Rain Forest Birds:

Birds of Tropical America Steven Hilty, 2010-07-05 The guide to neotropical bird behavior that picks up where field guides leave off Why are tropical birds like parrots and quetzals so much more colorful than those in more temperate climates How can a vulture soaring thousands of feet above the canopy spot a dead rodent no bigger than a mouse on the rainforest floor What permits sparrow sized antbirds to not only survive but to thrive among relentless hordes of army ants that devour every other living thing in their path Steven Hilty has led birding tours to the American Tropics for decades By providing answers to the hundreds of questions asked by participants of these expeditions Hilty has produced a natural history of the bird life of the New World Tropics that is at once practical accurate and as endlessly fascinating as the species whose lives it reveals *Birds of Tropical America* was published by Chapters Publishing in 1994 and went out of print in 1997 UT Press is pleased to reissue it with a new epilogue and updated references

The Action Plan for Australian Birds 2020 Stephen T. Garnett,G Barry Baker,2021-12 The Action Plan for Australian Birds 2020 is the most

comprehensive review of the status of Australia's avifauna ever attempted The latest in a series of action plans for Australian birds that have been produced every decade since 1992 it is also the largest The accounts in this plan have been authored by more than 300 of the most knowledgeable bird experts in the country and feature far more detail than any of the earlier plans This volume also includes accounts of over 60 taxa that are no longer considered threatened mainly thanks to sustained conservation action over many decades This extensive book covers key themes that have emerged in the last decade including the increasing impact of climate change as a threatening process most obviously in Queensland's tropical rainforests where many birds are being pushed up the mountains However the effects are also indirect as happened in the catastrophic fires of 2019/20 Many of the newly listed birds are subspecies confined to Kangaroo Island where fire destroyed over half the population But there are good news stories too especially on islands where there have been spectacular successes with predator control Such uplifting results demonstrate that when action plans are followed by action on the ground threatened species can indeed be recovered and threats alleviated
