Male-female Differences Roberta L. Hall,1985 *Male-female Differences* Roberta L. Hall,Patricia Draper,1985

Anatomy of Love: A Natural History of Mating, Marriage, and Why We Stray (Completely Revised and Updated with a New Introduction) Helen Fisher,2016-02-01 A contemporary classic about love now completely revised and updated From love at first sight and infidelity to hook up culture and slow love Dr Helen Fisher the biological anthropologist and renowned expert on the science of love Scientific American explains it all in this thoroughly revised classic on the evolution and future of human sex romance and partnership Examining marriage and divorce in 58 societies and adultery in 42 cultures she argues that we are returning to patterns of business sex and love that echo our ancient past and she is optimistic about our future

Sex and Gender Hilary M. Lips,2020-04-10 Are sex and gender really two different things How malleable is gender identity Do both gender and sex have to be conceptualized as binaries as having two distinct but complementary categories Should we emphasize gender differences or is that the wrong question When should we call a gender difference small Are women really nonaggressive or does that label stem from stereotyping How does subtle or modern sexism work on its targets Scholarship on these and other gender related questions has exploded in recent years Hilary Lips synthesizes that research for students in an accessible and readable way Concepts on sex and gender are presented with the social context in which they were developed As in previous editions Lips takes a multicultural approach discussing the gender experiences of people from a wide range of races cultures socioeconomic statuses and gender and sexual identities She emphasizes empirical research but takes a critical approach to that research

Reproductive Ecology and Human Evolution Peter T. Ellison,2017-09-04 The study of human reproductive ecology represents an important new development in human evolutionary biology Its focus is on the physiology of human reproduction and evidence of adaptation and hence the action of natural selection in that domain But at the same time the study of human reproductive ecology provides an important perspective on the historical process of human evolution a lens through which we may view the forces that have shaped us as a species In the end all actions of natural selection can be reduced to variation in the reproductive success of individuals Peter Ellison is one of the pioneers in the fast growing area of reproductive ecology He has collected for this volume the research of thirty one of the most active and influential scientists in the field Thanks to recent noninvasive techniques these contributors can present direct empirical data on the effect of a broad array of ecological behavioral and constitutional variables on the reproductive processes of humans as well as wild primates Because biological evolution is cumulative however organisms in the present must be viewed as products of the selective forces of past environments The study of adaptation thus often involves inferences about formative ecological relationships that may no longer exist or not in the same form Making such inferences depends on carefully weighing a broad range of evidence drawn from studies of contemporary ecological variation comparative studies of related taxonomies and paleontological and genetic evidence of evolutionary

history The result of this inquiry sheds light not only on the functional aspects of an organism's contemporary biology but also on its evolutionary history and the selective forces that have shaped it through time Encompassing a range of viewpoints controversy along with consensus this far ranging collection offers an indispensable guide for courses in biological anthropology human biology and primatology along with

Long-term Consequences of Early Environment C. Jeya K. Henry, Stanley J. Ulijaszek, 1996-06-27 In this book a leading team of researchers explore the long term effects of early environment in humans

The Human Being Hans Schwarz, 2013-12-20 This overview of Christian anthropology by Hans Schwarz uniquely emphasizes three things 1 the biblical testimony 2 the historical unfolding of Christian anthropology through the centuries and 3 the present affirmation of Christian anthropology in view of rival options and current scientific evidence Schwarz begins by elucidating the special place occupied by human beings in the world then ponders the complex issue of human freedom and concludes by investigating humanity as a community of men and women in this world and in the world beyond While maintaining a strong biblical orientation Schwarz draws on a wide range of resources including philosophy and the natural sciences in order to map out what it means to be human Schwarz's Human Being will interest anyone who is concerned with how in the face of fascinating scientific insights we can intelligently talk today about human sinfulness human freedom and human beings as children of the God who created us

A Biocultural Approach to Literary Theory and Interpretation Nancy Easterlin, 2012-05-31 Combining cognitive and evolutionary research with traditional humanist methods Nancy Easterlin demonstrates how a biocultural perspective in theory and criticism opens up new possibilities for literary interpretation Easterlin maintains that the practice of literary interpretation is still of central intellectual and social value Taking an open yet judicious approach she argues however that literary interpretation stands to gain dramatically from a fair minded and creative application of cognitive and evolutionary research This work does just that expounding a biocultural method that charts a middle course between overly reductive approaches to literature and traditionalists who see the sciences as a threat to the humanities Easterlin develops her biocultural method by comparing it to four major subfields within literary studies new historicism ecocriticism cognitive approaches and evolutionary approaches After a thorough review of each subfield she reconsiders them in light of relevant research in cognitive and evolutionary psychology and provides a textual analysis of literary works from the romantic era to the present including William Wordsworth's Simon Lee and the Lucy poems Mary Robinson's Old Barnard Samuel Taylor Coleridge's Dejection An Ode D H Lawrence's The Fox Jean Rhys's Wide Sargasso Sea and Raymond Carver's I Could See the Smallest Things A Biocultural Approach to Literary Theory and Interpretation offers a fresh and reasoned approach to literary studies that at once preserves the central importance that interpretation plays in the humanities and embraces the exciting developments of the cognitive sciences

Love and Intimate Relationships Norman M. Brown, Ellen S. Amatea, 2013-06-17 Using a style that draws students into the ongoing inquiry into how intimate relationships work Love and Intimate Relationships investigates the

life cycle of relationships influences that affect them theories behind them and ways to improve them Dozens of stories from students themselves case examples and over 150 tables figure and the cartoons of Don Edwing of Mad Magazine help bring the material alive The book is also unique in exploring aspects of human relationships not covered in other textbooks on the subject Love and Intimate Relationships helps bring the complex issues surrounding intimate relationships into focus for students from diverse backgrounds The multidisciplinary perspective of the textbook makes it ideal for introductory courses in psychology marriage counseling human relations and sexuality and interpersonal relationships

War and Gender Joshua S. Goldstein,2003-07-17 Gender roles are nowhere more prominent than in war Yet contentious debates and the scattering of scholarship across academic disciplines have obscured understanding of how gender affects war and vice versa In this authoritative and lively review of our state of knowledge Joshua Goldstein assesses the possible explanations for the near total exclusion of women from combat forces through history and across cultures Topics covered include the history of women who did fight and fought well the complex role of testosterone in men s social behaviours and the construction of masculinity and femininity in the shadow of war Goldstein concludes that killing in war does not come naturally for either gender and that gender norms often shape men women and children to the needs of the war system Illustrated with photographs drawings and graphics and drawing from scholarship spanning six academic disciplines this book provides a unique study of a fascinating issue

The Lifeways of Hunter-Gatherers Robert L. Kelly,2013-04-15 In this book Robert L Kelly challenges the preconceptions that hunter gatherers were Paleolithic relics living in a raw state of nature instead crafting a position that emphasizes their diversity and downplays attempts to model the original foraging lifeway or to use foragers to depict human nature stripped to its core Kelly reviews the anthropological literature for variation among living foragers in terms of diet mobility sharing land tenure technology exchange male female relations division of labor marriage descent and political organization Using the paradigm of human behavioral ecology he analyzes the diversity in these areas and seeks to explain rather than explain away variability and argues for an approach to prehistory that uses archaeological data to test theory rather than one that uses ethnographic analogy to reconstruct the past

Manhood in the Making David D. Gilmore,1990-01-01 Offers a cross cultural study of manhood as an achieved status and looks at two androgynous cultures that are exceptions to the manhood archetype

Hunter-Gatherer Childhoods Barry S. Hewlett,2017-07-28 In the vast anthropological literature devoted to hunter gatherer societies surprisingly little attention has been paid to the place of hunter gatherer children Children often represent 40 percent of hunter gatherer populations thus nearly half the population is omitted from most hunter gatherer ethnographies and research This volume is designed to bridge the gap in our understanding of the daily lives knowledge and development of hunter gatherer children The twenty six contributors to Hunter Gatherer Childhoods use three general but complementary theoretical approaches evolutionary

developmental cultural in their presentations of new and insightful ethnographic data For instance the authors employ these theoretical orientations to provide the first systematic studies of hunter gatherer children s hunting play infant care by children weaning and expressions of grief The chapters focus on understanding the daily life experiences of children and their views and feelings about their lives and cultural change Chapters address some of the following questions why does childhood exist who cares for hunter gatherer children what are the characteristic features of hunter gatherer children s development and what are the impacts of culture change on hunter gatherer child care The book is divided into five parts The first section provides historical theoretical and conceptual framework for the volume the second section examines data to test competing hypotheses regarding why childhood is particularly long in humans the third section expands on the second section by looking at who cares for hunter gatherer children the fourth section explores several developmental issues such as weaning play and loss of loved ones and the final section examines the impact of sedentism and schools on hunter gatherer children This pioneering volume will help to stimulate further research and scholarship on hunter gatherer childhoods th

Feminist Legal Theories Karen Maschke, 2013-09-13 Multidisciplinary focus Surveying many disciplines this anthology brings together an outstanding selection of scholarly articles that examine the profound impact of law on the lives of women in the United States The themes addressed include the historical political and social contexts of legal issues that have affected women s struggles to obtain equal treatment under the law The articles are drawn from journals in law political science history women s studies philosophy and education and represent some of the most interesting writing on the subject The law in theory and practice Many of the articles bring race social and economic factors into their analyses observing for example that black women poor women and single mothers are treated by the wielders of the power of the law differently than middle class white women Other topics covered include the evolution of women s legal status reproduction rights sexuality and family issues equal employment and educational opportunities domestic violence pornography and sexual exploitation hate speech and feminist legal thought A valuable research and classroom aid this series provides in depth coverage of specific legal issues and takes into account the major legal changes and policies that have had an impact on the lives of American women

Archetype Revisited Anthony Stevens, 2015-06-05 Archetype A Natural History of the Self first published in 1982 was a ground breaking book the first to explore the connections between Jung s archetypes and evolutionary disciplines such as ethology and sociobiology and an excellent introduction to the archetypes in theory and practical application as well C G Jung s archetypes of the collective unconscious have traditionally remained the property of analytical psychology and have commonly been dismissed as mystical by scientists But Jung himself described

them as biological entities which if they exist at all must be amenable to empirical study In the work of Bowlby and Lorenz and in studies of the bilateral brain Anthony Stevens has discovered the key to opening up this long ignored scientific approach to the archetypes originally envisaged by Jung At last in a creative leap made possible by the cross fertilisation of several specialist disciplines psychiatry can be integrated with psychology with ethology and biology The result is an immensely enriched science of human behaviour In Archetype Revisited Stevens considers the enormous cultural social and intellectual changes that have taken place since the publication of the original edition and includes An updated chapter on The Archetypal Masculine and Feminine reflecting recent research findings and developments in feminist thinking Commentary on the intrusion of neo Darwinian thinking into psychology and psychiatry Analysis of what has happened to the archetype in terms of our understanding of it and our responses to it This Classic Edition of the book includes a new introduction by the author
