Resolution Of Financial Distress:

Resolution of Financial Distress Stijn Claessens, Simeon Djankov, Ashoka Mody, 2001-01-01 The understanding of the economic and legal structure of the institutions of bankruptcy has increased considerably over the past decade This publication describes the state of current knowledge Containing both theoretical studies and evidence from recent case studies it shows the possibilities and methods of legal reform and the pitfalls of misguided political action **Financial Distress and Corporate Turnaround** Martin Schmuck, 2013-11-18 The work of Martin Schmuck empirically investigates the phenomenon of financial distress and corporate turnaround in the automotive supplier industry Based on a sample of 194 publicly listed automotive suppliers the effectiveness of managerial operational financial and asset restructuring activities is analyzed in a multivariate research setting Archetypes for successful turnarounds are identified and matched with strategies of non distressed companies Corporate Financial Distress, Restructuring, and Bankruptcy Edward I. Altman, Edith Hotchkiss, Wei Wang, 2019-02-27 A comprehensive look at the enormous growth and evolution of distressed debt markets corporate bankruptcy and credit risk models This Fourth Edition of the most authoritative finance book on the topic updates and expands its discussion of financial distress and bankruptcy as well as the related topics dealing with leveraged finance high yield and distressed debt markets It offers state of the art analysis and research on U S and international restructurings applications of distress prediction models in financial and managerial markets bankruptcy costs restructuring outcomes and more Understanding and Predicting the Resolution of Financial Distress Ahmet K. Karagozoglu, 2008 In this study we empirically investigate the determinants of the process utilized to resolve financial distress resolution process and also the outcome of the financial distress resolution outcome Specifically we separate firms that utilize a private work out versus a public filing for bankruptcy resolution process and then we further separate the firms by outcome liquidation or reorganization Various qualitative dependent variable models are estimated and compared ordered logistic regression OLR local regression models LRMs and feed forward neural network FNN We select several accounting and economic variables measured at the time of default which are expected to influence the resolution process and the resolution outcome Estimation results reveal the OLR specification achieves the best balance between in sample fit consistency with financial theory and out of sample classification accuracy We find that larger firms with higher liquidity and more secured debt in their capital structure are more likely to follow a public resolution process Firms with higher Z scores and more total leverage are less likely to follow a public resolution process and attempt to resolve the financial distress privately For resolution outcome we find that firms with greater liquidity more secured debt and lower cumulative abnormal returns are more likely to be liquidated rather than reorganized And firms with more leverage more intangible assets and filing a prepackaged bankruptcy are more likely to be reorganized Model performance is assessed on the dimensions of discriminatory power predictive and classification accuracy The former two are measured by implementing standard tests

power curve analysis and chi squared tests while classification accuracy is assessed according to alternative categorization criteria expected cost of misclassification minimization of total misclassification and deviation from historical averages as compared to naïve random benchmarks While in and out of sample performance along these dimensions exhibits wide variation across models and criteria the OLR and LRM models are found to perform comparably while the FNN model is found to consistently underperform The statistical significance of these results is rigorously analyzed and confirmed through a resampling procedure yielding estimated sampling distributions of the performance statistics confirming these observations

The Political Economy of Distress in East Asian Financial Institutions Paola Bongini, Stijn Claessens, Giovanni Ferri, 2000 In the East Asian crisis connections with industrial groups or influential families increased the probability of distress for financial institutions Connections also made closure more not less likely suggesting that the closure processes themselves were transparent But larger institutions although more likely to be distressed were less likely to be closed suggesting a too big to fail policy Cover

Financial Institutions in Distress Ronald Davis, Stephan Madaus, Monica Marcucci, Irit Mevorach, Riz Mokal, Barbara Romaine, Janis Sarra, Ignacio Tirado, 2023-08-10 Political boundaries are often porous to finance financial intermediation and financial distress Yet they are highly impervious to financial regulation When inhabitants of a country suffering a deficit of purchasing power are able to access and deploy funds flowing in from a country with a surfeit of such power the inhabitants of both countries may benefit They may also benefit when institutions undertaking such cross border financial intermediation experience economies of scale and are able to innovate and to offer funds and services at lower costs Inevitably however at least some such institutions will sometimes act imprudently some of the projects in which such funds are deployed may be unwise and other such projects can suffer from unforeseen circumstances As a result of such factors a financial institution may suffer distress in one country and may then transmit such distress to other countries in which it operates The efficacy of any response to such cross border transmission of distress may turn on the response being given due effect in both or all the territories in which the distressed financial institution operates This situation creates a conundrum for policymakers legislators and regulators who wish to enable those subject to their jurisdiction to access the benefits of cross border financial intermediation yet cannot make rules and regulations that would have effect outside that jurisdiction This book explores this conundrum and offers a response It does so by drawing on and adding to the literatures on financial intermediation regulation and distress and on existing hard and soft laws and regulations The book advocates for the creation of a model law that would address the full range of financial institutions including insurance companies and that would enable relevant authorities to cooperate with counterparts in advance of the onset of distress and to give appropriate effect in their jurisdiction to measures taken by counterpart authorities in other jurisdictions in which the distressed

This volume argues that good governance is crucial to the success of any regulatory regime and explores how better governance of the financial sector can be achieved *Resolution of Financial Distress* Sris Chatterjee, Upinder Singh Dhillon, Gabriel G. Ramírez, 1996 **Essays on Bankruptcy and the Resolution of Financial Distress** Stanley D. Longhofer, 1995 That a firm's initial equityholders often emerge from Chapter 11 bankruptcy proceedings with more value than the absolute priority rule APR would suggest is now a generally accepted fact The form in which this value is distributed however is less well understood In particular why do the original shareholders of some firms emerge from Chapter 11 bankruptcy with stock in the reorganized firm while others receive warrants The first essay of this dissertation proposes that informational asymmetries provide the answer to this question By proposing a reorganization plan in which they receive warrants the original stockholders of a firm with good future prospects can signal their superior information to the creditors in a way that firms with poor prospects will not wish to mimic Violations of the APR are commonplace in private workouts formal business reorganizations and personal bankruptcies While some theorists suggest they may arise endogenously they are clearly magnified by the institutional structure of the bankruptcy code The second essay shows that APR violations exacerbate credit rationing problems by reducing the payment lenders receive in default states Furthermore APR violations make default more likely to occur raising the interest rate firms must pay when borrowing Both of these problems arise even when APR violations have no impact on the borrower's incentive to undertake risk shifting behavior Typical folklore in corporate finance tells us that existing proportionate priority and absolute priority rules in bankruptcy have evolved in order to eliminate inefficiencies that result when lenders rush to retrieve their assets from a firm in financial distress The final essay of this dissertation shows that when a firm is faced with a moral hazard problem first come first served rules reduce lenders incentives to free ride on the monitoring efforts of each other As a result these rules may reduce the total social cost of loan contracts compared to other bankruptcy rules These first come first served rules mimic important contractual arrangements found in real world debt contracts *New Paradigms for Financial Regulation* Masahiro Kawai, Eswar S. Prasad, 2013 The global financial crisis has led to a sweeping reevaluation of financial market regulation and macroeconomic policies Emerging markets need to balance the goals of financial development and broader financial inclusion with the imperative of strengthening macroeconomic and financial stability The third in a series on emerging markets *New Paradigms for Financial Regulation* develops new analytical frameworks and provides policy prescriptions for how the frameworks should be adapted to a world of more free and more volatile capital This volume provides an overview of the global regulatory landscape from the perspective of Asian emerging markets The contributors discuss the many challenges ahead in developing sound and flexible financial regulatory systems for emerging market economies The challenges are heightened by the rising integration of these economies into global trade and finance the growing sophistication of their financial systems

as globalization and emergence processes accelerate and their potential vulnerability to instability arising from the financial markets in the advanced economies The contributors provide guidance about pitfalls to be avoided general principles that should guide the creation of sound regulatory systems and valuable analytic perspectives about how to continue to broaden the financial sector and innovate while still maintaining financial and macroeconomic stability European Financial Regulation Veerle Colaert,Danny Busch,Thomas Incalza,2019-12-26 Mirroring the long established structure of the financial industry EU financial regulation as we know it today approaches banking insurance and investment services separately and often divergently In recent decades however the clear separation between financial sectors has gradually evaporated as business lines have converged across sectors and FinTech solutions have emerged which do not fit traditional sector boundaries As the contours of the traditional tripartition in the financial industry have faded the diverging regulatory and supervisory treatment of these sectors has become increasingly at odds with economic reality This book brings together insights developed by distinguished researchers and industry professionals in a series of articles analysing the main areas of EU financial regulation from a cross sectoral perspective For each specific research theme including prudential regulation corporate governance and conduct of business rules the similarities as well as gaps overlaps and unjustifiable differences between banking securities and insurance regulation are clearly presented and discussed This innovative research approach is aimed at informing lawmakers and policymakers on potential improvements to EU financial regulation whilst also supporting legal and compliance professionals applying the current framework or looking to streamline compliance processes
