Making Sense of the Unfeasible Marc Fleisher, 2003-06-15 Before he received his diagnosis of AS Marc Fleisher was considered mentally retarded yet he went on to gain two maths degrees and to undertake post graduate studies in maths In this engaging story he relates how supported by his family and by services for people with autism he learnt to get the most out of life *Understanding Reading* Frank Smith, 2012-03-22 *Understanding Reading* revolutionized reading research and theory when the first edition appeared in 1971 and continues to be a leader in the field In the sixth edition of this classic text Smith's purpose remains the same to shed light on fundamental aspects of the complex human act of reading linguistic physiological psychological and social and of what is involved in learning to read The text critically examines current theories instructional practices and controversies covering a wide range of disciplines but always remains accessible Careful attention is given to the ideological clash that continues between whole language and direct instruction and currently permeates every aspect of theory and research into reading and reading instruction In every edition including the present one Smith has

steadfastly resisted giving teachers a recipe for teaching reading while aiming to help them make their own decisions based on research about reading which is accessible to anyone and their experience and personal knowledge of their students which only they possess To aid readers in making up their own minds each chapter concludes with a brief statement of Issues Understanding Reading Sixth Edition is matchless in integrating a wide range of topics relative to reading while at the same time being highly readable and user friendly for instructors students and practitioners *Making Sense of Madness* Jim Geekie, John Read, 2009-05-06 The experience of madness which might also be referred to more formally as schizophrenia or psychosis consists of a complex confusing and often distressing collection of experiences such as hearing voices or developing unusual seemingly unfounded beliefs Madness in its various forms and guises seems to be a ubiquitous feature of being human yet our ability to make sense of madness and our knowledge of how to help those who are so troubled is limited *Making Sense of Madness* explores the subjective experiences of madness Using clients stories and verbatim descriptions it argues that the experience of madness is an integral part of what it is to be human and that greater focus on subjective experiences can contribute to professional understandings and ways of helping those who might be troubled by these experiences Areas of discussion include how people who experience psychosis make sense of it themselves scientific professional understandings of madness what the public thinks about schizophrenia *Making Sense of Madness* will be essential reading for all mental health professionals as well as being of great interest to people who experience psychosis and their families and friends **Nussbaum's Politics of Wonder** Jeremy Bendik-Keymer, 2023-01-26 In an unconventionally written book that challenges the literary imagination of its readers Jeremy Bendik Keymer explores how wonder is central to Martha C Nussbaum's normative project Nussbaum's work is opposed to the emotional and political conditions of narcissism the tendency to seek to control the wills of others in order to defend oneself against perceived vulnerabilities Our capacity for wondering is important for growing beyond narcissism Bendik Keymer elaborates a politics of wonder that is consistent with understanding this idea Taking issue with understandings of wonder viewing it as an emotion of surprise or delight he develops an alternate tradition finding wonder in concert with the freedom of imagination found by degrees within much of human understanding The result is a constructive rereading of Nussbaum's oeuvre surprising for how it disencumbers her work of some falsehoods surrounding anxiety and anger and for the ways it implies an egalitarian politics of relational autonomy more socialist than liberal Misty Morrison's visual inquiry accompanies the book creating space for the reader to wonder Morrison paints and prints how families involve wonder starting with moments in her child's life when she wonders what they might see Nussbaum's *Politics of Wonder* is an important contribution to the philosophy of wonder and is crucial for understanding the work of a leading philosopher **Life without a Ground: A Praxis of Being-in-the-World** Daniil Koloskov, 2024-07-18 This book argues for the pragmatist thesis of the primacy of praxis on a phenomenological basis Demonstrating the relevance of phenomenology it provides a systematic overview of the contemporary pragmatic landscape

taking into account not only a family of neo pragmatic approaches but also the current pragmatic readings of phenomenology This volume offers an innovative formulation of the primacy of practice thesis based on the genetic reformulation of Heidegger s notions of disclosure Dasein and average intelligibility Das Man Investigating the dynamic interrelation among those notions the author arrives at the phenomenological conception of forms of life or average background practices and argues that a form of life is not a pragmatic condition of meaningfulness but an outcome of the dynamic process of meaning formation This text concludes that the formation of meaning has no overarching origin but sources from the bundle of disparate practical spaces and is anarchic in nature It appeals to students and researchers working in phenomenology and philosophical anthropology

The Felt Meanings of the World Quentin Smith,1986 In a critical dialogue with the metaphysical tradition from Plato to Hegel to contemporary schools of thought the author convincingly argues that traditional rationalist metaphysics has failed to accomplish its goal of demonstrating the existence of a divine cause and moral purpose of the world To replace the defective rationalist metaphysics the author builds a new metaphysics on the idea that moods and affects make manifest the world s felt meanings he argues that each feature of the world is a felt meaning in the sense that each feature is a source of a feeling response if and when it appears The author asserts that we must synthesize our two ways of knowing poetic evocations and exact analyses in order to decide which mood or affect is the appropriate appreciation of any given feature of the world Smith gives evocative and exact explications of such features as the world s temporality appearance and mind independency as these features appear in the appropriate recitations

Materiality in Modernist Short Fiction Laura Oulanne,2021-05-30 Materiality in Modernist Short Fiction provides a fresh approach to reading material things in modern fiction accounting for the interplay of the material and the cultural This volume investigates how Djuna Barnes Katherine Mansfield and Jean Rhys use the short story form to evoke the material world as both living and lived and how the spaces they create for challenging gendered social norms can also be nonanthropocentric spaces for encounters between the human and the nonhuman Using the unique knowledge created by literary works to spark new conversations between phenomenology cognitive studies and new materialisms

complemented with a feminist perspective this book explores how literature can touch the basic experience of being in feeling and making sense of a material world that is itself alive and active From a sensitive reading of how three women used the material world to make their readers see feel and question the norms shaping our experience this volume draws a theory of reading affective materiality that illuminates modernism and the short story form but also reaches beyond them The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

The Rediscovery of Teaching Gert

Biesta, 2017-05-25 The Rediscovery of Teaching presents the innovative claim that teaching does not necessarily have to be perceived as an act of control but can be understood and configured as a way of activating possibilities for students to exist as subjects By framing teaching as an act of dissensus that is as an interruption of egological ways of being this book positions teaching at the progressive end of the educational spectrum where it can be reconnected with the emancipatory ambitions of education In conversation with the works of Emmanuel Levinas Paulo Freire Jacques Rancière and other theorists Gert Biesta shows how students' existence as subjects hinges on the creation of existential possibilities through which students can assert their grown up place in the world Written for researchers and students in the areas of philosophy of education educational theory curriculum theory teaching and teacher education The Rediscovery of Teaching demonstrates the important role of teachers and teaching in the project of education as emancipation towards grown up ways of being in the world

Varieties of Personal Theology David T. Gortner, 2016-02-17 Varieties of Personal Theology starts from the premise that all human beings are folk theologians active not only in constructing selves but also in constructing worlds and guiding philosophies of life Through fascinating in-depth interviews and surveys David Gortner looks specifically at emerging adults aged 18-25 as young theologians who regardless of religious background wrestle with fundamental questions of place purpose ultimate cause and ultimate aims in life This book charts the subtle and significant influences of social class family school work peer relationships religion and intrinsic attitudes and dispositions on young adults' personal theologies and traces the ways their personal theologies connect with choices they make in their daily lives in education jobs leisure and relationships Intentionally crossing boundaries between religious and social science fields Gortner combines perspectives from both to demonstrate how theological diversity persists in America despite some clear culturally dominant trends This book reveals how American young adults are active theologians forging diverse ways of seeing and being in the world shaped by their experiences and in turn continuing to shape their choices in life

Graphic Novels as Philosophy Jeff McLaughlin, 2017-08-18 Contributions by Eric Bain Selbo Jeremy Barris Maria Botero Manuel Mandel Cabrera Jr David J. Leichter Ian MacRae Jeff McLaughlin Alfonso Muñoz Corcuera Corry Shores and Jarkko Tuusvuori In a follow up to Comics as Philosophy international contributors address two questions Which philosophical insights concepts and tools can shed light on the graphic novel And how can the graphic novel cast light on the concerns of philosophy Each

contributor ponders a well known graphic novel to illuminate ways in which philosophy can untangle particular combinations of image and written word for deeper understanding Jeff McLaughlin collects a range of essays to examine notable graphic novels within the framework posited by these two questions One essay discusses how a philosopher discovered that the panels in Jeff Lemire's *Essex County* do not just replicate a philosophical argument but they actually give evidence to an argument that could not have existed otherwise Another essay reveals how Chris Ware's manipulation of the medium demonstrates an important sense of time and experience Still another describes why *Maus* tends to be more profound than later works that address the Holocaust because of not in spite of the fact that the characters are cartoon animals rather than human Other works contemplated include Will Eisner's *A Contract with God* Alan Moore and David Lloyd's *V for Vendetta* Alison Bechdel's *Fun Home* and Joe Sacco's *Footnotes in Gaza* Mainly each essay contributor graphic novelist and artist is doing the same thing trying to tell us how the world is at least from their point of view

Worldview as Worship Eddie Karl Baumann, 2011-08-01 The goal of many evangelical educators is to facilitate biblical thinking and the worldview transformation of their students Yet aside from upholding a set of moral behaviors or maintaining positions on issues perceived to be Christian the goals and aspirations of most evangelical young people differ little from their unbelieving peers As George Barna has noted We have a generation coming up that isn't looking at Christianity to answer spiritual concerns We either change or we lose them *Worldview as Worship* contends that the approach taken by most evangelical educators to the issue of worldview transformation has neglected to address two fundamental components of worldviews First that our initial worldviews are not philosophical systems but rather faith dispositions and that worldview transformation cannot simply present the biblical worldview as a more rational or logical system but must address issues of the heart as well as the mind Second unlike philosophies that are individual worldviews are communal and are learned and transformed within the context of community practice Appealing to Paul's teaching in Romans 12:1-2 *Worldview as Worship* approaches the renewing of your mind as the result of the believer's presentation of themselves as a holy sacrifice which is your spiritual service of worship The book advocates an approach to worldview transformation that focuses on believers as apprentices rather than simply as students an approach that holds true to the biblical model of discipleship As a result worldview transformation works best when the application of faith to the issues of learning and life are modeled by the faith community and where students are given the opportunity to put faith into practice
