## **Making Waves Integrating Coastal Conservation And Development:**

*Making Waves* Katrina Brown, Emma L. Tompkins, Neil Adger, 2012-04-27 Coastal zones are critical multiple use resources under pressure from constant demands from different sources conservation economic growth and social welfare This book identifies the dilemmas of managing conservation and development in coastal areas It offers important information on the management conservation and social implications of coastal resources The authors present a variety of participatory methods and techniques that can be used to show the success or otherwise of the different uses and how they affect the users Their interdisciplinary analysis draws upon scientific knowledge as well as the latest social science insights on property rights and governance The book is intended for researchers and students in geography development studies and environmental planning and also for practitioners in natural resource management and coastal zone management

*Integrating Sustainable Development Into National Frameworks* Janet R. Strachan, Constance Vigilance, 2011 This book brings policy making for sustainable development into the mainstream of decision making at all levels of governance and in all sectors It builds on the 2005 internationally agreed Mauritius Strategy which aims to implement the integration of sustainable development by small island developing states Designed as a handbook for policy makers and planners in government as well as business and civil society leaders it covers seven of the twenty issues that have been outlined in the Mauritius Strategy as being important for the sustainable development of SIDS disaster management marine resources freshwater resources land resources energy resources tourism resources and trade It brings together best practices policy options and development prospects that small states can pursue in order to achieve real progress in these fields It covers the progress and experiences of countries in the Caribbean region the Pacific region and the Atlantic Indian Ocean and Mediterranean region in their implementation of sustainable development in these areas It also provides a useful point of reference and stimulus to policy makers and their supporting colleagues from all sectors

*Human Dignity and Managerial Responsibility* Ana Maria Davila Gomez, 2016-05-13 The issue of human rights in the context of corporate social responsibility is normally taken to relate to concern about exploitation in the supply chain child labour slavery in developing countries and similar evils but of course human rights are engaged in relation to the treatment of employees in any work situation Indeed as *Human Dignity and Managerial Responsibility* illustrates the handling of employees is increasingly recognised as an important ingredient of sustainable enterprise evidence shows that ethical and socially responsible behaviour is increasingly and successfully being engaged in many large corporations Much has been written about the responsibilities of managers Since employees are claimed by all organisations to be among their most important stakeholders it is ironic that research finds that the behaviour of many managers towards employees is often inappropriate The editors and contributors of *Human Dignity and Managerial Responsibility* argue that there is a clear connection between maintaining the dignity of the workforce and corporate performance and sustainability Their multiple perspectives on the workplace examine the position

of the employee as a stakeholder together with issues about managing employees in relation to social responsibility and sustainability They discuss diversity in the broadest sense filling a gap in the research related literature essential to a more rounded understanding of CSR Human Dignity and Managerial Responsibility will appeal to a wide audience amongst those with an academic or professional interest in CSR sustainability governance and stakeholder management human rights diversity human resource management and organisational development

**Integrated Coastal Zone Management** R. R. Krishnamurthy, 2008 Ultimately this book provides a means to help address and solve the complexity that exists between coastal systems and anthropogenic activities

**International Climate Change Law and Policy** Thoko Kaime, 2014-03-26 Climate change poses fundamental and varied challenges to all communities across the globe The adaptation and mitigation strategies proposed by governments and non governmental organisations are likely to require radical and fundamental shifts in socio political structures technological and economic systems organisational forms and modes of regulation The sheer volume of law and policy emanating from the international level makes it uncertain which type of regulatory or policy framework is likely to have a positive impact The success or failure of proposed measures will depend on their acceptability within the local constituencies within which they are sought to be applied Therefore there is an urgent need to better comprehend and theorise the role of cultural legitimacy in the choice and effectiveness of international legal and policy interventions aimed at tackling the impact of climate change The book brings together experts to present perspectives from different disciplines on the issue of international climate change law and policy Beginning from the premise that legitimacy critiques of international climate change regulation have the capacity to positively influence policy trends and legal choices the book showcases innovative ideas from across the disciplines and investigate the link between the efficacy of international legal and policy mechanisms on climate change and cultural legitimacy The book includes chapters on with a theoretical basis as well as specific case studies from around the globe The topics covered include land use planning as a tool of enhancing cultural legitimacy indigenous peoples in international environmental negotiations transnational advocacy networks community based forestry management and culture and voluntary social movements

**Power and Principle in the Market Place** Jacob Dahl Rendtorff, 2016-04-08 In the global financial crisis the need to develop a new kind of economy with a closer relation between ethics and economics has become an important challenge to the international society This book contributes to this debate by investigating different aspects of global business ethics and corporate social responsibility which are becoming more and more important in the ongoing discussions on the relation between market institutions and democratic governments The different chapters of the book deal with fundamental philosophical issues of the ethics of the market economy including discussions of the role of the social sciences and economics in contributing to a sustainable economics and global responsibility in the twenty first century In this sense the book takes up the transnational debate on ethics and economics in order to contribute to a more balanced fair just and conscientious development in the world The

book starts with a European perspective on these issues based on philosophical sociological and economic views from Europe These views are further developed in order to share thoughts of how to improve corporate social responsibility welfare and justice and the advancement of ethical principles in the international context It is argued that in the international community good corporate citizenship as social and environmental responsibility is realized through individual and organizational cosmopolitan responsibility for fostering the common good for humanity The chapters of the book were originally presented at a conference in Copenhagen organized together with the German Cultural Institute the Goethe Institute of Copenhagen Copenhagen Business School and Roskilde University Denmark Shared Oceans, Shared Future , Climate Change Archaeology Robert Van de Noort,2013-11 This pioneering study provides the theoretical basis for archaeological data to be included in climate change debate Applying an approach which uses archaeological research as a repository of ideas and concepts it illustrates the pathways implemented in times of climate change in the past and how these can help prepare modern communities *The Governance of Risk* Guler Aras,David Crowther,2013-04-16 *The Governance of Risk* *The Effects of Technology and Institutions on E-Participation* Pragati Rawat,John C. Morris,2021-12-24 In this book Pragati Rawat and John C Morris identify and evaluate the impact of factors that can help explain the difference in e participation public participation using information and communication technology in different countries While cross sectional studies have been covered few have taken an in depth look at cross national studies This book attempts to fill the gap using quantitative panel data to explore the influence of technology and institutions and the impact of their complex relationships in a mediation and moderation analysis on e participation The current study reviews the scholarly work in the field of offline and online participation to identify a set of antecedents that influence e participation A conceptual framework is developed supported by the theories from the public policy and socio technical premise The authors utilize secondary data primarily from the UN and World Economic Forum for 143 countries from three waves of surveys to measure the dependent and explanatory variables The panel data is statistically analyzed and findings reveal the role of technology as a mediator as well as a moderator for institutions impact on e participation *The Effects of Technology and Institutions on E Participation* provides a groundbreaking country level analysis that will appeal to academics and students of e government and Digital Government Public Policy Public Administration Public Sector Innovation and Public Participation *Coasts for People* Fikret Berkes,2015-02-11 Issues of sustainability and increased competition over coastal resources are changing practices of resource management Societal concerns about environmental degradation and loss of coastal resources have steadily increased while other issues like food security biodiversity and climate change have emerged A full set of social ecological and economic objectives to address these issues are recognized but there is no agreement on how to implement them This interdisciplinary and big picture book through a series of vivid case studies from environments throughout the world suggests how to achieve these new resource management principles in practical accessible ways *Economic Management*

*of Marine Living Resources* David Whitmarsh, 2013-10-18 This textbook has two main objectives Firstly it outlines the problems associated with the management and conservation of marine living resources with particular attention given to the twin concepts of economic value and sustainability It demonstrates the contribution that economics can make to understanding these problems as well as helping to frame policies to mitigate them Secondly it looks in detail at the key methods that may be used to collect and analyse socio economic data oriented towards the information needs of decision makers and stakeholders involved in fisheries management Together these two objectives address the question how does society make the best use of its marine living resources

Adapting to Climate Change W. Neil Adger, Irene Lorenzoni, Karen L. O'Brien, 2009-06-25 This book presents the latest science and social science research on whether the world can adapt to climate change

Planning for Climate Change Elisabeth M. Hamin Infield, Yaser Abunnasr, Robert L. Ryan, 2018-09-18 This book provides an overview of the large and interdisciplinary literature on the substance and process of urban climate change planning and design using the most important articles from the last 15 years to engage readers in understanding problems and finding solutions to this increasingly critical issue The Reader's particular focus is how the impacts of climate change can be addressed in urban and suburban environments what actions can be taken as well as the need for and the process of climate planning Both reducing greenhouse gas emissions as well as adapting to future climate are explored Many of the emerging best practices in this field involve improving the green infrastructure of the city and region providing better on site stormwater management more urban greening to address excess heat zoning for regional patterns of open space and public transportation corridors and similar actions These actions may also improve current public health and livability in cities bringing benefits now and into the future This Reader is innovative in bringing climate adaptation and green infrastructure together encouraging a more hopeful perspective on the great challenge of climate change by exploring both the problems of climate change and local solutions

**Urban Climate Change Adaptation** Baojie He, Joni Jupesta, Giuseppe T. Cirella, Gloria Pignatta, 2024-09-17 Urban Climate Change Adaptation is a timely and informative book that delves into the complex challenges posed by climate change and explores the pathways to achieving environmental sustainability The book begins by examining the scientific consensus on climate change detailing the causes and consequences of rising global temperatures changing weather patterns and the resulting impacts on ecosystems and human societies Readers are further introduced to a range of innovative and nature based solutions that promote environmental sustainability These solutions encompass a diverse array of approaches including renewable energy sustainable agriculture conservation of biodiversity and the restoration of ecosystems The book serves as an indispensable resource for anyone seeking a comprehensive understanding of complex issues on climate change and the pursuit of environmental sustainability It also offers practical solutions for individuals communities and policymakers

**Integrated Coastal Management** Martin D. A. Le Tissier, 2011 Integrated coastal management is unquestionably important but it is extremely difficult in practice because it requires skills derived from various disciplines In order to succeed coastal managers must overcome disciplinary boundaries and construct a holistic vision that is both practical and unique to their profession This manual provides university teachers with a three module course to train professional coastal managers As many students and teachers in this field are from the natural sciences the focus is on embedding social science concepts and approaches into education for coastal management

**Routledge Handbook of the Study of the Commons** Blake Hudson, Jonathan Rosenbloom, Dan Cole, 2019-01-04 This comprehensive Handbook serves as a unique synthesis and resource for understanding how analytical frameworks developed within the literature assist in understanding the nature and management of commons resources Such frameworks include those related to Institutional Analysis and Development Social Ecological Systems and Polycentricity among others The book aggregates and analyses these frameworks to lay a foundation for exploring how they apply according to scholars across a wide range of disciplines It includes an exploration of the unique problems arising in different disciplines of commons study including natural resources forests oceans water energy ecosystems etc economics law governance the humanities and intellectual property It shows how the analytical frameworks discussed early in the book facilitate interdisciplinarity within commons scholarship This interdisciplinary approach within the context of analytical frameworks helps facilitate a more complete understanding of the similarities and differences faced by commons resource users and managers the usefulness of the commons lens as an analytical tool for studying resource management problems and the best mechanisms by which to formulate policies aimed at addressing such problems Chapter 26 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
