**Making the World Global** Isaac A. Kamola, 2019-06-07 Following World War II the American government and philanthropic foundations fundamentally remade American universities into sites for producing knowledge about the world as a collection of distinct nation states As neoliberal reforms took hold in the 1980s visions of the world made popular within area studies and international studies found themselves challenged by ideas and educational policies that originated in business schools and international financial institutions Academics within these institutions reimagined the world instead as a single global market and higher education as a commodity to be bought and sold By the 1990s American universities embraced this language of globalization and globalization eventually became the organizing logic of higher education In *Making the World Global* Isaac A. Kamola examines how the relationships among universities the American state philanthropic organizations and international financial institutions created the conditions that made it possible to imagine the world as global Examining the Center for International Studies Harvard Business School the World Bank the Social Science Research Council and NYU Kamola demonstrates that how we imagine the world is always symptomatic of the material relations within which knowledge is produced

Pacific America Lon Kurashige, 2017-07-31 In recent times the Asia Pacific region has far surpassed Europe in terms of reciprocal trade with the United States and since the 1980s immigrants from Asia entering the United States have exceeded their counterparts from Europe reversing a longstanding historical trend and making Asian Americans the country's fastest growing racial group What does transpacific history look like if the arc of the story is extended to the present The essays in this volume offer answers to this question challenging current assumptions about transpacific relations Many of these assumptions are expressed through fear that the ascendance of China threatens a U S led world system and undermines domestic economies that immigrants subvert national unity and that globalization for all its transcending of international cultural and racial differences generates its own forms of prejudice and social divisions that reproduce global and national inequalities The contributors make clear that these fears associated with and induced by pacific integration are not new Rather they are the most recent manifestation of international racial and cultural conflicts that have driven transpacific relations in its premodern and especially modern iterations Pacific America differs from other books that are beginning to flesh out the transnational history of the Pacific Ocean in that it is more self consciously a people's history While diplomatic and economic relations are addressed the chapters are particularly concerned with histories from the bottom up including attention to social relations and processes individual and group agency racial and cultural perception and collective memory These perspectives are embodied in the four sections focusing on China and the early modern world circuits of migration and trade racism and imperialism and the significance of Pacific islands The last section on Pacific Islanders avoids a common failing in popular perception that focuses on both sides of the Pacific Ocean while overlooking the many islands in between The chapters in this section take on one of the key challenges for transpacific history in connecting the migration and imperial histories of the United States Japan China Korea Vietnam and other nations with the history of Oceania

*For God and Globe* Michael G.

Thompson, 2016-02-19 *For God and Globe* recovers the history of an important yet largely forgotten intellectual movement in interwar America Michael G Thompson explores the way radical left and ecumenical Protestant internationalists articulated new understandings of the ethics of international relations between the 1920s and the 1940s Missionary leaders such as Sherwood Eddy and journalists such as Kirby Page as well as realist theologians including Reinhold Niebuhr developed new kinds of religious enterprises devoted to producing knowledge on international relations for public consumption *For God and Globe* centers on the excavation of two such efforts the leading left wing Protestant interwar periodical *The World Tomorrow*

and the landmark Oxford 1937 ecumenical world conference Thompson charts the simultaneous peak and decline of the movement in John Foster Dulles's ambitious efforts to link Christian internationalism to the cause of international organization after World War II Concerned with far more than foreign policy Christian internationalists developed critiques of racism imperialism and nationalism in world affairs They rejected exceptionalist frameworks and eschewed the dominant Christian nation imaginary as a lens through which to view U S foreign relations In the intellectual history of religion and American foreign relations Protestantism most commonly appears as an ideological ancillary to expansionism and nationalism For God and Globe challenges this account by recovering a movement that held Christian universalism to be a check against nationalism rather than a boon to it *Education and the Cultural Cold War in the Middle East* Mahdi Ganjavi, 2023-01-26 WINNER OF THE 2023 MIDDLE EAST LIBRARIANS ASSOCIATION BOOK AWARD The Franklin Book Programs FBP was a private not for profit U S organization founded in 1952 during the Cold War and was subsidized by the United States government agencies as well as private corporations The FBP was initially intended to promote U S liberal values combat Soviet influence and to create appropriate markets for U S books in Third World of which the Middle East was an important part but evolved into an international educational program publishing university textbooks schoolbooks and supplementary readings In Iran working closely with the Pahlavi regime its activities included the development of printing publishing book distribution and bookselling institutions This book uses archival sources from the FBP US intelligence agencies and in Iran to piece together this relationship Put in the context of wider cultural diplomacy projects operated by the US it reveals the extent to which the programme shaped Iran's educational system Together the history of the FBP its complex network of state and private sector the role of U S librarians publishers and academics and the joint projects the FBP organized in several countries with the help of national ministries of education financed by U S Department of State and U S foundations sheds new light on the long history of education in imperialist social orders in the context here of the ongoing struggle for influence in the Cold War U.S. Power and the Social State in Brazil Júlio Cattai, 2021-12-29 The book analyzes the elite led efforts to transform the Brazilian legal order in the period between 1930 1975 and how U S Power played a major role in such a process Besides the global circulation of ideas the book discusses the Brazilian institutional development in the period A profound Crisis of Civilization marked the first decades of the century the references of space and time vanished with the vertiginous expansion of cities and industries while a myriad of immigrants and former slaves were alleged to be threatening the country's traditions Brazilian elites blamed liberalism for such a Crisis Based on a decade of research this book centralizes Brazilian history in liberalism and offers a genealogy of the jurisprudential and institutional struggles to correct the culture of laissez faire Using archival sources it shows the direct U S influence on Brazilian thought and development Recasting the history of legal ideas in the 20th century and providing novel interpretations on major political processes it offers a rigorous and fresh look at the development of liberalism in the country Covering five decades of
