**Abstract** Abstract of the thesis entitled Male Homosexuality in Modern Japan Cultural Myths and Social Realities submitted by Mark James McLelland for the degree of Doctor of Philosophy at the University of Hong Kong in November 1999 The thesis looks at a variety of media discourses positioning male homosexuality in modern Japanese society and relates them to the actual experiences of a sample of Japanese gay men who I have interviewed Three main media paradigms are discovered gay men as woman like gender deviants gay men as beautiful ideal lovers and gay men as sex maniacs The way in which male homosexuality is depicted in the media is largely related to the intended audience For example media which assume a male gaze tend to ridicule gay men who are understood to have surrendered their masculine prerogatives in trespassing over to the feminine In media directed at women however the image of the feminine gay man is positively received as gay men are understood to be like women and therefore sympathetic to women and their problems In specifically gay media the image of the feminine gay man is rejected instead gay men are represented as hyper masculine and hyper sexual figures who have more in common with depictions of straight men in mainstream media than they do with depictions of gay men in these media It is suggested that none of these representations relates in any clear way to how gay men in Japan understand themselves Interviews with sixteen gay men as well as material taken from books the gay press and the Internet produced by gay men themselves is used to outline the various social problems that gay men face due to their same sex attraction The primary problem is identified as marriage which is understood in Japan to be a necessary step in order to become a fully adult and responsible member of society Instead of fighting the institution of marriage head on in a confrontation stressing the need for society to acknowledge a distinct gay identity and to protect the gay rights of a minority it is shown that many Japanese gay men prefer to negotiate around existing institutions rather than reject them outright Outing oneself as gay and basing one's identity upon sexual object choice is shown to be a strategy specific to certain urban spaces in modern western societies and the usefulness of this

discourse in Japan is brought into question Finally the thesis concludes that although there are widespread representations of homosexuality in Japanese media they are all stereotypes cultural myths which do not relate to how gay men actually experience themselves The way in which Japanese society is organised is shown to work against the development of a gay identity and the diversity which exists among gay men in Japan is shown to be such that no univocal account can be given of what it means to be gay in modern Japan DOI 10.5353/th\_b2979708 Subjects Gay men Japan Attitudes Male homosexuality Press coverage apan

**Male Homosexuality in Modern Japan** Mark J. McLelland, 2000 This book is the first to look at the wide range of contrasting images of the gay male body in Japanese popular culture both mainstream and gay and relate these images to the experience of an interview sample of Japanese gay men In so doing it touches on a number of important issues including whether there can be a universal gay identity and whether or not strategies developed for increasing gay and lesbian visibility in western countries are appropriate to the social situation in Japan queerqueen Claire Maree, 2020-06-30 From the twins Osugi and Peeco to longstanding icon Miwa Akihiro Claire Maree traces the figure of the Japanese queerqueen showing how a diversity of gender identifications sexual orientations and discursive styles are commodified and packaged together to form this character Representations of gay men's speech have changed in tandem with gender norms increasingly crossing over into popular media via the body of the authentic gay male up to and including the current LGBT boom in Japan In this context queerqueen demonstrates how commercial practices of recording transcribing and editing spoken interactions and use of on screen text encode queerqueen speech as inherently excessive and in need of containment Tackling questions of authenticity self censorship and the restrictions of heteronormativity within this perception of queer excess Maree shows how queerqueen styles reproduce stereotypes of gender sexuality and desire that are essential to the business of mainstream entertainment

**Intercultural Communication in Japan** Satoshi Toyosaki, Shinsuke Eguchi, 2017-02-24 Japan is heterogeneous and culturally diverse both historically through ancient waves of immigration and in recent years due to its foreign relations and internationalization However Japan has socially culturally politically and intellectually constructed a distinct and homogeneous identity More recently this identity construction has been rightfully questioned and challenged by Japan's culturally diverse groups This book explores the discursive systems of cultural identities that regenerate the illusion of Japan as a homogeneous nation Contributors from a variety of disciplines and methodological approaches investigate the ways in which Japan's homogenizing discourses are challenged and modified by counter homogeneous message systems They examine the discursive push and pull between homogenizing and heterogenizing vectors found in domestic and transnational contexts and mobilized by various identity politics such as gender sexuality ethnicity foreign status nationality multiculturalism and internationalization After offering a careful and critical analysis the book calls for a complicating of Japan's homogenizing discourses in nuanced and contextual ways with an explicit goal of working towards a culturally diverse Japan Taking a critical intercultural communication perspective this

book will be of interest to students and scholars of Japanese Studies Japanese Culture and Japanese Society
