Man, Environment, and Disease in Britain George Melvyn Howe, 1972 [A Century of British Geography](#) Ron Johnston, Michael Williams, British Academy, 2003-09-11 These essays trace the evolution of British geography as an academic discipline during the last hundred years and stress how the study of the world we live in is fundamental to an understanding of its problems and concerns Never before has such an ambitious and wide ranging review been attempted and never before has it been done with so much knowledge and passion The principal themes covered in this volume are those of environment place and space and the applied geography of map making and planning The volume also addresses specific issues such as disease urbanization regional viability and ethics and social problems This lively and accessible work offers many insights into the minds and practices of today's geographers *Urbanising Britain* Gerard Kearns, Charles W. J. Withers, 1991-07-25 The essays in this collection reflect the increasing use of social science concepts within the field of historical geography

Visions of Filth Teresa Fuentes Peris, 2003-01-01 This book explores how notions of deviancy and social control are dramatized in the novels of the late nineteenth century Spanish realist author Benito P rez Gald s Gald s s treatment of prostitutes alcoholics beggars and vagrants is studied within the context of the socio cultural and medical debates circulating during the period Drawing on Foucault s very specific conceptualization of the idea of control through discourses the book analyzes how Gald s s novels interacted with contemporary debates on poverty and deviancy notably discourses on hygiene domesticity and philanthropy It is proposed that Gald s s view of marginal social groups was much more open minded shrewd and liberal than the often inflexible pronouncements made by contemporary professional voices [National Library of Medicine Current Catalog](#) National Library of Medicine (U.S.), 1972 First multi year cumulation covers six years 1965 70

 Barbara Freese, 2016-02-09 Engrossing Coal to borrow a phrase is king New York Times Book Review In this remarkable book Barbara Freese takes us on a rich historical journey that begins hundreds of millions of years ago and spans the globe Prized as the best stone in Britain by Roman invaders who carved jewelry out of it coal has transformed societies launched empires and expanded frontiers It made China an eleventh century superpower inspired the Communist Manifesto and helped the North win the American Civil War Yet coal's transformative power has come at tremendous cost from the blackening of our lungs and skies to the perils of mining to global warming Now updated with a new chapter describing the high stakes conflict between coal's defenders and those working to preserve a livable climate Coal offers a captivating history of the mineral that helped build the modern world but now endangers our future Doctor of Society Roy Porter, 2016-10-04 First published in 1992 this book explores how we come to hold our present attitudes towards health sickness and the medical profession Roy Porter argues that the outlook of the age of Enlightenment was crucially important in the creation of modern thinking about disease doctors and society To illustrate this viewpoint he focuses on Thomas Beddoes a prominent doctor of the eighteenth century and examines his challenging pugnacious radical and often amusing views on a wide range of issues concerning the place of illness and medicine in society Many modern debates in medicine continue to echo the topics which Beddoes himself discussed in his ever trenchant and provocative manner This book will be of interest to those studying the history of medicine social history and the Enlightenment *Field Systems and Farming Systems in Late Medieval England* Bruce M.S. Campbell, 2023-05-31 The later Middle Ages was an overwhelmingly rural world with probably three out of four households reliant upon farming for a living Yet conventional accounts of the period rarely do justice to the variety of ways in which the land was managed and worked The thirteen essays collected in this volume draw upon the abundant documentary evidence of the period to explore that diversity In the process they engage with the issue of classification without which effective generalisation is impossible and offer a series of solutions to that particularly thorny methodological challenge Only through systematic and objective classification is it possible to differentiate between and map different field systems husbandry types and land use categories That in turn makes it possible to consider and evaluate the relative roles of soils and topography institutional structures and commercialised market demand in shaping farm enterprise both during the period of mounting population before the Black Death and the long era of demographic decline that followed it What emerges is an agrarian world more commercialised differentiated and complex than is usually appreciated whose institutional and agronomic contours shaped the course of agricultural development for centuries to come Old English Wisdom Poetry Russell Gilbert Poole, 1998 Bibliography and guide to scholarly literature on the genre of Old English wisdom poetry Wisdom literature played a crucial role in the evolution of traditional societies contributing to the structure of society and to the acceptance of new ideas within a culture a function that has become

increasingly understood Old English wisdom literature is the focus of this volume which offers an bibliography of the scholarly criticism between 1800 and 1990 of a group of largely secular poems comprising the metrical Charms The Fortunes of Men The Gifts of Men Homiletic Fragments I and II Maxims I and II The Order of the World Precepts the metrical Proverbs the Riddles of the Exeter Book the Rune Poem Solomon and Saturn and Vainglory A General Introduction investigates debates between scholars and establishes overall trends it is followed by the bibliography proper divided into chapters each with its own introduction focusing on a major text or collection of texts with entries arranged chronologically Dr RUSSELL POOLE teaches in the School of English and Media Studies at Massey University New Zealand
