Making Your Home Sustainable A Guide To Retrofitting:

Making Your Home Sustainable Derek F. Wrigley, 2005-01-01 In 1991 architect and solar consultant Derek Wrigley moved into a townhouse in Canberra and faced a new design challenge how to retrofit an existing suburban house to use renewable energies rather than fossil fuels Convinced that building design could do more to achieve sustainability he developed a series of innovative devices to improve the energy efficiency of the house and modified the existing design to work harmoniously with the local climate The house now generates its own solar electricity ventilates and cools itself without cost or pollution and treats its own grey water for irrigating the garden It quickly attracted visitors who were keen to learn how to apply these sustainable designs to their own homes and wanted to know where to begin Making Your Home Sustainable is a practical and easy to follow guide for homeowners builders and architects who are concerned about the effects of climate change and environmental degradation and want to do something about reversing the trend Derek Wrigley shows how simple modifications to existing homes can help to reduce emissions of greenhouse gases and utilise natural rather than imported energies and resources He clearly explains how to Identify retrofitting potential when buying a home Rationalise energy and water consumption Provide sunshine in southern rooms warmth in winter and cool air in summer Use ventilation and insulation to reduce the need for artificial heating or cooling Install a solar hot water system Utilise wasted sunlight to heat and illuminate your home Create a beautiful landscape which also contributes to your household energy efficiency and Install reflectors sunshades water recycling heliostats double glazing photovoltaics water tanks and other energy saving and water saving devices With detailed descriptions 46 photographs and over 100 diagrams Making Your Home Sustainable is the retrofitter's bible an ideal practical guide for anyone who wants to make their home more comfortable and save money on energy bills while increasing the value of their house and addressing the causes of global warming

Making Your Home Sustainable Derek F. Wrigley, 2012-04-01 Sustainable ideas using natural energies to improve existing houses in a cool temperate climate In 1991 architect and solar consultant Derek Wrigley moved into a townhouse in Canberra and faced a new design challenge how to retrofit an existing suburban house to use renewable energies rather than fossil fuels Convinced that building design could do more to achieve sustainability he developed a series of innovative devices to improve the energy efficiency of the house and modified the existing design to work harmoniously with the local climate The house now generates about 15 per cent more electricity than it consumes and the photovoltaic system should have a pay back period of just under nine years The house ventilates and cools itself without any electrical assistance or air conditioning and greywater nourishes the garden Derek has been advised that for every dollar spend on retrofitting he is adding at least double that amount to the house's market value Making Your Home Sustainable is a practical and easy to follow guide for homeowners builders and architects who are concerned about the effects of climate change and environmental degradation and who want to do something about reversing the trend Derek Wrigley shows how

simple modifications to existing homes can help to reduce emissions of greenhouse gases and utilise natural rather than imported energies and resources He clearly explains how to Identify retrofitting potential when buying a home Rationalise energy and water consumption Provide sunshine in southern rooms warmth in winter and cool air in summer Use ventilation and insulation to reduce the need for artificial heating or cooling Install a solar hot water system Utilise wasted sunlight to heat and illuminate your home Create a beautiful landscape which also contributes to your household energy efficiency and Install reflectors sunshades water recycling heliostats double glazing photovoltaics water tanks and other energy saving and water saving devices With detailed descriptions and around 150 photographs and diagrams this revised edition of MAKING YOUR HOME SUSTAINABLE is the retrofitter s bible an ideal practical guide for anyone who wants to make their home more comfortable and save money on energy bills while increasing the value of their house and addressing the causes of global warming

Real Estate and Sustainable Crisis Management in Urban Environments Saija Toivonen,Sirkka Heinonen,Ira Verma,Raúl Castaño-Rosa,Sara Wilkinson,2024-05-31 The aim of this book is to promote the dynamic resilience of societies by identifying analysing and exemplifying the role of space and land use in both anticipated and unanticipated primary and secondary crisis situations The book brings together the expertise of a unique team of researchers and methods from fields of futures studies land use planning social sustainability and wellbeing architecture spatial planning design and real estate economics and presents a

novel understanding of the direct and indirect impacts of possible crises in the space and land use context. It goes on to discuss the concept of resilience and exemplifies potential solutions and offers a holistic and forward looking approach for crisis management through a lens of social sustainability and wellbeing making an important contribution to the promotion of wellbeing in the built environment especially in terms of land and residential space and building use. This book does not only identify barriers and successful incentives in resilient crisis management but also discusses the role of different stakeholders e.g. households, office workers, real estate owners, space occupants, firms, the public sector etc in crisis management. Finally, international case studies aiming to tackle the challenging landscape of future threats are presented along with novel tools to support the development of future policies, regulations and management practices in the built environment which can increase the dynamic resilience of societies. Overall, this book is essential reading for decision makers in the public and private sectors, urban developers, space and spatial designers, architects, planners, community stakeholders, real estate investors, facility managers and crisis and corporate responsibility managers. The Ultimate Guide to Natural Farming and Sustainable Living Nicole Faires, 2016-01-19. A beautiful comprehensive guide to going green and living sustainably. Permaculture is an important but often misunderstood method of growing food and building homes in a manner that works with nature rather than against it to create beautiful, healthy and useful gardens. Blending ecology, organic agriculture, green home design, appropriate technology and biology can be confusing and overwhelming, but *The Ultimate Guide to Natural Farming and Sustainable Living* simplifies this vast field for practical application. This is a hands-on guide taking the beginner through each step of the design process so that anyone can apply permaculture principles to his or her life. While the principles are simple, the in-depth topics cover every aspect of permaculture including building green homes and passive solar design, growing edible plant communities and forest gardens using no-till and natural farming methods, creating microclimates for extended growing seasons, raising livestock with ecological foraging techniques. This is a common sense approach to sustainable living that creates a self-sufficient and low effort home for the people that live there, whether in the city or the country. *The Ultimate Guide to Natural Farming and Sustainable Living* isn't a philosophy book or a dissertation on theory. It is a step-by-step complete guide to every aspect of permaculture.

Transcending Humanitarian Engineering Strategies for Sustainable Futures Koumpouros, Yiannis,Georgoulas, Angelos,Kremmyda, Georgia,2023-03-13 Engineering disciplines have a pivotal role to play in the solution of global humanitarian challenges enabling our society to take steps towards sustainable human development Engineering can be used as the catalyst for the change that the world needs from water supply to renewable energy provision engineering knowledge and application underpin the responses needed for us all to pursue a sustainable future Because the issue of humanitarianism is not just engineering problems there is a need to engage with professionals breakdown previously siloed approaches and obdurate practices and introduce interdisciplinary education and training to enhance combinational expertise Transcending Humanitarian Engineering Strategies for Sustainable Futures provides relevant theoretical frameworks and the latest empirical research findings in the area of humanitarian engineering as a means for future proofing our communities Covering topics such as disaster mitigation natural hazards and land use change this premier reference source is an excellent resource for engineers environmentalists sociologists anthropologists urban planners government officials students and educators of higher education non profit organizations researchers and academicians **Integrated Project Design** Bárbara Rangel,Ana Sofia Guimarães,Jorge Moreira da Costa,João Pedro Poças Martins,2023-06-30 Integrated Project Design Delivery is not new but in recent years it has been achieving the status of yet another acronym

more connected to its contractual details than to the actual meaning of the profound change in how work is to be developed. This book clarifies this situation by presenting several examples in academia research and practical design situations ranging from the use of old style expression media such as handmade drawings to comprehensive digitalisation processes. The IPD model is shown as an effective way to tackle the ever increasing challenges of balancing productivity with the urgent demands for designs that embrace decarbonisation, net zero buildings, energy efficiency, modularisation and disassembly, including lessons learned from Industrial Design. IPD is a mindset that clashes with the traditional academic model of placing architecture and engineering in different and frequently opposite fields. Actual examples of course syllabuses that disrupt this approach are also presented, showing how wide collaboration from the early stages of the design process can improve the sought after result, providing future professionals with a hands on experience of its efficiency as a work methodology.
