Style and Society in Dark Age Greece James Whitley, 2003-12-04 In this innovative study James Whitley examines the relationship between the development of pot style and social changes in the Dark Age of Greece 1100 700 BC He focuses on Athens where the Protogeometric and Geometric styles first appeared He considers pot shape and painted decoration primarily in relation to the other relevant features metal artefacts grave architecture funerary rites and the age and sex of the deceased and also takes into account different contexts in which these shapes and decorations appear A computer analysis of grave assemblages supports his view that pot style is an integral part of the collective representations of Early Athenian society It is a lens through which we can focus on the changing social circumstances of Dark Age Greece Dr Whitley's approach to the study of style challenges many of the assumptions which
