Making Sense of Mediatized Politics Jesper Stromback, Frank Esser, 2017-02-24 Over time and across Western democracies the media has become increasingly influential and a great deal more political processes have become altered shaped or structured by the media and the perceived need of individuals organizations and social systems to communicate with or through the media The key theoretical perspective to understand this process is mediatization As a long term process which has increased the importance of the media and their spill over effects on political processes institutions organizations and actors mediatization is one of the most important processes reshaping politics and transforming democracies across the Western world While the theoretical perspective of mediatization has become increasingly popular in recent years scholarly understanding of the mediatization process and its antecedents consequences and contingencies are still hampered by unresolved questions and a lack of systematic empirical studies This volume addresses this by bringing together contributions that analyze and investigate different facets of the mediatization of politics making a significant contribution to our theoretical as well as empirical understanding of the mediatization of politics and setting the agenda for further research on the mediatization of politics This book was originally published as a special issue of Journalism Studies

Making Sense of Media and Politics Gadi Wolfsfeld, 2011-06-23 Politics is above all a contest and the news media are the central arena for viewing that competition One of the central concerns of political communication has to do with the myriad ways in which politics has an impact on the news media and the equally diverse ways in which the media influences politics Both of these aspects in turn weigh heavily on the effects such political communication has on mass citizens In Making Sense of Media and Politics Gadi Wolfsfeld introduces readers to the most important concepts that serve as a framework for examining the interrelationship of media and politics political power can usually be translated into power over the news media when authorities lose control over the political environment they also lose control over the news there is no such thing as objective journalism nor can there be the media are dedicated more than anything else to telling a good story the most important effects of the news

media on citizens tend to be unintentional and unnoticed By identifying these five key principles of political communication the author examines those who package and send political messages those who transform political messages into news and the effect all this has on citizens The result is a brief engaging guide to help make sense of the wider world of media and politics and an essential companion to more in depths studies of the field Talking about Politics Katherine Cramer Walsh,2010-03-15 Whether at parties around the dinner table or at the office people talk about politics all the time Yet while such conversations are a common part of everyday life political scientists know very little about how they actually work In Talking about Politics Katherine Cramer Walsh provides an innovative intimate study of how ordinary people use informal group discussions to make sense of politics Walsh examines how people rely on social identities their ideas of who we are to come to terms with current events In Talking about Politics she shows how political conversation friendship and identity evolve together creating stronger communities and stronger social ties Political scientists sociologists and anyone interested in how politics really works need to read this book *Entertaining Politics* Jeffrey P. Jones,2010 Contrary to arguments that television is detrimental to democracy Entertaining Politics explores the role of new political television in changing civic culture *The Cunning Of Unreason Making Sense Of Politics* John Dunn,2000-09-14 One of the world s eminent political theorists explains what politics really means and why it still matters We're Living Through The Breakdown Tatton Spiller,2020 We re living through The Breakdown A time of enormous political upheaval and polarised opinion Many of us feel ill equipped to understand and debate the issues currently rocking our world At last here is a sane voice of reason that cuts through the noise Brexit a chance to take back control or taking us to the brink of disaster Immigration a strain on our country or a crucial part of our economy Austerity essential reduction of national debt or devastating cuts to public spending Tax cuts control over your money or a threat to the welfare system Privatisation Crucial efficiency boosting competition or the ruthless destruction of our public services Ban on plastics saving the planet or excessive government interference The Breakdown will give you all the tools to work out what s happening and why and then empower you to do something about it

Democratic Philosophy and the Politics of Knowledge

Richard T. Peterson,2010-11-01 **Making Sense of Cultural Studies** Chris Barker,2002-03-26 The book is an important read for persons who practice or study within the field Anyone with experience or interest in the topic will come away with a deepened understanding of debates within cultural studies and with an array of new questions and ideas to pursue The book would make a fine text for graduate level classes dealing with culture and media the question debate orientated structure especially could provide the launching pad for a whole range of discussions projects and paper topics The Southern Communication Journal In this sequel to the best selling text Cultural Studies Theory and Practice Chris Barker turns his attention to the significance and future of the field He analyzes the strengths and weaknesses of cultural studies providing students and practitioners with an authoritative diagnosis of the subject and a balanced prognosis and investigates the

boundaries of cultural studies elucidating the main underlying themes of study Written with panache and an understanding of classroom needs *Making Sense of Cultural Studies* is the perfect teaching complement to Chris Barker's earlier textbook It is a rich resource for seminar work and undergraduate and postgraduate thesis topics yet it can also be read as a free standing analysis of the condition of cultural studies today *Making Sense of Nature* Noel Castree, 2013-08-15 We listen to a cacophony of voices instructing us how to think and feel about nature including our own bodies The news media wildlife documentaries science magazines and environmental NGOs are among those clamouring for our attention But are we empowered by all this knowledge or is our dependence on various communities allowing our thoughts sentiments and activities to be unduly governed by others *Making Sense of Nature* shows that what we call nature is made sense of for us in ways that make it central to social order social change and social dissent By utilising insights and extended examples from anthropology cultural studies human geography philosophy politics sociology science studies this interdisciplinary text asks whether we can better make sense of nature for ourselves and thus participate more meaningfully in momentous decisions about the future of life human and non human on the planet This book shows how nature can be made sense of without presuming its naturalness The challenge is not so much to rid ourselves of the idea of nature and its collateral concepts such as genes but instead we need to be more alert to how why and with what effects ideas about nature get fashioned and deployed in specific situations Among other things the book deals with science and scientists the mass media and journalists ecotourism literature and cinema environmentalists advertising and big business This innovative text contains numerous case studies and examples from daily life to put theory and subject matter into context as well as study tasks a glossary and suggested further reading The case studies cover a range of topics range from forestry in Canada and Guinea to bestiality in Washington State to how human genetics is reported in Western newspapers to participatory science experiments in the UK *Making Sense of Nature* will empower readers from a wide range of fields across the social sciences humanities and physical sciences **The Balkan Games and Balkan Politics in the Interwar Years 1929 - 1939** Penelope Kissoudi, 2013-10-18

The Balkan Games resulted on the one hand from the growth of modern European sport and the unsatisfactory performances of the Balkan athletes at national and international level and on the other hand from a desire to bring the Balkan peoples together in peace and concord The Games were initiated in Athens in 1929 and increasingly became an integral part of the political cultural and social life of the area The common global reality is that when an athletic event is staged attempted friendship seldom receives priority In the 1930s however the Balkan Games provided a rare example of an international athletic event bringing antagonistic states together in friendship This consideration of the significance of the Balkan Games as an instrument of political optimism provides clear evidence of the occasional positive influence of sport in politics The work is a case study of interest to political and social scientists and to historians of Europe and sport This book was previously published as a special issue of the *International Journal of the History of Sport* **Politics of Touch** Erin

Manning,2006 Political philosophy has long been bound by traditional thinking about the body Through an engagement with the state centered vocabulary of this discipline Politics of Touch examines the ways in which bodies continually run up against existing political structures In this groundbreaking work Erin Manning reconsiders how politics attempts to paralyze the body through the idea of the national body politic In Politics of Touch Manning develops a new way to conceive the role of the senses and of touch in particular Exploring concepts of violence gender sexuality security democracy and identity she traces the ways in which touch informs the body In an original and expansive analysis of tango a tactile rhythmic and improvisational dance Manning asserts the necessity of considering the sensing body in motion in order to think about its political implications With a fresh vision and an original theoretical basis Manning shows the body as its own ontological category and in doing so redefines our understanding of the sense of touch in philosophical and political terms **Gender**

Nussbaum's normative project Nussbaum's work is opposed to the emotional and political conditions of narcissism the tendency to seek to control the wills of others in order to defend oneself against perceived vulnerabilities Our capacity for wondering is important for growing beyond narcissism Bendik Keymer elaborates a politics of wonder that is consistent with understanding this idea Taking issue with understandings of wonder viewing it as an emotion of surprise or delight he develops an alternate tradition finding wonder in concert with the freedom of imagination found by degrees within much of human understanding The result is a constructive rereading of Nussbaum's oeuvre surprising for how it disencumbers her work of some falsehoods surrounding anxiety and anger and for the ways it implies an egalitarian politics of relational autonomy more socialist than liberal Misty Morrison's visual inquiry accompanies the book creating space for the reader to wonder Morrison paints and prints how families involve wonder starting with moments in her child's

life when she wonders what they might see Nussbaum's Politics of Wonder is an important contribution to the philosophy of wonder and is crucial for understanding the work of a leading philosopher Global Politics Aggie Hirst, Diego de Merich, Joe Hoover, Roberto Roccu, 2023 Global Politics Myths and Mysteries is an innovative introduction to key concepts in international relations exposing the myths of the discipline and making critical thinking engaging and relatable for students
