Poverty as Ideology Andrew Martin Fischer, 2018-12-15 Winner of the International Studies in Poverty Prize awarded by the Comparative Research Programme on Poverty CROP and Zed Books Poverty has become the central focus of global development efforts with a vast body of research and funding dedicated to its alleviation And yet the field of poverty studies remains deeply ideological and has been used to justify wealth and power within the prevailing world order Andrew Martin Fischer clarifies this deeply political character from conceptions and measures of poverty through to their application as policies Poverty as Ideology shows how our dominant approaches to poverty studies have in fact served to reinforce the prevailing neoliberal ideology while neglecting the wider interests of social justice that are fundamental to creating more

equitable societies Instead our development policies have created a poverty industry that obscures the dynamic reproductions of poverty within contemporary capitalist development and promotes segregation in the name of science and charity Fischer argues that an effective and lasting solution to global poverty requires us to reorient our efforts away from current fixations on productivity and towards more equitable distributions of wealth and resources This provocative work offers a radical new approach to understanding poverty based on a comprehensive and accessible critique of key concepts and research methods It upends much of the received wisdom to provide an invaluable resource for students teachers and researchers across the social sciences *Economic and Political Reform in Africa* Peter D. Little, 2013-11-20 What are the local effects of major economic and political reforms in Africa How have globalized pro market and pro democracy reforms impacted local economics and communities Examining case studies from The Gambia Ghana Mozambique Kenya Ethiopia and Somalia Peter D Little shows how rural farmers and others respond to complex agendas of governments development agencies and non governmental organizations The book explores the contradictions between what policy reforms were supposed to do and what actually happened in local communities Little s bold vision of development challenges common narratives of African poverty dependency and environmental degradation and suggests that sustainable development in Africa can best be achieved by strengthening local livelihoods markets and institutions *Asian Bibliography* ,1990

Thomas G Weiss, 2015-11-17 Problems posed by Syria s chemical weapons attacks Egypt s ouster of an elected government and myriad other global dilemmas beg the question of whether and how the world can be governed The challenge is addressing what former UN Secretary General Kofi Annan called Problems without Passports environmental economic humanitarian and political crises that threaten stability prosperity and even human survival Everything is globalized everything except politics which remain imprisoned behind national borders The world has changed but our basic way of managing it has not We pursue fitful tactical short term and local responses for actual or looming threats that require sustained strategic longer run and global actions With clarity and passion Thomas G Weiss argues for a diversity of organizational arrangements some centralized some decentralized and a plurality of problem solving strategies some worldwide some local He proposes a three pronged strategy the expansion of the formidable amount of practical global governance that already exists the harnessing of political and economic possibilities opened by the communications revolution and the recommitment by states to a fundamental revamping of the United Nations Human Development Report 1992 United Nations Development Programme, 1992 Since its headline making debut the Human Development Report has become an essential resource for development specialists economists and political scientists around the world The 1992 Report not only updates the findings of the earlier volumes but also examines the international dimensions of human development showing how global economic growth and the expansion of the world economy have filtered down to poor economies and poor people in developing countries In addition it examines tckps between human development and

international markets for products capital and labor addresses issues of global governance and presents updated human development indicators for more than 160 countries Development and Structural Change in Asia-Pacific Martin Andersson, Christer Gunnarsson, 2003-09-02 The authors consider how the Asia Pacific economies have developed since the financial crises and highlight two inter related themes the effect of global forces on the national Asian economies and the different development paths of these economies as they jointly enter this new phase Questions raised by the book include is globalization a threat to development and prosperity in the Asia Pacific or did globalization rather facilitate and accelerate the pace of industrialization among late industrializers in the region is there a single Asia Pacific development model or did the crisis show this to be false did the financial crisis reveal structural weaknesses in an Asia Pacific state led model or was state leadership already in demise Development and Structural Change in Asia-Pacific provides a useful and relevant account of how the global economy has led to structural changes within Asian economies
