Genocide and the Global Village K. Campbell, 2001-09-07 A half century ago the international community made a solemn promise to never again allow genocide to go unchallenged In the early days of the Post Cold War New World Order though international leaders failed to stop horrific genocides in Bosnia and Rwanda chiefly because Western leaders lack the political will to use decisive force to suppress ongoing genocide Despite increased attention to war crimes issues in the Clinton Administration and increased rhetoric about its commitment to halting genocide American military force policy still gives lowest priority to responding to gross abuses of human rights In *Genocide and the Global Village* Kenneth Campbell explains why the international community fails so miserably to prevent suppress and punish contemporary genocide The book integrates the scattered pieces of this complex problem political military legal and ethical into a more complete clearer picture of the challenge facing the world today Campbell engages in a complex multi level analysis of genocide's impact upon world order and the inter play of politics and morality in the international community's determination of the appropriate role for military force in halting genocide and securing an emerging global civil society Campbell recommends practical steps the international community can take to greatly improve its response the next time genocide occurs a next time that will occur

schools were unconstitutional the highest echelons of Protestant Catholic and Jewish religious organizations enthusiastically supported the ruling and black civil rights workers expected and actively sought the cooperation of their white religious cohorts Many white southern clergy however were outspoken in their defense of segregation and even those who supported integration were wary of risking their positions by urging parishioners to act on their avowed religious beliefs in a common humanity Those who did so found themselves abandoned by friends attacked by white supremacists and often driven from their communities Michael Friedland here offers a collective biography of several southern and nationally known white religious leaders who did step forward to join the major social protest movements of the mid twentieth century lending their support first to the civil rights movement and later to protests over American involvement in Vietnam Profiling such activists as William Sloane Coffin Jr Daniel and Philip Berrigan Abraham Joshua Heschel Eugene Carson Blake Robert McAfee Brown and Will D Campbell he reveals the passions and commitment behind their involvement in these protests and places their actions in the context of a burgeoning ecumenical movement *Warrior Ways* Eric A. War Stories Gary Kulik, 2009-10-31 War stories are mostly innocent fables and understood as such by both the teller and the hearer However they have long been used for political and national purposes and those about the war in Vietnam were no exception as painfully evidenced in the 2004 presidential campaign John Kerry campaigned as a war hero His opponents cast him as a liar and a traitor and their war story prevailed War Stories delves into the myths associated with the Vietnam veteran's experience and looks at them through the war stories they told and continue to tell Kulik conducts an extremely thorough review of the Vietnam literature and interviews participants wherever possible poking holes in the war myths of people throughout the political spectrum War Stories discusses how returning Vietnam vets were treated and delves into the myths that atrocities were commonplace that all veterans of that war suffer from PTSD and that all are guilt ridden Kulik's research and analysis of such stories lies at the heart of this book's originality and provides a new perspective on the Vietnam War for scholars students and general readers His purpose in exposing such stories is not to deny or minimize American war crimes in Vietnam but to cut through the cant of false stories so that we retain our outrage at those that are true As we are faced with future war stories from Iraq and Afghanistan and their likely exploitation the moral stance and the lessons learned in this book will be especially important

Mother Earth and the Gene Machines A. Carlson Whalen, 2006-08 Memory, Trauma, and Identity Ron Eyerman, 2019-04-09 This volume brings together Ron Eyerman's most important interventions in the field of cultural trauma and offers an accessible entry point into the origins and development of this theory and a framework of an analysis that has now achieved the status of a research paradigm This

collection of disparate essays published between 2004 and 2018 coheres around an original introduction that not only provides a historical overview of cultural trauma but is also an important theoretical contribution to cultural trauma and collective identity in its own right The Afterword from esteemed sociologist Eric Woods connects the essays and explores their significance for the broader fields of sociology behavioral science and trauma studies **Pending Legislative**
