Making Truth Metaphor In Science:

Making Truth Theodore L. Brown, 2003 A new perspective on how scientists reason about the world design and interpret experiments and communicate with one another and with the larger society outside science **Making Truth**, 2002

How Metaphors Guide, Teach and Popularize Science Anke Beger, Thomas H. Smith, 2020-04-22 Metaphors are essential to scientists themselves and strongly influence science communication Through careful analyses of metaphors actually used in science texts recordings and videos this book explores the essential functions of conceptual metaphor in the conduct of science teaching of science and how scientific ideas are promoted and popularized With an accessible introduction to theory and method this book prepares scientists science teachers and science writers to take advantage of recent shifts in metaphor theories and methods Metaphor specialists will find theoretical issues explored in studies of bacteriology cell reproduction marine biology physics brain function and social psychology We see the degree of conscious or intentional use of metaphor in shaping our conceptual systems and constraining inferences Metaphor sources include social structure embodied experience abstract or mathematical formulations The results are sometimes innovative hypotheses and robust conclusions other times pedagogically useful if inaccurate stepping stones or at worst misleading fictions As of January 2023 this e book is freely available thanks to the support of libraries working with Knowledge Unlatched **Understanding**

Metaphors in the Life Sciences Andrew S. Reynolds, 2022-04-28 Introduces the diverse roles metaphors play in the life sciences and highlights their significance for theory communication and education *Metaphors and Analogies in Sciences and Humanities* Shyam Wuppuluri, A. C. Grayling, 2022-05-30 In this highly interdisciplinary volume we systematically study the role of metaphors and analogies in mis shaping our understanding of the world Metaphors and Analogies occupy a prominent place in scientific discourses as they do in literature humanities and at the very level of our thinking itself But when misused they can lead us astray blinding our understanding inexorably How can metaphors aid us in our understanding of the world What role do they play in our scientific discourses and in humanities How do they help us understand and skillfully deal with our complex socio political scenarios Where is the dividing line between their use and abuse Join us as we explore some of these questions in this volume **Models and Metaphors as Research Tools in Science** Pawel

Zeidler, 2013 The analysis of actual practice of scientific research within contemporary methodology and philosophy of science demonstrates the central role played by models and metaphors This book puts forward an analysis of the basic reasons for this breakthrough and points to the major consequences that resulted from it both for scientific practice and for the methodological and philosophical reflection on these practices Series Development in Humanities Vol 10 **Global**

Rhetorics of Science Lynda C. Olman, 2023-09-01 With this volume the field of rhetoric of science joins its sister disciplines in history and philosophy in challenging the dominance of Euro American science as a global epistemology The discipline of rhetoric understands world making and community building as interdependent activities that is if we practice science

differently we do politics differently and vice versa This wider aperture seems crucial at a time when we are confronted with the limitations of Euro American science and politics in managing global risks such as pandemics and climate change particularly in our most vulnerable communities The contributors to this volume draw on their familiarity with a wide range of global scientific traditions from Australian Aboriginal ecology to West African medicine to Polynesian navigation science to suggest possibilities for reconfiguring the relationship between science and politics to better manage global risks These possibilities should not only inspire scholars in rhetoric and technical communication but should also introduce readers from science and technology studies to some useful new approaches to the problem of decolonizing scenes of scientific practice around the world

The Poetry of Knowledge and the 'Two Cultures' John G. Fitch, 2018-05-16 This book argues that poetry is compatible with systematic knowledge including science and indeed inherent in it it also discusses particular poems that engage with such knowledge including those of Lucretius Vergil and Vita Sackville West The book argues that there are substantial similarities between knowledge making and poetry making for example in their being shaped by language including metaphor and in their seeking unity in the world under the impulse of eros and pleasure The book also discusses some of the obstacles to a poetry of knowledge including scientific objectivism the Kantian tradition in philosophy and the separation of the two cultures in our academic and intellectual institutions The book is designed to be accessible to all those interested in the issue of the two cultures or in the role of poetry and of science in contemporary culture

The Environmental Uncanny Brian A. Irwin, 2024-06-27 The Environmental Uncanny argues that the increasing destitution of our world is the result of a certain forgetfulness we have forgotten that the basis of our knowledge is not calculative reason but our participation in the natural world The modern built environment is exemplary of this forgetfulness and induces an uncanniness that can help us to understand the nature of our environmental crisis This book offers a unique interdisciplinary perspective on the global environmental crisis Ranging from traditional phenomenology including substantial discussion of both Merleau Ponty and Heidegger to philosophy of biology to architectural and urban design theory to landscape photography it makes illuminating connections to paint a multifaceted picture Tracing the root causes of dwindling biodiversity deforestation and suburban sprawl we can find how might we mark the path back toward a mode of rich inhabitation in a contemporary age In charting out how it is that we are losing our world Irwin offers a thought as to how we might regain it

Connecting Literature and Science Jay A. Labinger, 2021-11-18 This book presents a case for engagement between the sciences and the humanities The author a professional chemist seeks to demonstrate that the connections between those fields of intellectual activity are far more significant than anything that separates them The book combines a historical survey of the relationships between science and literature with a number of case studies that examine specific scientific episodes several drawn from the author's own research juxtaposed with a variety of literary works spanning a wide range of period and genre Dante to detective fiction War and Peace to White Teeth to elicit their common themes The work

argues for an empirical non theory based approach one that is closely analogous to connectionist models of brain development and function and that can appeal to general readers as well as to literary scholars and practicing scientists who are open to the idea that literature and science should not be compartmentalized

Figurative Language, Genre and Register Alice Deignan, Jeannette Littlemore, Elena Semino, 2013-03-07 This volume combines diverse research scenarios to present a solid framework for analysis of figurative language Figurative Language Genre and Register brings together discourse analysis and corpus linguistics in a cutting edge study of figurative language in spoken and written discourse The authors explore a diverse range of communities from chronic pain sufferers to nursery staff to present a detailed framework for the analysis of figurative language The reader is shown how figurative language is used between members of these communities to construct their own world view and how this can change with a shift in perspective Figurative language is shown to be pervasive and inescapable but it is also suggested that it varies significantly across genres

Mixed Metaphors Karen Sullivan, 2018-11-29 Critics shudder at mixed metaphors like that wet blanket is a loose cannon but admire Life s but a walking shadow a poor player and all the metaphors packed into Macbeth s Tomorrow and tomorrow and tomorrow speech How is it that metaphors are sometimes mixed so badly and other times put together so well In Mixed Metaphors Their Use and Abuse Karen Sullivan employs findings from linguistics and cognitive science to explore how metaphors are combined and why they sometimes mix Once we understand the ways that metaphoric ideas are put together we can appreciate why metaphor combinations have such a wide range of effects Mixed Metaphors Their Use and Abuse includes analyses of over a hundred metaphors from politicians sportspeople writers and other public figures and identifies the characteristics that make these metaphors annoying amusing or astounding

The Routledge Handbook of Metaphor and Language Elena Semino, Zsófia Demjén, 2016-11-03 The Routledge Handbook of Language and Metaphor provides a comprehensive overview of state of the art interdisciplinary research on metaphor and language and maps out future directions of research and practice in a variety of contexts in this field

Homo Ecophagus Warren M. Hern, 2022-09-30 Homo Ecophagus by Warren M Hern is a wide ranging look at the major problems for the survival of not just the human species but all other species on Earth due to human activities over the past tens of thousands of years The title of the book indicates Hern s new name for the human species The man who devours the ecosystem Over the course of its evolution Hern observes humans have evolved cultures and adaptations that have now become malignant and that the human species at the global level has all the major characteristics of a malignant neoplasm converting all plant animal organic and inorganic material into human biomass or its adaptive adjuncts and support systems Hern contends that this process is incompatible with continued survival of the human species and most other species on the planet offering a diagnosis and prognosis of the current environmental impasse

Roald Hoffmann on the Philosophy, Art, and Science of Chemistry Roald Hoffmann, 2012-01-23 In this book Kovac and Weisberg bring together twenty eight of Hoffmann s most philosophically significant and interesting pieces many of which

A Method for Linguistic Metaphor Identification Gerard J. Steen,Aletta G. Dorst,J. Berenike Herrmann,Anna Kaal,Tina Krennmayr,Trijntje Pasma,2010-06-23 This book presents a complete method for the identification of metaphor in language at the level of word use It is based on extensive methodological and empirical corpus linguistic research in two languages English and Dutch The method is formulated as an explicit manual of instructions covering one chapter the method being a development and refinement of the popular MIP procedure presented by the Pragglejaz Group in 2007 The extended version is called MIPVU as it was developed at VU University Amsterdam Its application is demonstrated in five case studies addressing metaphor in English news texts conversations fiction and academic texts and Dutch news texts and conversations Two methodological chapters follow reporting a series of successful reliability tests and a series of post hoc troubleshooting exercises The final chapter presents a first empirical analysis of the findings and shows what this type of methodological attention can mean for research and theory Indian from the Inside Dennis H. McPherson,J. Douglas Rabb,2014-01-10 Native American philosophy has enabled aboriginal cultures to survive centuries of attempted assimilation The first edition of this historical and philosophical work was written as a text for the first course in Native philosophy ever offered by a philosophy department at a Canadian university This revised edition based on more than twenty five years of research through the Native Philosophy Project and funded in part by the Rockefeller Foundation is expanded to include extensive discussion of Native American philosophy and culture in the United States as well as Canada Topics covered include colonialism the phenomenology of the vision quest the continuity of Native values land and the integrity of person the role of cognitive science in supporting Native narrative traditions language in Indian life landscape and other than human

Dingping (Frank) Qian,2024-05-28 With the Collaboration of Cotter LiThe process of decrypting innovation and creation as a lurking nondescript so far is theorized and operationalized based upon interdisciplinary taskings First comes the mapping between real world and human brain innovation is redefined as discovering new interrelationships in the brain using an algorithm well defined in 5 steps of searching unknown relations herein and the psychological synesthesia governing communications in the brain is dutifully augmented and made to function accordingly The Dante effect then binds the fresh interactions into a metaphoric tome which is mapped back to the real world to become an up to date theory or a new appliance Since the author has been nurtured both in Chinese spiritual excellence and advanced Western cultures this book is penned in a provocative style of knowledgeably poetic prose that will appeal to a broad audience In the era of Artificial Intelligence it is the human capacity of Thinking Synesthesia acquitted itself with distinction in the profound understanding of various interrelationships that transcends time and will be blessed with eternal youth **Machines, Bodies and Invisible Hands**

Stefano Fiori,2021-10-23 What was Adam Smith s intellectual laboratory How did his economic theory take shape Were his metaphors of order only residual and ornamental expressions This book answers these questions by analyzing the formation of the concepts of market and social order in Adam Smith s work by considering various aspects of his approach It analyzes how metaphors and pre analytical concepts influenced Smith s theory In line with studies that deal with the cognitive role of metaphors in science this book suggests that in Smith s work metaphors provided a framework on which basis the theory subsequently developed Therefore as such they were part of that intellectual process which made possible the formation of structured concepts The content and scope of the book permits a more comprehensive interpretation of Smith s thought in which many aspects of his work are taken into consideration in order to explain a crucial problem for Smith the nature and causes of social and economic order The book also shows that in general formation of theories is a complex process that includes pre analytical views as non residual parts of inquiry
