Introduction to Clinical Skills Mark B. Mengel, Scott A. Fields, 2007-08-19 This practical text is an excellent introduction to the clinical skills all physicians particularly those in primary care disciplines need to treat their patients in a humane fashion and at a reasonable cost The authors focus on patient centered or generalist skills that will help the biomedically oriented physician become more comfortable in managing patient care situations In addition the chapters review the diagnostic treatment and technical skills that medical students encountered in their Introduction to Clinical Medicine or Physical Diagnosis courses The book's clinical cases will stimulate class discussions and provide vignettes for skills practice

Making the Estrogen Decision Susan M. Lark, 1996

Therapeutics, Evidence and Decision-Making Michael D Rawlins, 2011-07-29 This book is intended to help decision makers use assess and appraise the evidence that underpins decisions about the use of therapeutic interventions It will inform decision makers about the nature of evidence the strengths and weaknesses of the available approaches and how these can be most effectively distilled for the purpose of reaching reliable conclusions It aims to encourage decision makers to base their judgements about the use of therapeutic interventions on an informed appraisal of the totality of the evidence base Is it reliable Is it generalisable beyond the context of the environment in which the primary research has been conducted Do the intervention's benefits outweigh its harms Is it cost effective as well as clinically effective Is it indeed fit for purpose Ultimately good judgement is at the heart of decision making in therapeutics An invaluable text for all physicians pharmacists nurses health commissioners and purchasers and indeed anyone having to make decisions concerning evidence based therapeutics

Learning in Medical School John I. Balla, Margaret Gibson, Anne M. Chang, 1989-10-01 The purpose of this book is to develop the beginnings of a suitable theoretical framework for medical education which could be taken as a model for education in the other clinical professions It should therefore prove relevant to those who teach in nursing or other allied health professions where two of the editors come from All the contributors have an impressive record of achievement in educational research and a wide range of publications The book is aimed at the expert but the clear expository style of the authors will make this suitable reading for the relative novice in the field
