Questioning Financial Governance from a Feminist Perspective Brigitte Young, Isabella Bakker, Diane Elson, 2011-08 Questioning Financial Governance from a Feminist Perspective brings together feminist economists and feminist political economists from different countries located in North America and Europe to analyze the strategic silence about gender in fiscal and monetary policy and financial regulation This silence reflects a set of assumptions that the key instruments of financial governance are gender neutral This often masks the ways in which financial governance operates to the disadvantage of women and reinforces gender inequality This book examines both the transformations in the governance of finance that predate the

financial crisis as well as some dimension of the crisis itself The transformations increasingly involved private as well as public forms of power along with institutions of state and civil society operating at the local national regional and global levels An important aspect of these transformations has been the creation of policy rules often enacted in laws that limit the discretion of national policy makers with respect to fiscal monetary and financial sector policies These policy rules tend to have inscribed in them a series of biases that have gender as well as class and race based outcomes The biases identified by the authors in the various chapters are the deflationary bias male breadwinner bias and commodification bias adding two new biases risk bias and creditor bias The originality of the book is that its primary focus is on macroeconomic policies fiscal and monetary and financial governance from a feminist perspective with a focus on the gross domestic product and its fluctuations and growth paid employment and inflation the budget surplus deficit levels of government expenditure and tax revenue and supply of money The central findings are that the key instruments of financial governance are not gender neutral Each chapter considers examples of financial governance and how it relates to the gender order including divisions of labour and relations of power and privilege This book is key reading for anyone studying feminist economics and should also be of interest to those researching macroeconomics political economics and women s studies      **Theories of Urban**

Dibua, 2017-11-28 In this book Jeremiah I Dibua challenges prevailing notions of Africa's development crisis by drawing attention to the role of modernization as a way of understanding the nature and dynamics of the crisis and how to overcome the problem of underdevelopment He specifically focuses on Nigeria and its development trajectory since it exemplifies the crisis of underdevelopment in the continent He explores various theoretical and empirical issues involved in understanding the crisis including state class gender and culture often neglected in analysis from an interdisciplinary radical political economy perspective This is the first book to adopt such an approach and to develop a new framework for analyzing Nigeria's and Africa's development crisis It will influence the debate on the development dilemma of African and Third World societies and will be of interest to scholars and students of race and ethnicity modern African history class analysis gender studies and development studies      **The Violence of Development** Karin Kapadia, 2002 Comprises 12 papers which assess the contemporary situation of women in India in four broad domains the cultural the social the political and the economic Argues that despite apparently positive indicators of progress particularly education and paid employment little has changed

Philip McMichael, Heloise Weber, 2020-12-21 *Development and Social Change A Global Perspective* explains how development thinking and practice have shaped our world. It introduces students to four interconnected projects and how their dynamics, contradictions, and controversies have influenced development trajectories: colonialism, the development era, the neoliberal globalization project, and sustainable development. Authors Philip McMichael and Heloise Weber use case studies and examples to help describe a complex world in transition. Students are encouraged to see global development as a contested historical project. By showing how development stems from unequal power relationships between and among peoples and states, often with planet-threatening environmental outcomes, it enables readers to reflect on the possibilities for more just social, ecological, and political relations.

*The Palgrave Handbook of Gender and Development* Wendy Harcourt, 2016-04-29 With original and engaging contributions, this Handbook confirms feminist scholarship in development studies as a vibrant research field. It reveals the diverse ways that feminist theory and practice inform and shape gender analysis and development policies, bridging generations of feminists from different institutions, disciplines, and regions.

*Feminisms in Development* Andrea Cornwall, Elizabeth Harrison, Ann Whitehead, 2013-07-04 This collection of essays by leading feminist thinkers from North and South constitutes a major new attempt to reposition feminism within development studies. Feminism's emphasis on social transformation makes it fundamental to development studies. Yet the relationship between the two disciplines has frequently been a troubled one. At present, the way in which many development institutions function often undermines feminist intent through bureaucratic structures and unequal power quotients. Moreover, the seeming intractability of inequalities and injustice in developing countries have presented feminists with some enormous challenges. Here, emphasizing the importance of a plurality of approaches, the authors argue for the importance of what feminisms have to say to development. Confronting the enormous challenges for feminisms in development studies, this book provides real hope for dialogue and exchange between feminisms and development.

*New Frontiers in Feminist Political Economy* Shirin Rai, Georgina Waylen, 2013-11-07 This volume brings together the work of outstanding feminist scholars who reflect on the achievements of feminist political economy and the challenges it faces in the 21st century. The volume develops further some key areas of research in feminist political economy: understanding economies as gendered structures and economic crises as crises in social reproduction as well as in finance and production; assessing economic policies through the lens of women's rights; analysing global transformations in women's work; making visible the unpaid economy in which care is provided for family and communities; and critiquing the ways in which policy makers are addressing or failing to address this unpaid economy.

**Gender Responsive Investment Handbook** Vanessa Erogbogbo, Esther Eghobamien, Elizabeth Pimentel, 2013 Gender Responsive Investment is a process of ensuring gender equitable access to financial services and investment. This Handbook supports policy makers to identify the policies, laws, and regulations that hinder women's access to finance and assists financial institutions to deliver inclusive, well-designed products and services for women.
