concludes with a discussion of the possible biomedical applications of the melanotropins **Current Catalog** National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1988
