the text to life in the reader's imagination. In detailed interpretations of British novels of the 1980s and 1990s by writers such as John Berger, John Banville, Salman Rushdie, Jeanette Winterson or J. M. Coetzee, it uncovers literary strategies for turning the sensuous experience into words and for conveying it to the reader, demonstrating how we make sense in and of literature. Both readers interested in the contemporary novel and in the sensuousness of the reading experience will profit from this innovative study that not only analyses the interest of contemporary authors in the senses but also pinpoints literary entry points for the sensuous force of reading.

*Making Sense Of The Senses* Tobias Wibble, 2022-06-09. *Making Sense of the Senses* provides an easily understandable and engaging overview of the senses. The book allows readers insights into how humans and other animals perceive the world, reflecting a level of knowledge similar to that acquired by studying neuroscience at an undergraduate level. In order to offer an accessible introduction to the science, it uses relatable examples to uncover the history, evolution and biological principles of the way we see, smell, hear, taste, touch and more. Rather than only focusing on the five primary senses, you can see on the cover. *Making Sense of the Senses* dives deep into the various methods through which life across the planet surveys the world and guides the reader through the lesser known methods through which we humans interpret our surroundings. In this way, we come across some amazing abilities that we often forget we possess. Humans are nevertheless rather average creatures compared to many sensory specialists. So when we compare our relatively modest capabilities to those of other species across the animal kingdom, we are forced to yield our anthropocentric sense of supremacy. This book will introduce how biological life developed the capacity to detect magnetic fields, radioactivity and many more phenomena that until recently were inaccessible to humans. By contextualising and comparing how the senses operate, this book covers the sensory systems in a way no popular science book has previously done. If you are starting your career in neuroscience or simply want to learn more about the ways our biology guides us through life, *Making Sense of the Senses* will change the way you think about our perception of the world.

Rhetorical Touch argues for an understanding of touch as a rhetorical art by approaching the sense of touch through the kinds of bodies and minds that rhetorical history and theory have tended to exclude In resistance to a rhetorical tradition focused on shaping able bodies and neurotypical minds Shannon Walters explores how people with various disabilities psychological cognitive and physical employ touch to establish themselves as communicators and to connect with disabled and nondisabled audiences In doing so she argues for a theory of rhetoric that understands and values touch as rhetorical Essential to her argument is a redefinition of key concepts and terms the rhetorical situation rhetorical identification and the appeals of ethos character pathos emotion and logos logic or message By connecting Empedoclean and sophistic theories to Aristotelian rhetoric and Burkean approaches Walters s methods mobilize a wide range of key figures in rhetorical history and theory in response to the context of disability Using Empedocles tactile approach to logos Walters shows how the iterative writing processes of people with psychological disabilities shape crucial spaces for identification based on touch in online and real life spaces Mobilizing the touch based properties of the rhetorical practice of m tis Walters demonstrates how rhetors with autism approach the crafting of ethos in

generative and embodied ways Rereading the rhetorical practice of kairos in relation to the proximity between bodies Walters demonstrates how writers with physical disabilities move beyond approaches of pathos based on pity and inspiration The volume also includes a classroom based exploration of the discourses and assumptions regarding bodies in relation to haptic or touch based technologies Because the sense of touch is the most persistent of the senses Walters argues that in contexts of disability and in situations in which people with and without disabilities interact touch can be a particularly vital instrument for creating meaning connection and partial identification She contends that a rhetoric thus reshaped stretches contemporary rhetoric and composition studies to respond to the contributions of disabled rhetors and transforms the traditional rhetorical appeals and canons Ultimately Walters argues a rhetoric of touch allows for a richer understanding of the communication processes of a wide range of rhetors who use embodied strategies

**Touching the Unreachable** Fusako Innami, 2025-09-30 Fusako Innami offers the first comprehensive study of touch and skinship relationality with the other through the skin in modern Japanese writing The concept of the unreachable that is the lack of characters complete ability to touch what they try to reach for provides a critical intervention on the issue of intimacy Touch has been philosophically addressed in France but literature is an effective or possibly the most productive venue for exploring touch in Japan as literary texts depict what the characters may be concerned with but may not necessarily say out loud Such a moment of capturing the gap between the felt and the said the interaction between the body and language can be effectively analyzed by paying attention to layers of verbalization or indeed translation by characters utterances authors depictions and readers interpretations Each of the writers discussed

in this book starting with Nobel prize winner Kawabata Yasunari Tanizaki Jun ichir Yoshiyuki Junnosuke and Matsuura Rieko presents a particular obsession with objects or relationality to the other constructed via the desire for touch In Touching the Unreachable phenomenological and psychoanalytical approaches are cross culturally interrogated in engaging with literary touch to constantly challenge what may seem like the limit of transferability regarding concepts words and practices The book thereby not only bridges cultural gaps beyond geographic and linguistic constraints but also aims to decentralize a Eurocentric hegemony in its production and use of theories and brings Japanese cultural and literary analyses into further productive and stimulating intellectual dialogues Through close readings of the authors treatment of touch Innami develops a theoretical framework with which to examine intersensorial bodies interacting with objects and the environment through touch
