Making Vocational Choices John L. Holland,1973      Making Vocational Choices John L. Holland,1985 Provides a typology of six personality types the realistic investigative artistic social enterprising and conventional assesses their interactions within the working environment including likely performance and social and educational behaviour and shows how they are likely to act in different environments Affirms the usefulness of the classification when applied to specific occupations and suggests practical applications      The Disengaged Teen Jenny Anderson,Rebecca Winthrop,2025-01-07 Our education systems are shortchanging far too many teenagers This book is brimming with insights on how to change that It s an engaging evidence based and practical read about how to develop a generation of lifelong learners Adam Grant 1 New York Times bestselling author of Hidden Potential and Think Again and host of the podcast Re Thinking A powerful toolkit for parents of both checked out and stressed out teens that shows exactly what to do and stop doing to support their academic and emotional flourishing Adolescents are hardwired to explore and grow and learning is mainly how they do this But a shocking majority of teens are disengaged from school simultaneously bored and overwhelmed This is feeding an alarming teen mental health crisis As kids get older and more independent parents often feel powerless to help But fear not there are evidence backed strategies to guide them from disengagement to drive in and out of school For the past five years award winning journalist Jenny Anderson and the Brookings Institution s global education expert Rebecca Winthrop have been investigating why so many children lose their love of learning in adolescence Now weaving extensive original research with real world stories of kids who transformed their relationships with learning they identify four modes of learning that students use to navigate through the shifting academic demands and social dynamics of middle and high school shaping the internal narratives about their skills potential and identity Resister When kids resist they struggle silently with profound feelings of inadequacy or invisibility which they communicate by ignoring homework playing sick skipping class or acting out Passenger When kids coast along consistently doing the bare minimum and complaining that classes are pointless They need help connecting school to their skills interests or learning needs Achiever When kids show up do the work and get consistently high grades their self worth can become tied to high performance Their disengagement is invisible fueling a fear of failure and putting them at risk for mental health challenges Explorer When kids are driven by internal curiosity rather than just external expectations they investigate the questions they care about and persist to achieve their goals Understanding your child s learning modes is vital for nurturing their ability to become Explorers Anderson and Winthrop outline simple yet counterintuitive parenting strategies for connecting with your child tailoring your listening and communication styles to their needs igniting their curiosity and building self awareness and emotional regulation      **Handbook of Career Development** Gideon Arulmani,Anuradha J. Bakshi,Frederick T. L. Leong,A. G. Watts,2014-02-08 This book is focused on work occupation and career development themes that are fundamental to a wide range of human activities and relevant across all cultures Yet

theorizing and model building about this most ubiquitous of human activities from international perspectives have not been vigorous. An examination of the literature pertaining to career development counseling and guidance that has developed over the last fifty years reveals that theorizing and model building have been largely dominated by Western epistemologies. Some of the largest workforces in the world are in the developing world. Career guidance is rapidly emerging as a strongly felt need in these contexts. If more relevant models are to be developed, frameworks from other cultures and economies must be recognized as providing constructs that would offer a deeper understanding of career development. This does not mean that existing ideas are to be discarded. Instead, an integrative approach that blends universal principles with particular needs could offer a framework for theorizing research and practice that has wider relevance. The central objective of this handbook is to draw the wisdom and experiences of different cultures together to consider both universal and specific principles for career guidance and counseling that are socially and economically relevant to contemporary challenges and issues. This book is focused on extending existing concepts to broader contexts as well as introducing new concepts relevant to the discipline of career guidance and counseling.

**New Directions for Counseling and Human Development** Richard Lee Hayes, Roger F. Aubrey, 1988

**Computer-Assisted Career Decision Making** Martin R. Katz, 2013-10-23

Discussing career decision making (CDM) career guidance, a computerized system of career guidance, and the interplay among them, this book describes the way people sort themselves or are sorted into educational and occupational options. The options represent the content of this book, and the sorting represents the process. The sequence of decisions may extend over a lifetime, but several crucial choice points tend to occur at predictable stages in a career. Career guidance is a professional intervention in CDM; professional implies that practitioners conform to a standard of ethics, knowledge, and competence beyond what may be offered by other intervenors. Guidance is partly an art, but it is also partly a science, at least an application of science based on a synthesis of logic and evidence derived from research. The computerized System of Interactive Guidance and Information (SIGI) is a designated guidance treatment, clearly defined and specified. It was developed according to an explicit model derived from a particular rationale for guidance, using modern technology to amplify the practice of career guidance. The current version, called SIGI PLUS™, is being used at more than a thousand colleges and universities as well as secondary schools, libraries, corporations, community-based organizations, and counseling agencies. These three interdependent topics are treated in a progression from a theory of CDM to a rationale and a model for guidance to the design and development of a system. This book weaves together theory, principles, propositions, rationales, and models, research, and development. The product of that development, SIGI, helps to define theory, to exemplify it, and to test it.
