Sexual Myths of Modernity Alison M. Moore, 2015-11-19 The notion of sexual sadism emerged from nineteenth century alienist attempts to imagine the pleasure of the torturer or mass killer This was a time in which sexuality was mapped to social progress so that perversions were always related either to degeneration or decadence These ideas were internalized in later Freudian views of the drives within the self and of their repression under the demands of modern European civilization Sadism was always presented as the barbarous past that lurked within each of us ready to burst forth into murderous violence crime anti-Semitism and finally genocide This idea

maintained its currency in European thought after the Second World War as Freudian influenced accounts of the history of philosophy configured the Marquis de Sade as a kind of Kantian superego in a framework that viewed the Western Enlightenment as unraveled by its own inner demons In this way a straight line was imagined from the late eighteenth century to the Holocaust These ideas have had an ongoing legacy in debates about sexual perversion feminism genocide representation and historical memory of Nazism However recent genocide research has massively debunked assumptions that perpetrators of mass violence are especially sexually motivated in their cruelty This book considers how the late twentieth century imagination eroticized Nazism for its own ends but also how it has been informed by nineteenth century formulations of the idea of mass violence as a sexual problem The Legal Issues of the Emerging Rights Jianzong Yao,2024-02-27 This book systematically discusses the contents of the administrative right to know the right to information the right to gene euthanasia and other emerging rights The purpose of this book is to attract legal scholars to pay attention to these right changes in the process of China s social transformation analyze the basic laws of right changes under the specific background of China s society and provide a theoretical system model for the establishment of China s legislative right recognition and right relief system The typical feature of contemporary China is all round social transformation In such a transitional period the construction of democracy legal system and political system in China is gradually unfolding and developing with its unique mode In the construction of legal system and the practical operation of legal system the concept of rights the thinking of rights and the logic of rights have in fact been running through the social and legal practice in China for decades since the reform and opening up and have always become its background keynote and background Its typical realistic symptom is that a large number of rights belong to new for China the germination and birth of the type In this context this book tries to combine the general theory with the specific reality of the right landscape and preliminarily explores and explains the generation mechanism existence basis development logic and basic connotation of the new types of rights that is the main emerging or new types of rights in the transitional Chinese society The purpose of this book is to draw the attention of the colleagues in the field of law to the reality of the emergence and development of emerging rights in our society At the same time taking this as an example I hope that the colleagues in the field of law can deepen the study of rights especially from the general and macro study of rights to the more specific and micro study of rights **Manual of Men's Health** Susanne A.
