

We are not the product of evolution. We are not animals. We are a special creation of God!

The Wonders of the Human Body Series Volume Two continues to examine the systems of the body, both how they have been designed by the Master Creator and how they function. No doubt, you have been awed by the complexity of the human body and have been puzzled at how anyone could believe these systems could have come into existence by chance. This volume of the *Wonders* books shares more insights into God's amazing creation of us!

In Volume Two you will discover:

The Digestive System and Metabolism. The first unit opens with a study of the digestive system that will strengthen the faith of every reader. The function of digestion is a highly complex system created by God to transform food into fuel for our energy, something called metabolism, and to take waste from the body.

The Reproductive System. The second unit covers the complex but orderly processes God designed to make the human body form correctly — processes that are the same in everyone but still allow each person to turn out to be a unique individual. This journey into your past starts with a cell, the basic building block of life.

Special Systems. The third unit completes our exploration of the organ systems. It is no accident that each organ system is perfectly designed to perform its task and work in harmony with the other systems. This includes the blood and its components, the urinary system, the endocrine system, and the integumentary system.

Man His Body The Wonders Of The Human:

Wonders of the Human Body George W. Carey, 2013-12-10 The Bible the Kaballah the Vedas and ancient cuneiform tablets torn from their hiding places in the heart of Mother Nature all hold the key to the wisdom of the ages and some there are who have turned the key and the door to understanding has opened The author of this work has found the key and he has turned it Erect and unafraid for he has nothing to lose or gain he reverently offers you that which you are seeking He does not claim to be the only one who has discovered the key but working along the lines hinted at by some modern and many ancient seekers he hereby presents the results of his many years of scientific research He shows that the correct translations of the Greek and Hebrew scriptures plainly state that all the allegories and fables of these works refer to actual physiological facts and the statements Seek ye first the Kingdom of Heaven and all things shall be added unto you The Kingdom of Heaven is within you and Be ye therefore perfect as your Father in Heaven is perfect can be physiologically and chemically explained

A Remembrance of His Wonders David I. Shyovitz, 2017-06-05 The twelfth and thirteenth centuries witnessed an explosion of Christian interest in the meaning and workings of the natural world a discovery of nature that profoundly reshaped the intellectual currents and spiritual contours of European society yet to all appearances the Jews of medieval northern Europe Ashkenaz were oblivious to the shifts reshaping their surrounding culture Scholars have long assumed that rather than exploring or contemplating the natural world the Jews of medieval Ashkenaz were preoccupied solely with the supernatural and otherworldly magic and mysticism demonology and divination as well as the zombies werewolves dragons flying camels and other monstrous and wondrous creatures that destabilized any pretense of a consistent and encompassing natural order In A Remembrance of His Wonders David I Shyovitz disputes this long standing and far reaching consensus Analyzing a wide array of neglected Ashkenazic writings on the natural world in general and the human body in particular Shyovitz shows how Jews in Ashkenaz integrated regnant scientific magical and mystical currents into a sophisticated exploration of the boundaries between nature and the supernatural Ashkenazic beliefs and practices that have often been seen as signs of credulity and superstition in fact mirrored and drew upon contemporaneous Christian debates over the relationship between God and the natural world In charting these parallels between Jewish and Christian thought Shyovitz focuses especially upon the mediating role of polemical texts and encounters that served as mechanisms for the transmission of religious doctrines scientific facts and cultural mores Medieval Jews preoccupation with the apparently supernatural reflected neither ignorance nor intellectual isolation but rather a determined effort to understand nature s inner workings

and outer limits and to integrate and interrogate the theologies and ideologies of the broader European Christian society
