**Biomimetics of Motion** Sandra Persiani, 2018-06-13. This book provides readers with a timely guide to the application of biomimetic principles in architecture and engineering design and describes various aspects of motion in living systems. Geometric, mechanical, and rhythmic parameters are listed and illustrated using examples from flora and fauna and contextualized within an integrated mapping of biomechanical combinations that have proved their success in the course of evolution. For designers, the schemes identify those aspects that have a high probability of being efficiently combined, paving the way for new solutions and offering a method of evolutionary problem solving. The book guides readers through the field of nature-inspired design, offering an extraordinary resource for professional architects, engineers, and designers as well as for researchers and students. Throughout the book, natural evolution is approached as a powerful resource that can enrich architecture and design by providing innovative, optimal, and sustainable solutions.

*The Oxford Edition of the Sermons of John Donne, Volume VII* Peter McCullough, Erica Longfellow, 2024-12-11. Volume VII of *The Oxford Edition of the Sermons of John Donne* gathers sermons preached by Donne at different venues for the related liturgical occasions of marriages, christenings, and the churching of women after childbirth. The volume contains ten sermons; seven of them undated and, in the case of the christening sermons, also for parties unknown. One of the two churching sermons survives only in an authorially revised state as two separate but obviously coeval sermons. Longfellow and McCullough establish that these sermons were preached across almost the whole of Donne's preaching career, from among his earliest (ca. 1615-16) to 1627, four years before his death. In each case, an authoritative text has been established by freshly collating multiple copies of the seventeenth-century print editions as well as multiple manuscript copies which predate the print witnesses. For the first time, these sermons appear with full critical apparatus. The Introduction provides the first dedicated account of the place of sermons in the social, liturgical, and theological contexts of these occasions in post-Reformation England. A headnote to each sermon describes its textual state and supplies local historical, social, and intellectual context and suggestions for further reading. Extensive commentaries document Donne's use of sources, both acknowledged and unacknowledged, translate passages in foreign languages, and gloss important and unfamiliar words. Although largely neglected by previous scholarship, these sermons emerge here as unique: the only known sermons for churchings, challenging for views on women and marriage, more conservative than many of Donne's contemporaries, and as evidence of Donne's Calvinist sacramental theology and his anti-Catholicism. They are also fine examples of Donne's skill in

crafting emotionally compelling sermons suited to the unique demands of both occasion and auditory Public Health Service Publication, 1970      **Coping and Adaptation** George V. Coelho, 1970      **Tradition, Conflict, and**
