Human Adaptation Yehudi A. Cohen, 2017-07-12 Underlying the anthropological study of humans is the principle that there is a reality to which a human must adapt for survival Populations must adapt to the realities of the physical world and maintain a proper fit between their biological makeup and the pressures of the various niches of the world Social groups must develop adaptive mechanisms in the organization of their social relations if there is to be order regularity and predictability in patterns of cooperation and competition This book presents an introduction to anthropology that is unified and made systematic by its focus on adaptations that have accompanied the evolution of humans from non human primates to inhabitants of vast urban areas in modern industrial societies **Human Adaptation** contains over forty outstanding essays that are intended to serve as an introduction to physical anthropology archeology and linguistics from the point of view of the processes of adaptation The organization of these selections contains a balance between biological and prehistoric cultural adaptations They provide coherence for the study of human evolution Several selections notably those in connection with linguistic adaptations deal with contemporary people in order to shed light on earlier evolutionary processes More than half of the selections deal with biological evolution This volume unifies the subject matter of anthropology within a single and powerful explanatory framework and incorporates the work of the most renowned

anthropological experts on man **Iroquois Medical Botany** James W. Herrick, 1997-01-01 The world view of the Iroquois League or Confederacy the Mohawk Oneida Onondaga Cayuga Seneca and Tuscarora nations is based on a strong cosmological belief system This is especially evident in Iroquois medical practices which connect man to nature and the powerful forces in the supernatural realm Iroquois Medical Botany is the first guide to understanding the use of herbal medicines in traditional Iroquois culture It links Iroquois cosmology to cultural themes by showing the inherent spiritual power of plants and how the Iroquois traditionally have used and continue to use plants as remedies After an introduction to the Iroquois doctrine of the cosmos authors James Herrick and Dean Snow examine how ill health directly relates to the balance and subsequent disturbance of the forces in one's life They next turn to general perceptions of illness and the causes of imbalances which can result in physical manifestations from birthmarks and toothaches to sunstroke and cancer In all they list close to 300 phenomena Finally the book enumerates specific plant regimens for various ailments with a major compilation from numerous Iroquois authorities and sources of more than 450 native names uses and preparations of plants
