A. B. Ronald, 2012-03-20 This book takes us into the fascinating and sometimes tragic world of the boy sailors of the Royal Navy during the Napoleonic Wars fighting and dying for their country across the oceans of the world They fought like young Nelsons The words of a schoolmaster writing from aboard the Mars after the battle of Trafalgar describing the valour of his pupils in the heat of battle Made immortal by the novels of Patrick O Brian C S Forester and Alexander Kent these boy sailors alongside those of every other Royal Navy ship had entered the British Navy to fight the French across every ocean of the world There was a long standing British tradition of children going to sea and along the way found adventure glory wealth and fame During the Napoleonic Wars these children some as young as eight or nine were also fighting for the very survival of Britain Drawing on many first hand accounts letters poems and writings this book tells the dramatic story of Britain s boy sailors during the Napoleonic Wars for the very first time *The Ancient Human Occupation of Britain* Nick Ashton, Simon Lewis, Chris Stringer, 2010-11-12 The Ancient Human Occupation of Britain Project AHOB funded by the Leverhulme Trust began in 2001 and brought together researchers from a range of disciplines with the aim of investigating the record of human presence in Britain from the earliest occupation until the end of the last Ice Age about 12 000 years ago Study of changes in climate landscape and biota over the last million years provides the environmental backdrop to understanding human presence and absence together with the development of new technologies This book brings together the multidisciplinary work of the project The chapters present the results of new fieldwork and research on old sites from museum collections using an array of new analytical techniques Features an up to date treatment of the record of human presence in the British Isles during the Palaeolithic

period 700 000 10 000 years before present Takes multidisciplinary approach that includes archaeology geochemistry geochronology stratigraphy and sedimentology Coincides with the culmination of the AHOB project in 2010 providing a benchmark statement on the record of human occupation in Britain that can be utilized and tested by future research

Jack the Ripper Paul Begg,2013-10-03 The clearest most accurate and most up to date account of the Ripper murders by one of Britain s greatest and most respected experts on the autumn of terror in Victorian London William D Rubenstein Professor of Modern History University of Wales Aberystwyth England in the 1880s was a society in transition shedding the skin of Victorianism and moving towards a more modern age Promiscuity moral decline prostitution unemployment poverty police inefficiency all these things combined to create a feeling of uncertainty and fear The East End of London became the focus of that fear Here lived the uneducated poverty ridden and morally destitute masses When Jack the Ripper walked onto the streets of the East End he came to represent everything that was wrong with the area and with society as a whole He was fear in a human form an unknown lurker in the shadows who could cross boundaries and kill Jack the Ripper The Definitive History is not yet another attempt to identify the culprit Instead the book sets the murders in their historical context examining in depth what East London was like in 1888 how it came to be that way and how events led to one of the most infamous and grisly episodes of the Victorian era The British National Bibliography Arthur James Wells,2007

Quaternary of the Thames D.R. Bridgland,2012-12-06 The principal aim of this volume is to provide descriptions of Sites of Special Scientific Interest selected as part of the Geological Conservation Review that yield evidence for the Pleistocene history of the River Thames and its tributaries Although defined thematically the volume covers all Pleistocene GCR sites in the Thames valley A number of sites in southern East Anglia are also included because they provide important evidence bearing on the history of the Thames system The justification for a GCR volume devoted to the Thames lies in the special importance of the river in the British Quaternary The volume is concerned with the history of Britain over approximately the last two million years of geological time during the repeated glacial phases of the Quaternary Ice Age and the warmer intervals between them Many such climatic fluctuations are recorded in the deposits of the Thames which can be shown to have existed as the predominant west to east drainage line in south eastern England throughout the Pleistocene The Thames

has left a detailed record of its earlier presence in the form of deposits which comprise fluvially aggraded floodplain sediments predominantly gravels preserved on the valley sides where they form geomorphological terrace features The oldest deposits are at the highest levels forming a terrace staircase that records successive stages in the evolution of the valley *Joyce in the Belly of the Big Truck; Workbook* Joyce A.
