Man Aggression:

Man and Aggression Ashley Montagu, 1973 *Man and Aggression* was first published in 1968 as a direct challenge to the concept of man's instinctual aggressive drive. A concept advanced in the newly developing science of ethology, the study of the behavior of different species by the eminent ethologist Konrad Lorenz and popularized in books by Robert Ardrey. The appearance of subsequent critiques of the Lorenz thesis led the editor to enlarge and revise his original collection. This second edition contains eight additional essays strengthening the book's sustained and reasoned criticism of the still fashionable contention that ethologists can understand human behavior by observing that of lower animals. The nineteen authorities represented in this volume offer a fine dissection of this Hobbesian view of man. They note among other phenomena the proclivities of many kinds of mammals to live together harmoniously; they discuss the evidence for spontaneous aggression and distinguish between defensive and predatory killing; they probe the possible cultural sources of human aggression. Also included for the first time is an exploration of the ritual origin of cannibalism and an examination of the writings of Desmond Morris and Anthony Storr. The book's purpose remains in the words of the editor to put the record straight to correct what threatens to become an epidemic error concerning the causes of man's aggression and to redirect attention to a consideration of the real causes of such behavior. Adapted from book jacket

Aggression in Man and Animals Roger N. Johnson, 1972 **Men, Masculinities and Violence** Anthony Ellis, 2015-10-23 The BSC Critical Criminology Network's Book of the Year 2016 Why do some men use physical violence against others? How do some men come to value physical violence as a resource? Drawing on in-depth ethnographic research conducted with men involved in serious violence and crime over a period of two years in the North of England, Anthony Ellis addresses these questions and the complex relationship between these men and their use of physical violence against others. Using detailed life history interviews and extended periods of observation with these men, *Men, Masculinities and Violence* describes their inner subjective lives and experiences, exploring how they came to value violence, why they are willing to use it against others and risk serious harm to themselves in the process. Over the course of the book, a picture emerges of a group of men that have experienced and perpetrated serious violence throughout their lives. This book advances a critical psychosocial understanding of such violence by situating these masculine biographies within their immediate contexts of de-industrialisation, fracturing working class community and culture, and broader shifts within the political economy of liberal capitalism. With its synthesis of rich ethnographic material and new developments in criminological theory, this book is essential reading for students and academics interested in issues of gender and violence.

When Men Revolt and Why Harold J. Bershady, 2020-03-26 The environment within which humans interact has changed dramatically since the Industrial Revolution. However, their expectations stem from the same hopes and dreams people have had from the beginning of humankind. *When Men Revolt and Why* encourages readers to look closer and more deeply into the relationships between humans and the institutions that have

originated to help them realize their full potential The contributors not only examine people but also the need to change institutions that have outworn their usefulness When institutions inhibit rather than facilitate everyone's desire to live a full life the result is likely to be violence This book offers the ideas of many people who have tried to dig deeper into basic causes of violence Included in this volume are selections by Aristotle Tocqueville Marx and Engels and Brinton The ideas they espoused still hold vitality In his new introduction James Davies talks about the circumstances under which this book was originally published In Vietnam a people were fighting for their autonomy In the United States many Americans were protesting against American involvement in the Vietnam War Blacks were marching for their civil rights Women were fighting for equality Time has tempered these conflicts Davies maintains that we remain ignorant of the elemental forces that impel people and nations to resort to violence We are usually surprised by their anger and shocked by their violence Davies asserts that we need to learn more about how humans respond to change so as to prepare ourselves for such responses to change When Men Revolt and Why is as timely as ever as we deal with uncertainty in various areas of the world the former Yugoslavia the Middle East and Ireland among others It is especially pertinent for political scientists historians and sociologists

A Philosophy of War Alexander Moseley, 2002 War's origins are complex they are found in the nebulous systems of thoughts generated in cultures over time But while reason and explication can unravel those origins and explain why man wages war the task of abolishing war can never be completed by reason alone The unfolding philosophy of war is much more complex than asserting that man is free to choose war and therefore he is free to not choose war We need to

explore the causal relationships between his nature and his thinking and in doing so we need to explore the realms of ideas that motivate and restrain him The author presents a unique interdisciplinary framework for understanding war s nature and causation examining biological and anthropological theories as well as relating traditional philosophical positions to war from Plato to Sartre Christianity to Marxism This book is distinctive in producing a coherent theory of war that goes beyond the usual analyses and explanations generated in academic sub disciplines The range of philosophical analysis is broad and where appropriate the author applies his philosophical outline to particular conflicts such as the Vietnam War and the Thirty Years War DR ALEXANDER MOSELEY is a political philosophy editor for the IEP Internet Encyclopedia of Philosophy and is affiliated with the Mises Institute the Cato Institute the Institute for Humane Studies and with the US Society for Philosophy in a Contemporary World He has lectured on the philosophy and morality of war at several British universities including the London School of Economics Currently he teaches Economics in the UK and is preparing a second volume to A Philosophy of War for publication in Fall 2002 to be followed by Great Philosophers On War

Reclaimed Powers David Gutmann,1994 A unique feature of human development is that mothers and fathers are bound to a long period of child rearing during which the continuity of our species depends on the fulfilment of distinct parental roles and on the suppression of psychological potentials that conflict with those roles But once the parental emergency is over the author argues men and women can assert those parts of their personalities curbed

by the restrictions of raising children It is this shift in roles a product of evolution found throughout our species that led David Gutmann to propose a new psychology of ageing based not on the threat of loss but on the promise of important new pleasures and capacities **Adolescent Romantic Relations and Sexual Behavior** Paul Florsheim,2003-07-18

Critique of the Empiricist Explanation of Morality C. W. Maris, 2013-11-22

a Two things fill the mind with ever new and increasing admiration and awe the oftener and the more steadily we reflect on them the starry heavens above and the moral law within Thus Kant formulates his attitude to morality Critique of Practical Reason p 260 He draws a sharp distinction between these two objects of admiration The starry sky he writes represents my relationship to the natural empirical world Moral law on the other hand is of a completely different order It begins from my invisible self my personality and exhibits me in a world which has true infinity but which is traceable only by the understanding and with which I discern that I am not in a merely contingent but in a universal and necessary connection p 260 So Kant sees morality as a separate metaphysical order opposed to the world of empirical phenomena Human beings belong to both worlds According to Kant the personality derives nothing of value from its relationship with the empirical world His part in the sensuous world of nature places man on a level with any animal which before long must give back to the rest of nature the substances of which it is made
