and how these processes are all influenced both by the organisations in which managers act and by the professional communities of practice they belong to *Managing Modern Healthcare* fills these important gaps in our understanding by drawing upon an in depth study of management networks and practice in three healthcare organisations in the UK It draws from the primary research a number of important and grounded lessons about how management networks develop and influence the spread of management knowledge and practice how management training and development relates to the needs of managers facing challenging conditions and how those conditions are themselves shaping the nature of management in healthcare This book reveals how managers in practice are responding to the many contemporary challenges facing healthcare and the NHS in particular and how they are able or not to effectively exploit sources of knowledge learning and best practice through the networks of practice they engage in to improve healthcare delivery and healthcare organisational performance *Managing Modern Healthcare* makes a number of important theoretical contributions as well as practical recommendations The theoretical and empirical contributions the book makes relate to wider work on networks and networking management knowledge situated learning communities of practice professionalization professional identity and healthcare management more generally The practical contribution comes in the form of recommendations for healthcare management practitioners and policy makers that are intended to impact upon and help enhance healthcare management delivery and performance
