Beyond the Persecuting Society John Christian Laursen, Cary J. Nederman, 2011-07-18 There is a myth easily shattered that Western societies since the Enlightenment have been dedicated to the ideal of protecting the differences between individuals and groups and another too readily accepted that before the rise of secularism in the modern period intolerance and persecution held sway throughout Europe In *Beyond the Persecuting Society* John Christian Laursen Cary J Nederman and nine other scholars dismantle this second generalization If intolerance and religious persecution have been at the root of some of the greatest suffering in human history it is nevertheless the case that toleration was practiced and theorized in medieval and early modern Europe on a scale few have realized Christians and Jews the English French Germans Dutch Swiss Italians and Spanish had their proponents of and experiments with tolerance well before John Locke penned his famous Letter Concerning Toleration Moving from Abelard to Aphra Behn from the apology for the gentiles of the fourteenth century Talmudic scholar Menahem ben Solomon Ha Meiri to the rejection of intolerance in the New Israel of the Massachusetts Bay Colony *Beyond the Persecuting Society* offers a detailed and decisive correction to a vision of the past as any less complex in its embrace and abhorrence of diversity than the present **Telephone Cables** John Clifford Slippy, 1913 *Bhumdi and Beyond* Roger Stubbs, 2006 On The Langlands Program: Endoscopy And Beyond Wee Teck Gan, Dihua Jiang, Lei Zhang, Chen-bo Zhu, 2024-04-15 This is a collection of lecture notes from the minicourses in the December 2018 Langlands Workshop Endoscopy and Beyond The volume combines seven introductory chapters on trace formulas local Arthur packets and beyond endoscopy It aims to introduce the endoscopy classification via a basic example of the trace formula for SL 2 explore the more refined questions on the structure of Arthur packets and look beyond endoscopy following the suggestions of Langlands Braverman Kazhdan Ngo and Altu The book is a helpful reference for undergraduates postgraduates and researchers Beyond Plate Tectonics James Maxlow, 2018 Science is never settled New revolutionary ideas have always

overturned the settled sciences of the past In this far reaching book the author looks beyond plate tectonics in order to detail the next earth science revolution Drawing upon his work from four decades as a professional geologist and researcher the author reveals the weaknesses of conventional plate tectonic theory This research utilizes an extensive range of global observational data in order to reverse engineer geology back in time Reverse engineering seafloor and crustal geology enables past plate assemblages and configurations of the ancient continents to be accurately constrained using geology rather than geophysics From this a series of spherical geological models of the Earth are presented showing the precise locations and configurations of the ancient continents ranging back in time to the early Archaean These plate assemblages represent the first time that models of the ancient Earth have been geologically constrained back to the early Archaean An extensive range of additional global observational data are then displayed on the spherical models in order to quantify the location of the ancient poles and equator climate zones biogenic distributions exposed lands and seas as well as global distributions of hydrocarbon and metallic resources The research outcomes presented in this book are applicable to all disciplines of the Earth sciences and will appeal to a broad range of professional expertise in particular those with a grounding in the Earth sciences It is a must read for undergraduates and professionals alike *Beyond the Mechanical*
