Handbook of Gender and Communication is a vital resource for those seeking to explore the complex interactions of gender and communication. Editors Bonnie J. Dow and Julia T. Authors discuss the development of gender and communication research during the past three decades and examine the theories, questions, and issues about gender and communication that are ascending to define the next stage of work in the area. Provides comprehensive reference lists. Each section summarizes existing theory and research related to an area of gender and communication scholarship and guides readers to the central works in the field as well as directs future scholarship toward the most urgent, important, and promising topics, methodologies, and/or perspectives.

A Language and Power Reader

Robert Eddy, Victor Villanueva, 2014-09-15. A Language and Power Reader organizes reading and writing activities for undergraduate students, guiding them in the exploration of racism and cross-racial rhetorics. Introducing texts written from and about versions of English often disrespected by mainstream Americans, A Language and Power Reader highlights English dialects and discourses to provoke discussions of racialized relations in contemporary America. Thirty selected readings in a range of genres and from writers who work in alternative voices (e.g., Pidgin, African American, Language discourse of international and transnational English speakers) focus on disparate power relations based on varieties of racism in America and how those relations might be displayed, imposed, or resisted across multiple rhetorics. The book also directs student participation and discourse. Each reading is followed by comments and guides to help focus conversation. Research has long shown that increasing a student's metalinguistic awareness improves a student's writing. No other reader available at this time explores the idea of multiple rhetorics or encourages their use, making A Language and Power Reader a welcome addition to writing classrooms.

International Handbook of Science Education Barry J. Fraser, Kenneth Tobin, Campbell J. McRobbie, 2011-12-13. The International Handbook of Science Education is a two-volume edition pertaining to the most significant issues in science education. It is a follow-up to the first Handbook published in 1998, which is seen as the most authoritative resource ever produced in science education. The chapters in this edition are reviews of research in science education and retain the strong international flavor of the project. It covers the diverse theories and methods that have been a foundation for science education and continue to characterize this field. Each section contains a lead chapter that provides an overview and

synthesis of the field and related chapters that provide a narrower focus on research and current thinking on the key issues in that field. Leading researchers from around the world have participated as authors and consultants to produce a resource that is comprehensive, detailed, and up to date. The chapters provide the most recent and advanced thinking in science education, making the Handbook again the most authoritative resource in science education. **Understanding and**

Teaching Reading Emerald Dechant, 2013-09-13. In the words of Aldous Huxley, "Every man who knows how to read has it in his power to magnify himself to multiply the ways in which he exists to make his life full, significant, and interesting." Few people question the value of reading; in fact, most extol its virtues. As our culture becomes more complex, reading plays an increasingly greater role in satisfying personal needs and in promoting social awareness and growth. In the last 20 years, the teaching of this invaluable skill has focused so intensely on comprehension and prediction from context that it has lost sight of the significance of automaticity and fluency in the word identification process. Reading is a synthesis of word recognition and comprehension; thus, this text is about these basic processes and their integration. A common plea from teachers today is that research and psychology be translated into teaching behavior. Therefore, the aim of this book is twofold: one, to identify, report, organize, and discuss those bits of data, research, and theory that are most relevant to the teacher's understanding of the reading process; and two, to help educators to interpret and apply theory and research data to everyday classroom teaching as well as to the problems encountered frequently in developmental and remedial teaching. Religious Reading

and Everyday Lives in Devotional Hinduism Emilia Bachrach, 2022. Religious Reading and Everyday Lives in Devotional Hinduism considers religious reading through a study of the Pushtimarg, a Hindu community whose devotional practices and community identity have developed in close relationship to a genre of prose hagiography written during the 17th century. Combining ethnographic fieldwork and close readings of Indian language texts, each chapter of the book showcases various ways in which devotees have performatively read and interpreted these hagiographies in ways that help them navigate between their roles as devotional caretakers of the Hindu deity Krishna and their social and familial obligations in the modern world. **The Handbook of Media and Mass Communication Theory** Robert S. Reconceiving Writing, Rethinking Writing Instruction Joseph Petraglia, 2013-11-05 To a degree unknown in practically any other discipline the pedagogical space afforded composition is the institutional engine that makes possible all other theoretical and research efforts in the field of rhetoric and writing But composition has recently come under attack from many within the field as fundamentally misguided Some of these critics have been labelled New Abolitionists for their insistence that compulsory first year writing

should be abandoned Not limiting itself to first year writing courses this book extends and modifies calls for abolition by taking a closer look at current theoretical and empirical understandings of what contributors call general writing skills instruction GWSI the curriculum which an overwhelming majority of writing instructors is paid to teach that practically every composition textbook is written to support and the instruction for which English departments are given resources to deliver The vulnerability of GWSI is hardly a secret among writing professionals and its intellectual fragility has been felt for years and manifested in several ways in persistently low status of composition as a study both within and outside of English departments in professional journal articles and conference presentations that are growing both in theoretical sophistication and irrelevance to the composition classroom and in the rhetoric and writing field s ever increasing attention to nontraditional sites of writing behavior But to date there has been relatively little concerted discussion within the writing field that focuses specifically on the fundamentally awkward relationship of writing theory and writing instruction This volume is the first to explicitly focus on the gap in the theory and practice that has emerged as a result of the field s growing professionalization The essays anthologized offer critiques of GWSI in light of the discipline s growing understanding of the contexts for writing and their rhetorical nature Writing from a wide range of cognitivist critical theoretical historical linguistic and philosophical perspectives contributors call into serious question basic tenets of contemporary writing instruction and provide a forum for articulating a sort of zeitgeist that seems to permeate many writing conferences but which has until recently not found a voice or a name
