and its laboring subjects constitutes the latest battleground in their encounter Dyer Witheford maps the dynamics of modern capitalism showing how capital depends for its operations not just on exploitation in the immediate workplace but on the continuous integration of a whole series of social sites and activities from public health and maternity to natural resource allocation and the geographical reorganization of labor power He also shows how these sites and activities may become focal points of subversion and insurgency as new means of communication vital for the smooth flow of capital also permit otherwise isolated and dispersed points of resistance to connect and combine with one another Cutting through the smokescreen of high tech propaganda Dyer Witheford predicts the advent of a reinvented autonomist Marxism that will rediscover the possibility of a collective communist transformation of society Refuting the utopian promises of the information revolution he discloses the real potentialities for a new social order in the form of a twenty first century communism based on the common sharing of wealth

work art space language and the human body      Digital Humanities and the Cyberspace Decade, 1990-2001 Claire Warwick, 2024-10-03 Setting out a history of cyberspace and its relationship with the discipline that was to become digital humanities this book is an account of an often forgotten period of internet history in the 1990s when this medium was in its infancy It provides a detailed account of the concepts of cyberspace and the virtual which were characteristic of a perception that using the internet allowed users to enter a separate space from everyday life a world elsewhere In doing so it argues that this libertarian idea of the internet framed it as a new frontier where the rules of the everyday world did not and should not apply and where the individual could find freedom These early norms and the regrettable lack of regulation that was a consequence of them this book argues contributed to many of current issues with internet media including of toxic communication disinformation and over commercialisation

Empire of Mind also makes apparent that digital piracy will not be eliminated The Internet community effectively converts private property into public thereby presenting serious obstacles for the management of consumer behaviour and significantly eroding brand value Much to the dismay of the corporate sector online communities are disinterested in the ethics of private property In fact the entire philosophical framework on which capitalism is based is threatened by these alternative means of cultural production
