*Emotions in Digital Interactions* Irene Rafanell,Maja Sawicka,2019-07-16 Combining the conceptual tools of interactionist and social constructionist positions this book presents an in depth investigation of emotions in digital interactions Through the central case study of online bereavement communities for women who have suffered perinatal loss this volume highlights the significance of affective sanctioning as constitutive of group dynamics and practice The authors chart the emergence of a new ethnopsychology of motherhood the category of Angels Mothers arising from the localized practices of a community whose experience of grief is otherwise disenfranchised Through their detailed theoretical exploration of the centrality of micro situational dynamics alongside the rich empirical illustration of collectively shared feeling rules and norms Rafanell and Sawicka develop a naturalistic approach to the analysis of empirical data providing insights for policy making interventions

*Questioning Qualitative Inquiry* Martyn Hammersley,2008-07-10 Is qualitative research in crisis In Questioning Qualitative Inquiry Martyn Hammersley raises fundamental questions about the current state of qualitative social research He examines some of the changes that have taken place within it over the past fifty years suggesting that the move away from natural science as a model and towards an appeal to literature and art involves rejection of key principles that are essential to research of any kind Hammersley argues that in important respects qualitative inquiry has not lived up to the claims originally made on its behalf and that more recent developments have worsened the situation

Insufficient attention has been given to the problems surrounding leading ideas like thick description analytic induction and constructionism The argument is pursued through discussion of the work of influential writers such as Clifford Geertz Denzin and Lincoln and by detailed examination of concrete issues like the value of interview data the rationales for discourse and conversation analysis the role of rhetoric in research reports and the nature of assessment criteria At a time when qualitative inquiry is coming under renewed challenge in some quarters the task of addressing the methodological problems it faces has become urgent These essays on current developments and debates are essential reading for anyone interested in the future of qualitative research

**Iberian Trade Unionism** Jose Magone, 2018-01-16 One of the most neglected areas of the European integration process is the role that trade union confederations may play after the full establishment of the Economic and Monetary Union The gradual establishment of the four freedoms enshrined in the Single European Act would require a transformation of the present strategies of trade union confederations toward more flexibility and towards the ability to take part in different levels of the European integration process Iberian Trade Unionism highlights the emerging patterns of cooperation between national subnational and supranational actors and the impact on these different levels Unlike most literature on the study of democratization and Europeanization Iberian Trade Unionism aims to break the dominant focus on political parties and political institutions by raising awareness of the importance of interest groups such as trade union confederations in contributing to a strengthening of democratic governance The central thesis is that both Portuguese and Spanish trade unions are becoming increasingly part of a transnational European strategy which shapes the internal organizations toward professionalism and democratization Part 1 Contextualizing Iberian Trade Union Strategies deals with the operations of both Portuguese and Spanish trade union confederations Part 2 The National Systems of Interest Intermediation and Trade Union Confederation Strategies analyzes the transformation of the national systems of intermediation in the 1990s which were affected by a decline in steering power of Spanish and Portuguese political systems vis a vis global and European political and economic processes Part 3 Subnational and Transnational Policies of Iberian Trade Union Confederations deals with policies and strategies The last chapter treats the integration of Iberian trade union confederations in the institutions of the European Union as well as the ITUCs and is based on original research done in Madrid Lisbon and Brussels This timely look at interest groups and lobbying in the European Union will appeal to scholars studying European integration and the role of interest groups in it and to students of Spain Portugal or southern Europe

**Critical Issues in Social Theory** John K. Rhoads, 2010-11-01 Critical Issues in Social Theory is an analytical survey of persistent controversies that have shaped the field of sociology It defines clarifies and proposes solutions to these critical issues through commentary on the writings of such influential social theorists as Hobbes Marx Durkheim Weber Mead Merton Parsons and Schutz Instead of being just another history or another classification of theories Rhoads's four part model allows him to focus attention on issues that remain at the core of sociological theory today First Rhoads analyzes the

controversy over positivism as the proper methodological model for the study of human society Is there one science of which sociology is a branch or do the peculiarities of sociology's subject matter require a modification of the scientific method borrowed from the natural sciences Rhoads next considers the relationship of individuals to society and its structures Does society have a mode of existence distinct from its members or is it merely an abstraction derived from the characteristics of individuals Third a discussion of social order raises the question of whether social order is the consequence of rules and their underlying moral values or the product of continuous construction based on self interest Finally the relative importance of consensus and conflict in social relationships is addressed Is society better understood as a community united by beliefs values and rules or is the social dynamic of continual conflict over beliefs values and rules more fundamental In coming to grips with these issues the author in some instances takes sides and in others arrives at a synthesis of diverse perspectives In the final chapter he points to the limitations on the possibility of rational action that come to light in the clashes over these basic issues

*Rethinking State Theory* Mark J Smith, Mark J. Smith, 2013-10-11 In the last two decades objects of analysis such as the state have increasingly been seen as uncertain and contested theoretical concepts Mark J Smith presents a counter argument that highlights how existing theoretical approaches can provide useful tools for understanding contemporary political developments

The Social Construction of Public Administration Jong S. Jun, 2012-02-01 In this conceptual guided tour of contemporary public administration Jong S Jun challenges the limitations of the discipline which he argues make it inadequate for understanding today's complex human phenomena Drawing on examples and case studies from both Eastern and Western countries he emphasizes critical and interpretive perspectives as a counterforce to the instrumental technical rationality that reduces the field to structural and functionalist views of management He also emphasizes the idea of democratic social construction to transcend the field's reliance on conventional pluralist politics Jun stresses that public administrators and institutions must create opportunities for sharing and learning among organizational members and must facilitate interactive processes between public

administrators and citizens so that the latter can voice their problems and opinions The future role of public administrators will be to transcend the limitations of the management and governing of modern public administration and to explore ways of constructing socially meaningful alternatives through communicative action and the participation of citizens

On Interpretative Activity Noel Boultong, 2006-10-01 Using the ideas of the American scientist and philosopher Charles Sanders Peirce three conceptions of interpretation can be distinguished the Iconic the Indexical and the Intellective This trichotomy is based on Peirce's use of his sign theory and his logic of scientific discovery The Iconic captures what is valuable in itself for an individual interpreter as opposed to the Indexical which is available for public appreciation as an outcome beyond Interpretative activities The Intellective extends the Iconic to include the interpretative activities of groups of interpreters employing appropriate methods of inquiry in a more rigorous and rational way Such distinctions can be used in confronting certain problems in science technology and the arts
