Achieving Blackness Algernon Austin, 2006-04-10 Achieving Blackness offers an important examination of the complexities of race and ethnicity in the context of black nationalist movements in the United States By examining the rise of the Nation of Islam the Black Power Movement of the 1960s and 1970s and the Afrocentric era of the 1980s through 1990s Austin shows how theories of race have shaped ideas about the meaning of Blackness within different time periods of the twentieth century Achieving Blackness provides both a fascinating history of Blackness and a theoretically challenging understanding of race and ethnicity Austin traces how Blackness was defined by cultural ideas social practices and shared identities as well as shaped in response to the social and historical conditions at different moments in American history Analyzing black public opinion on black nationalism and its relationship with class Austin challenges the commonly held assumption that black nationalism is a lower class phenomenon In a refreshing and final move he makes a compelling argument for rethinking contemporary theories of race away from the current fascination with physical difference which he contends sweeps race back to its misconceived biological underpinnings Achieving Blackness is a wonderful contribution to the sociology of race and African American Studies

Race in America Herbert Hill, James Edward Jones (Jr.), 1993 With a few exceptions these essays were originally presented at a conference in Madison Wisconsin November 1989 Two contributions giving historical perspective lead off a personal memoir and discussion of the significance for America and the world of black protest Fourteen contributions follow on the legal struggle the persistence of discrimination and perspectives on the past and future

Bloom, 2019-07-09 Revised and updated the award winning historical analysis of the civil rights movement examining the interplay of race and class in the American South In *Race Class and the Civil Rights Movement* sociologist Jack M Bloom explains what the civil rights movement was about why it was successful and why it fell short of some of its objectives With a unique sociohistorical analysis he argues that Southern racist practices were established by the agrarian upper class and that only when this class system was undermined did the civil rights movement become possible He also demonstrates how the movement was the culmination of political struggles beginning in the Reconstruction era and influenced by the New Deal policies of the 1930s Widely praised when it was first published 1987 *Race Class and the Civil Rights Movement* was a C Wright Mills Second Award winning book and also won the Gustavus Myers Center Outstanding Book Award In this second edition Bloom updates his study in light of current scholarship on civil rights history He also presents an analysis of the New Right within the Republican Party starting in the 1960s as a reaction to the civil rights movement
